

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **September 30, 2019**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission file number **001-37386**

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC

(Exact name of registrant as specified in its charter)

Delaware

32-0434238

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

1345 Avenue of the Americas, 45th Floor

New York

NY

10105

(Address of principal executive offices)

(Zip Code)

(Registrant's telephone number, including area code) **(212) 798-6100**

(Former name, former address and former fiscal year, if changed since last report) **N/A**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class:	Trading Symbol:	Name of exchange on which registered:
Class A common shares, \$0.01 par value per share	FTAI	New York Stock Exchange
8.25% Fixed-to-Floating Rate Series A Cumulative Perpetual Redeemable Preferred Shares	FTAI PR A	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

There were 84,903,138 common shares representing limited liability company interests outstanding at October 29, 2019.

FORWARD-LOOKING STATEMENTS

This report contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not statements of historical fact but instead are based on our present beliefs and assumptions and on information currently available to us. You can identify these forward-looking statements by the use of forward-looking words such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “could,” “seeks,” “approximately,” “predicts,” “intends,” “plans,” “estimates,” “anticipates,” “target,” “projects,” “contemplates” or the negative version of those words or other comparable words. Any forward-looking statements contained in this report are based upon our historical performance and on our current plans, estimates and expectations in light of information currently available to us. The inclusion of this forward-looking information should not be regarded as a representation by us, that the future plans, estimates or expectations contemplated by us will be achieved. Such forward-looking statements are subject to various risks and uncertainties and assumptions relating to our operations, financial results, financial condition, business, prospects, growth strategy and liquidity. Accordingly, there are or will be important factors that could cause our actual results to differ materially from those indicated in these statements. We believe that these factors include, but are not limited to:

- changes in economic conditions generally and specifically in our industry sectors, and other risks relating to the global economy;
- reductions in cash flows received from our assets, as well as contractual limitations on the use of our aviation assets to secure debt for borrowed money;
- our ability to take advantage of acquisition opportunities at favorable prices;
- a lack of liquidity surrounding our assets, which could impede our ability to vary our portfolio in an appropriate manner;
- the relative spreads between the yield on the assets we acquire and the cost of financing;
- adverse changes in the financing markets we access affecting our ability to finance our acquisitions;
- customer defaults on their obligations;
- our ability to renew existing contracts and enter into new contracts with existing or potential customers;
- the availability and cost of capital for future acquisitions;
- concentration of a particular type of asset or in a particular sector;
- competition within the aviation, energy, intermodal transport and rail sectors;
- the competitive market for acquisition opportunities;
- risks related to operating through joint ventures or partnerships or through consortium arrangements;
- obsolescence of our assets or our ability to sell, re-lease or re-charter our assets;
- exposure to uninsurable losses and force majeure events;
- infrastructure operations may require substantial capital expenditures;
- the legislative/regulatory environment and exposure to increased economic regulation;
- exposure to the oil and gas industry’s volatile oil and gas prices;
- difficulties in obtaining effective legal redress in jurisdictions in which we operate with less developed legal systems;
- our ability to maintain our exemption from registration under the Investment Company Act of 1940 and the fact that maintaining such exemption imposes limits on our operations;
- our ability to successfully utilize leverage in connection with our investments;
- foreign currency risk and risk management activities;
- effectiveness of our internal control over financial reporting;
- exposure to environmental risks, including increasing environmental legislation and the broader impacts of climate change;
- changes in interest rates and/or credit spreads, as well as the success of any hedging strategy we may undertake in relation to such changes;
- actions taken by national, state, or provincial governments, including nationalization, or the imposition of new taxes, could materially impact the financial performance or value of our assets;
- our dependence on our Manager and its professionals and actual, potential or perceived conflicts of interest in our relationship with our Manager;
- effects of the merger of Fortress Investment Group LLC with affiliates of SoftBank Group Corp.;
- volatility in the market price of our common shares;
- the inability to pay dividends to our shareholders in the future; and
- other risks described in the “Risk Factors” section of this report.

These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this report. The forward-looking statements made in this report relate only to events as of the date on which the statements are made. We do not undertake any obligation to publicly update or review any forward-looking statement except as required by law, whether as a result of new information, future developments or otherwise.

If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, our actual results may vary materially from what we may have expressed or implied by these forward-looking statements. We caution that you should not place undue reliance on any of our forward-looking statements. Furthermore, new risks and uncertainties arise from time to time, and it is impossible for us to predict those events or how they may affect us.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (*unaudited*)

(Dollars in tables in thousands, unless otherwise noted)

1. ORGANIZATION

Fortress Transportation and Infrastructure Investors LLC (the “Company,” “we,” “our” or “us”) is a Delaware limited liability company which, through its subsidiary, Fortress Worldwide Transportation and Infrastructure General Partnership (the “Partnership”), owns and leases aviation equipment and also owns and operates a short line railroad in North America, Central Maine and Québec Railway (“CMQR”), a multi-modal crude oil and refined products terminal in Beaumont, Texas (“Jefferson Terminal”), a deep-water port located along the Delaware River with an underground storage cavern and multiple industrial development opportunities (“Repauno”), and a multi-modal terminal located along the Ohio River with multiple industrial development opportunities, including a power plant under construction (“Long Ridge”). Additionally, we own and lease offshore energy equipment and shipping containers. We have four reportable segments, (i) Aviation Leasing, (ii) Jefferson Terminal, (iii) Railroad, and (iv) Ports and Terminals, which operate in two primary businesses, Equipment Leasing and Infrastructure (Note 16).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting—The accompanying consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and include the accounts of us and our subsidiaries.

Principles of Consolidation—We consolidate all entities in which we have a controlling financial interest and control over significant operating decisions, as well as variable interest entities (“VIEs”) in which we are the primary beneficiary. All significant intercompany transactions and balances have been eliminated. All adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The ownership interest of other investors in consolidated subsidiaries is recorded as non-controlling interest.

We use the equity method of accounting for investments in entities in which we exercise significant influence but which do not meet the requirements for consolidation. Under the equity method, we record our proportionate share of the underlying net income (loss) of these entities.

Use of Estimates—The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties—In the normal course of business, we encounter several significant types of economic risk including credit, market, and capital market risks. Credit risk is the risk of the inability or unwillingness of a lessee, customer, or derivative counterparty to make contractually required payments or to fulfill its other contractual obligations. Market risk reflects the risk of a downturn or volatility in the underlying industry segments in which we operate, which could adversely impact the pricing of the services offered by us or a lessee’s or customer’s ability to make payments, increase the risk of unscheduled lease terminations and depress lease rates and the value of our leasing equipment or operating assets. Capital market risk is the risk that we are unable to obtain capital at reasonable rates to fund the growth of our business or to refinance existing debt facilities. We, through our subsidiaries, also conduct operations outside of the United States; such international operations are subject to the same risks as those associated with our United States operations as well as additional risks, including unexpected changes in regulatory requirements, heightened risk of political and economic instability, potentially adverse tax consequences and the burden of complying with foreign laws. We do not have significant exposure to foreign currency risk as all of our leasing arrangements and the majority of terminal services revenue and freight rail revenue are denominated in U.S. dollars.

Variable Interest Entities—The assessment of whether an entity is a VIE and the determination of whether to consolidate a VIE requires judgment. VIEs are defined as entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. A VIE is required to be consolidated by its primary beneficiary, and only by its primary beneficiary, which is defined as the party who has the power to direct the activities of a VIE that most significantly impact its economic performance and who has the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

JGP Energy Partners LLC

During the quarter ended September 30, 2016, we initiated activities in our 50% owned joint venture, JGP Energy Partners LLC (“JGP”). The other 50% member to the joint venture is a third party ethanol producer. The purpose of the venture is to build storage capacity with capabilities to receive and/or distribute ethanol via water, rail or truck. Each member contributed up to \$27 million (for a total of \$54 million) for the development and construction of the ethanol terminal facilities. JGP is governed by a designated operating committee selected by the members in proportion to their equity interests. JGP is solely reliant on its members to finance its activities and therefore is a VIE. We concluded that we are not the primary beneficiary of JGP as the members share equally in the risks and rewards and decision making authority of the entity; therefore, we do not consolidate JGP and account for this investment in accordance with the equity method. Refer to Note 6 for details.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Delaware River Partners LLC

On July 1, 2016, we, through Delaware River Partners LLC (“DRP”), a consolidated subsidiary, purchased the assets of Repauno, which consisted primarily of land, a storage cavern, and riparian rights for the acquired land, site improvements and rights. Upon acquisition there were no operational processes that could be applied to these assets that would result in outputs without significant green field development. We currently hold an approximately 98% economic interest, which includes the additional 8% economic interest we purchased from non-controlling interest holders in DRP for \$4.5 million in April 2019, and a 100% voting interest in DRP. DRP is solely reliant on us to finance its activities and therefore is a VIE. We concluded that we were the primary beneficiary; and accordingly, DRP has been presented on a consolidated basis in the accompanying financial statements.

Ohio River Partners LLC

On June 16, 2017, we, through Ohio River Partners Shareholder LLC (“ORP”), a consolidated subsidiary, purchased the assets of Long Ridge which consisted primarily of land, buildings, railroad track, docks, water rights, site improvements and other rights. We purchased 100% of the interests in these assets. ORP is solely reliant on us to finance its activities and therefore is a VIE. We concluded that we were the primary beneficiary; accordingly, ORP has been presented on a consolidated basis in the accompanying financial statements.

Cash and Cash Equivalents—We consider all highly liquid short-term investments with a maturity of 90 days or less when purchased to be cash equivalents.

Restricted Cash—Restricted cash consists of prepaid interest and principal pursuant to the requirements of certain of our debt agreements (see Note 8), and funds set aside for the power plant construction at Long Ridge (see Note 5) and other qualifying construction projects at Jefferson Terminal.

Inventory—Commodities inventory is carried at the lower of cost or net realizable value on our balance sheet. Commodities are removed from inventory based on the average cost at the time of sale. As of September 30, 2019 and December 31, 2018, we had commodities inventory of \$16.6 million and \$10.4 million, respectively, which is included in Other assets in the Consolidated Balance Sheets.

Deferred Financing Costs—Costs incurred in connection with obtaining long term financing are capitalized and amortized to interest expense over the term of the underlying loans. Unamortized deferred financing costs of \$21.2 million and \$14.5 million as of September 30, 2019 and December 31, 2018, respectively, are recorded as a component of debt in the Consolidated Balance Sheets.

We also have unamortized deferred revolver fees related to our revolving debt of \$19.1 million and \$1.5 million as of September 30, 2019 and December 31, 2018, respectively, which are included in Other assets in the Consolidated Balance Sheets.

Amortization expense was \$2.0 million and \$1.7 million for the three months ended September 30, 2019 and 2018, respectively, and \$6.0 million and \$4.2 million for the nine months ended September 30, 2019 and 2018, respectively, and is included in interest expense in the Consolidated Statements of Operations.

Revenue Recognition

Equipment Leasing Revenues

Operating Leases—We lease equipment pursuant to net operating leases. Operating leases with fixed rentals and step rentals are recognized on a straight-line basis over the term of the lease, assuming no renewals. Revenue is not recognized when collection is not reasonably assured. When collectability is not reasonably assured, the customer is placed on non-accrual status and revenue is recognized when cash payments are received.

Generally, under our aircraft lease and engine agreements, the lessee is required to make periodic maintenance payments calculated based on the lessee’s utilization of the leased asset or at the end of the lease. Typically, under our aircraft lease agreements, the lessee is responsible for maintenance, repairs and other operating expenses throughout the term of the lease. These periodic maintenance payments accumulate over the term of the lease to fund major maintenance events, and we are contractually obligated to return maintenance payments to the lessee up to the amount paid by the lessee. In the event the total cost of maintenance events over the term of a lease is less than the cumulative maintenance payments, we are not required to return any unused or excess maintenance payments to the lessee.

Maintenance payments received for which we expect to repay to the lessee are presented as Maintenance Deposits in our Consolidated Balance Sheets. All excess maintenance payments received that we do not expect to repay to the lessee are recorded as Maintenance revenues.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Finance Leases—From time to time we enter into finance lease arrangements that include a lessee obligation to purchase the leased equipment at the end of the lease term, a bargain purchase option, or provides for minimum lease payments with a present value that equals or exceeds substantially all of the fair value of the leased equipment at the date of lease inception. Net investment in finance lease represents the minimum lease payments due from lessee, net of unearned income. The lease payments are segregated into principal and interest components similar to a loan. Unearned income is recognized on an effective interest method over the lease term and is recorded as finance lease income. The principal component of the lease payment is reflected as a reduction to the net investment in finance leases. Revenue is not recognized when collection is not reasonably assured. When collectability is not reasonably assured, the customer is placed on non-accrual status and revenue is recognized when cash payments are received.

Infrastructure Revenues

Rail Revenues—Rail revenues generally consist of the following performance obligations: freight movement, demurrage, unloading and switching. Freight movement revenues are recognized proportionally based on distance as freight is transported from origin to destination. Accordingly, freight movement revenue is recognized over time with progress measured based on distance transpired, i.e., as the services are rendered and the customer simultaneously receives and consumes the benefit over time. Demurrage, unloading and switching are recognized in other miscellaneous rail revenues, for which demurrage progress is measured over time, and unloading and switching revenues are measured at a point in time as the service is rendered.

Terminal Services Revenues—Terminal services are provided to customers for the receipt and redelivery of various commodities. These revenues are recognized over time, i.e., as the services are rendered and the customer simultaneously receives and consumes the benefit over time.

Lease Income—Lease income consists of rental income from tenants for storage space. Lease income is recognized on a straight-line basis over the terms of the relevant lease agreement.

Crude Marketing Revenues—Crude marketing revenues consists of marketing revenue related to Canadian crude oil. The revenues are recognized over time, i.e., as the services are rendered and the customer simultaneously receives and consumes the benefit over time.

Other Revenue—Other revenue primarily consists of revenue related to the handling, storage and sale of raw materials. Other revenue consists of two performance obligations: handling and storage of raw materials. The revenues are recognized over time, i.e., as the services are rendered and the customer simultaneously receives and consumes the benefit over time.

Payment terms for Infrastructure Revenues are generally short term in nature.

Leasing Arrangements—At contract inception, we evaluate whether an arrangement is or contains a lease for which we are the lessee (that is, arrangements which provide us with the right to control a physical asset for a period of time). Operating lease right-of-use (“ROU”) assets and lease liabilities are recognized in Operating lease right-of-use assets, net and Operating lease liabilities in our Consolidated Balance Sheets, respectively. Finance lease ROU assets are recognized in Property, plant and equipment, net and lease liabilities are recognized in Other liabilities in our Consolidated Balance Sheets.

All lease liabilities are measured at the present value of the unpaid lease payments, discounted using our incremental borrowing rate based on the information available at commencement date of the lease. ROU assets, for both operating and finance leases, are initially measured based on the lease liability, adjusted for prepaid rent and lease incentives. ROU assets are subsequently measured at the carrying amount of the lease liability adjusted for prepaid or accrued lease payments and lease incentives. The finance lease ROU assets are subsequently amortized using the straight-line method.

Operating lease expenses are recognized on a straight-line basis over the lease term. With respect to finance leases, amortization of the ROU asset is presented separately from interest expense related to the finance lease liability. Variable lease payments, which are primarily based on usage, are recognized when the associated activity occurs.

We have elected to combine lease and non-lease components for all lease contracts where we are the lessee. Additionally, for arrangements with lease terms of 12 months or less, we do not recognize ROU assets, and lease liabilities and lease payments are recognized on a straight-line basis over the lease term with variable lease payments recognized in the period in which the obligation is incurred.

Concentration of Credit Risk—We are subject to concentrations of credit risk with respect to amounts due from customers on our finance leases and operating leases. We attempt to limit our credit risk by performing ongoing credit evaluations. During the three months ended September 30, 2019 and 2018 and the nine months ended September 30, 2019, one customer in the Jefferson Terminal segment accounted for approximately 17%, 15% and 19% of total revenue, respectively. There were no customers with a revenue concentration over 10% of total revenue during the nine months ended September 30, 2018.

As of September 30, 2019, accounts receivable from one customer in the Jefferson Terminal segment represented 12% of total accounts receivable, net. As of December 31, 2018, accounts receivable from two customers in the Jefferson Terminal segment each represented 17% and 15% of total accounts receivable, net.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (*unaudited*)

(Dollars in tables in thousands, unless otherwise noted)

We maintain cash and restricted cash balances, which generally exceed federally insured limits, and subject us to credit risk, in high credit quality financial institutions. We monitor the financial condition of these institutions and have not experienced any losses associated with these accounts.

Provision for Doubtful Accounts—We determine the provision for doubtful accounts based on our assessment of the collectability of our receivables on a customer-by-customer basis. The provision for doubtful accounts at September 30, 2019 and December 31, 2018 was \$1.2 million and \$1.1 million, respectively. Bad debt expense was \$0.1 million and \$0.1 million for the three months ended September 30, 2019 and 2018, respectively, and \$3.1 million and \$1.6 million for the nine months ended September 30, 2019 and 2018, respectively, and is included in operating expenses in the Consolidated Statements of Operations.

Comprehensive Income (Loss)—Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances, excluding those resulting from investments by and distributions to owners. Our comprehensive income (loss) represents net income (loss), as presented in the Consolidated Statements of Operations, adjusted for fair value changes related to derivatives accounted for as cash flow hedges.

Derivative Financial Instruments

Electricity Derivatives—We enter into derivative contracts as part of a risk management program to mitigate price risk associated with certain electricity price exposures. We primarily use swap derivative contracts, which are agreements to buy or sell a quantity of electricity at a predetermined future date and at a predetermined price.

Cash Flow Hedges

Certain of these derivative instruments are designated and qualify as cash flow hedges. The derivative's gain or loss is reported as a component of Other comprehensive income (loss) and recorded in Accumulated other comprehensive income in our Consolidated Balance Sheets. The gain or loss is subsequently reclassified into the income statement line item that is impacted by the forecasted transaction when the forecasted transaction affects net earnings.

Derivatives Not Designated As Hedging Instruments

Certain of these derivative instruments are not designated as hedging instruments for accounting purposes. The change in fair value of these contracts is recognized in Other income (expense) in the Consolidated Statements of Operations. The cash flow impact of derivative contracts that are not designated as hedging instruments is recognized in Change in fair value of non-hedge derivatives in our Consolidated Statements of Cash Flows.

Commodity Derivatives—We also enter into short-term and long-term crude forward contracts. Gains and losses related to our crude sales and purchase derivatives are recorded on a gross basis and are included in Crude marketing revenues and Operating expenses, respectively, in our Consolidated Statements of Operations. See Note 10 for additional details. The cash flow impact of these derivatives is recognized in Change in fair value of non-hedge derivatives in our Consolidated Statements of Cash Flows.

All of our outstanding derivatives are not used for speculative purposes. We record all derivative assets and liabilities on a gross basis at fair value and are included in Other assets and Other liabilities, respectively, in our Consolidated Balance Sheets.

Other Assets—Other assets is primarily comprised of commodities inventory of \$16.6 million and \$10.4 million, purchase deposits for acquisitions of \$31.3 million and \$10.2 million, lease incentives of \$52.4 million and \$51.0 million, deferred revolver fees, net of amortization of \$19.1 million and \$1.5 million, prepaid expenses of \$14.3 million and \$8.2 million, derivative assets of \$31.9 million and \$7.5 million and notes receivable of \$18.8 million and \$0.0 million as of September 30, 2019 and December 31, 2018, respectively.

Dividends—Dividends are recorded if and when declared by the Board of Directors. For both the three and nine months ended September 30, 2019 and 2018, the Board of Directors declared a cash dividend of \$0.33 and \$0.99 per common share, respectively.

Recent Accounting Pronouncements—In February 2016, the FASB issued Accounting Standards Update (“ASU”) 2016-02, *Leases* (and subsequently issued ASU 2018-01, ASU 2018-10, ASU 2018-11, ASU 2018-20 and ASU 2019-01, collectively, “ASU 2016-02”). ASU 2016-02 amends the existing accounting standards for lease accounting, including requiring lessees to recognize most leases on their balance sheets and making targeted changes to lessor accounting.

On January 1, 2019, we adopted ASU 2016-02 using the modified retrospective approach. We utilized the effective date transition method and accordingly are not required to adjust our comparative period financial information for effects of ASU 2016-02. We have elected to adopt the ‘package of practical expedients’ which permits us not to reassess under the new standard our prior conclusions about lease identification (including land easements), lease classification and initial direct costs.

The adoption of ASU 2016-02 resulted in the recognition of ROU assets and lease liabilities of approximately \$46 million in our Consolidated Balance Sheets as of January 1, 2019.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

In August 2017, the FASB issued ASU 2017-12, *Derivatives and Hedging: Targeted Improvements to Accounting for Hedging Activities*, which improves the financial reporting of hedging relationships to better represent the economic results of an entity's risk management activities in its financial statements and make certain improvements to simplify the application of the hedge accounting guidance. The amendments will make more financial and nonfinancial hedging strategies eligible for hedge accounting, amend the presentation and disclosure requirements and change how entities assess effectiveness. Entities are required to apply the amendments as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period after adoption. On January 1, 2019, we adopted this standard and it did not have an impact on our consolidated financial statements as we did not have any hedging relationships prior to adoption.

In June 2018, the FASB, issued ASU 2018-07, *Improvements to Nonemployee Share-Based Payment Accounting* to simplify the accounting for share-based payments to nonemployees by aligning it with the accounting for share-based payments to employees, with certain exceptions. The new guidance expands the scope of Accounting Standards Codification ("ASC") 718 to include share-based payments granted to nonemployees in exchange for goods or services used or consumed in an entity's own operations and supersedes the guidance in ASC 505-50. On January 1, 2019, we adopted this standard and it did not have an impact on our consolidated financial statements.

Unadopted Accounting Pronouncements—In January 2017, the FASB issued ASU 2017-04, *Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment ("ASU 2017-04")*. ASU 2017-04 addresses concerns over the cost and complexity of the two-step goodwill impairment test by removing the second step of the test. An entity will apply a one-step quantitative test and record the amount of goodwill impairment as the excess of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The new guidance does not amend the optional qualitative assessment of goodwill impairment. ASU 2017-01 will be effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. We are currently evaluating the impact of adopting this new guidance on our consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*. This ASU eliminates, adds and modifies certain disclosure requirements for fair value measurements as part of its disclosure framework project. The guidance is effective for all entities in fiscal years beginning after December 15, 2019, and interim periods within those fiscal years, and early adoption is permitted. We are currently evaluating the impact of adopting this new guidance on our consolidated financial statements.

3. LEASING EQUIPMENT, NET

Leasing equipment, net is summarized as follows:

	September 30, 2019	December 31, 2018
Leasing equipment	\$ 1,787,431	\$ 1,672,156
Less: accumulated depreciation	(288,752)	(239,946)
Leasing equipment, net	\$ 1,498,679	\$ 1,432,210

During the nine months ended September 30, 2019, we acquired 14 aircraft and 24 commercial engines, sold five aircraft and 37 commercial engines, and recognized a net gain on sale of approximately \$61.4 million.

Depreciation expense for leasing equipment is summarized as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Depreciation expense for leasing equipment	\$ 36,034	\$ 28,249	\$ 103,080	\$ 78,719

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

4. FINANCE LEASES, NET

Finance leases, net are summarized as follows:

	September 30, 2019	December 31, 2018
Finance leases	\$ 13,138	\$ 28,476
Unearned revenue	(4,518)	(9,853)
Finance leases, net	\$ 8,620	\$ 18,623

During the nine months ended September 30, 2019, we completed the sales-type leases for three of our airframes. Additionally, we received insurance proceeds for one of our vessels which was on nonaccrual status due to a casualty event. The insurance proceeds were in excess of the book value of the finance lease, which was written down to zero, and we recognized a gain of approximately \$1.0 million which is included in Other income in the Consolidated Statements of Operations.

5. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment, net is summarized as follows:

	September 30, 2019	December 31, 2018
Land, site improvements and rights	\$ 74,660	\$ 75,028
Construction in progress ⁽¹⁾	412,829	253,239
Buildings and improvements	15,626	14,514
Terminal machinery and equipment	426,165	349,227
Proved oil and gas properties	37,451	20,099
Track and track related assets	42,833	42,349
Railroad equipment	5,636	5,383
Railcars and locomotives	4,682	4,513
Computer hardware and software	3,831	3,806
Furniture and fixtures	805	572
Vehicles	2,173	1,636
	1,026,691	770,366
Less: accumulated depreciation	(83,158)	(63,032)
Spare parts	1,519	1,519
Property, plant and equipment, net	\$ 945,052	\$ 708,853

⁽¹⁾ Includes unproved oil and gas properties of \$58,359 and \$59,930 as of September 30, 2019 and December 31, 2018, respectively.

During the nine months ended September 30, 2019, we added property, plant and equipment of \$256.3 million, which primarily consists of terminal machinery and equipment placed in service or under development at Jefferson Terminal and Repauno, and assets under development at Jefferson Terminal and Long Ridge, including a power plant under construction.

Depreciation expense for property, plant and equipment is summarized as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Depreciation expense for property, plant and equipment	\$ 6,822	\$ 5,273	\$ 20,117	\$ 15,435

Construction of Power Plant at Long Ridge

Construction Agreements

On February 15, 2019, our subsidiary, Long Ridge Energy Generation LLC ("LREG"), entered into an engineering, procurement and construction agreement (the "EPC Agreement") with Kiewit Power Constructors Co. to construct a 485 megawatt natural gas fired, combined cycle power plant at Long Ridge Energy Terminal.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Additionally, on February 15, 2019, LREG entered into an agreement for the purchase of power generation equipment and related services (the "PIE Agreement") with General Electric Company ("GE") to acquire equipment and related services to be utilized at the power plant, including one combustion turbine, one condensing steam turbine, one hydrogen-cooled generator, one heat-recovery steam generator and related items.

The aggregate value of the EPC Agreement and the PIE Agreement is approximately \$430 million.

Credit Agreements

On February 15, 2019, LREG and two other subsidiaries (collectively, "Co-Borrowers") entered into certain credit agreements establishing (i) a \$445 million construction loan and term loan, (ii) a \$154 million letter of credit facility and (iii) a \$143 million construction loan and term loan, all of which will be used for the purposes of funding the development, construction and completion of the power plant. The interest costs incurred under these credit agreements for qualifying expenditures under construction are capitalized and included in the cost of the asset. Interest capitalization ceases once the asset is substantially complete or no longer undergoing activities to prepare it for its intended use.

See Note 8 for additional information related to the credit agreements.

Fixed Price Power Agreements

In connection with the construction of the power plant, LREG entered into fixed price power agreements for 457 megawatts of electric power. The agreements become effective on February 1, 2022, with 207 megawatts having a term of ten years and 250 megawatts having a term of seven years. Under the terms of the agreements, which are accounted for as derivatives, LREG receives a weighted average fixed price of \$27.30 per megawatt hour and pays a variable price equal to the ELECTRICITY-PJM-AEP/DAYTON HUB-DAY AHEAD price. See Note 10 for additional information related to the fixed price power agreements.

6. INVESTMENTS

The following table presents the ownership interests and carrying values of our investments:

	Investment	Ownership Percentage	Carrying Value	
			September 30, 2019	December 31, 2018
Advanced Engine Repair JV	Equity method	25%	\$ 25,153	\$ 12,981
JGP Energy Partners LLC	Equity method	50%	25,171	25,461
Intermodal Finance I, Ltd.	Equity method	51%	785	2,118
Investments			\$ 51,109	\$ 40,560

We did not recognize any other-than-temporary impairments for the three and nine months ended September 30, 2019 and 2018.

Equity Method Investments

The following table presents our proportionate share of equity in income (losses):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Advanced Engine Repair JV	\$ (885)	\$ (192)	\$ (1,328)	\$ (542)
JGP Energy Partners LLC	(162)	(363)	(290)	(450)
Intermodal Finance I, Ltd.	73	113	91	394
Total	\$ (974)	\$ (442)	\$ (1,527)	\$ (598)

Advanced Engine Repair JV

In December 2016, we invested \$15 million for 25% interest in an advanced engine repair joint venture. We focus on developing new costs savings programs for engine repairs. We exercise significant influence over this investment and account for this investment as an equity method investment.

During August 2019, we expanded the scope of our joint venture and invested an additional \$13.5 million and maintained a 25% interest.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

JGP

In 2016, we initiated activities in a 50% non-controlling interest in JGP, a joint venture. JGP is governed by a designated operating committee selected by the members in proportion to their equity interests. JGP is solely reliant on its members to finance its activities and therefore is a variable interest entity. We concluded that we are not the primary beneficiary of JGP as the members share equally in the risks and rewards and decision making authority of the entity; therefore, we do not consolidate JGP and instead account for this investment in accordance with the equity method.

Intermodal Finance I, Ltd.

In 2012, we acquired a 51% non-controlling interest in Intermodal Finance I, Ltd. ("Intermodal"), a joint venture. Intermodal is governed by a board of directors, and its shareholders have voting rights through their equity interests. As such, Intermodal is not within the scope of ASC 810-20 and should be evaluated for consolidation under the voting interest model. Due to the existence of substantive participating rights of the 49% equity investor, including the joint approval of material operating and capital decisions, such as material contracts and capital expenditures consistent with ASC 810-10-25-11, we do not have unilateral rights over this investment; therefore, we do not consolidate Intermodal but account for this investment in accordance with the equity method. We do not have a variable interest in this investment as none of the criteria of ASC 810-10-15-14 were met.

As of September 30, 2019, Intermodal owns a portfolio of approximately 4,000 shipping containers subject to multiple operating leases.

Less: Accumulated amortization	(2,114)	—	—	(2,114)
Acquired unfavorable lease intangibles, net	\$ 1,622	\$ —	\$ —	\$ 1,622

Intangible liabilities relate to unfavorable lease intangibles and are included as a component of other liabilities in the Consolidated Balance Sheets.

Amortization of intangible assets and liabilities is as follows:

	Classification in Consolidated Statements of Operations	Three Months Ended September 30,		Nine Months Ended September 30,	
		2019	2018	2019	2018
Lease intangibles	Equipment leasing revenues	\$ 1,072	\$ 2,087	\$ 5,736	\$ 6,143
Customer relationships	Depreciation and amortization	888	900	2,680	2,699
Total		\$ 1,960	\$ 2,987	\$ 8,416	\$ 8,842

As of September 30, 2019, estimated net annual amortization of intangibles is as follows:

Remainder of 2019	\$ 3,242
2020	7,725
2021	6,745
2022	4,764
2023	3,720
Thereafter	2,378
Total	\$ 28,574

Senior Notes due 2022 ⁽⁷⁾	697,625	6.75%	3/15/2022	549,405
Senior Notes due 2025 ⁽⁸⁾	444,780	6.50%	10/1/2025	295,642
Total bonds payable	1,327,685			1,032,044
Debt	1,603,454			1,251,857
Less: Debt issuance costs	(21,192)			(14,510)
Total debt, net	\$ 1,582,262			\$ 1,237,347
Total debt due within one year	\$ 189,066			\$ 71,678

⁽¹⁾ Secured on a first priority basis by the offshore vessel.

⁽²⁾ Requires a quarterly commitment fee at a rate of 0.50% on the average daily unused portion, as well as customary letter of credit fees and agency fees.

⁽³⁾ Requires a quarterly commitment fee at a rate of 0.875% on the average daily unused portion, as well as customary letter of credit fees and agency fees.

⁽⁴⁾ Requires a quarterly commitment fee on the average daily unused portion at a rate of 1.50% for the First Lien Credit Agreement and LC Facility and 1.00% for the Second Lien Credit Agreement, as well as customary letter of credit fees and agency fees.

⁽⁵⁾ Includes unamortized premium of \$1,530 and \$1,577 at September 30, 2019 and December 31, 2018, respectively.

⁽⁶⁾ These bonds have a stated maturity of February 1, 2036 but are subject to mandatory tender for purchase at par, by our subsidiary, on February 13, 2020 if they have not been repurchased from proceeds of a remarketing of the bonds or redeemed prior to such date.

⁽⁷⁾ Includes unamortized discount of \$5,954 and \$5,154 at September 30, 2019 and December 31, 2018, respectively, and an unamortized premium of \$3,579 and \$4,559 at September 30, 2019 and December 31, 2018, respectively.

⁽⁸⁾ Includes unamortized discount of \$5,220 and \$4,358 at September 30, 2019 and December 31, 2018, respectively.

Jefferson Revolver—On December 20, 2018, our subsidiary entered into an amendment to the Jefferson Revolver which temporarily increased the aggregate revolving commitments by \$25 million from \$50 million to \$75 million. In July 2019, we repaid \$23.0 million, and the aggregate revolving commitment reverted back to \$50 million on August 1, 2019.

Senior Notes due 2022—On February 8, 2019, we issued an additional \$150 million of Senior Notes (“2022 Notes”) at an offering price of 98.5% of the principal amount plus accrued interest from September 15, 2018.

Revolving Credit Facility—On February 8, 2019, we entered into an amendment to the revolving credit facility (the “Revolving Credit Facility”). The amendment, among other things, (i) increased the aggregate revolving commitments by \$125 million from \$125 million to \$250 million, (ii) extended the maturity date of the revolving loans and commitments to January 31, 2022 and (iii) made certain modifications to the financial covenants, including an increase in the maximum ratio of debt to total equity from 1.65:1.00 to 2.00:1.00.

On August 6, 2019, we entered into another amendment to the Revolving Credit Facility which, among other things, makes certain modifications to the financial covenants, including an increase in the maximum ratio of debt to total equity from 2.00:1.00 to 3.00:1.00.

LREG Credit Agreement—On February 15, 2019, LREG and two other subsidiaries, Ohio Gasco LLC, (“GasCo” and, together with LREG, the “Co-Borrowers”), and Ohio PP Holdco LLC (“Holdings”), entered into a First Lien Credit Agreement establishing (i) a \$445 million construction loan (the “First Lien Construction Loans”) and term loan (the “First Lien Term Loans” and, together with the First Lien Construction Loans, the “First Lien Loan Facility”) credit facility for the purposes of funding the development, construction and completion of the power plant and the associated development, production and drilling of hydrocarbon interests (cumulatively, the “Project”), and (ii) a \$154 million letter of credit facility, which is available to the Co-Borrowers solely to support any collateral posting obligations of the Co-Borrowers under certain fixed price power agreements related to the Project (the “LC Facility”). The LC Facility may be increased up to \$179 million under certain circumstances as set forth in the First Lien Credit Agreement, with such additional amounts of letters of credit available to LREG solely in support of any collateral posting obligations in connection with a bid in the PJM capacity auction. As of September 30, 2019, \$121 million letters of credit have been provided to counterparties in accordance with the provisions of the LC Facility, leaving \$33 million of remaining initial letter of credit capacity.

The First Lien Construction Loans are available until the date on which, among other things, substantial completion of the Project is achieved (which is required to occur on or prior to June 1, 2022), at which point the First Lien Construction Loans then outstanding shall automatically convert to Term Loans (“Term Conversion”). Following Term Conversion, the First Lien Term Loans will commence amortization on a quarterly basis and will mature on December 31, 2027. The LC Facility will mature upon the earlier of (a) February 15, 2022, (b) the date the loans under the First Lien Loan Facility are accelerated or (c) the date of Term Conversion.

Also on February 15, 2019, the Co-Borrowers and Holdings entered into a Second Lien Credit Agreement (the “Second Lien Credit Agreement” and, together with the First Lien Credit Agreement, the “Credit Agreements”) establishing a \$143 million construction loan (the “Second Lien Construction Loans”) and term loan (the “Second Lien Term Loans” and, together with the Second Lien Construction Loans, the “Second Lien Loan Facility”) credit facility for the purposes of funding the development, construction and completion of the Project.

The Co-Borrowers were required to borrow \$71.5 million in Second Lien Construction Loans on February 15, 2019, with the remaining Second Lien Construction Loans required to be borrowed no later than February 15, 2020. Following Term Conversion, the Second Lien Construction Loans then outstanding will automatically convert to Second Lien Term Loans and will commence amortization on a quarterly basis and mature on June 30, 2028.

The Co-Borrowers’ obligations under the First Lien Credit Agreement and the Second Lien Credit Agreement are guaranteed by the Co-Borrowers and Holdings and are secured by first priority security interests and second priority security interests, respectively, in all of the assets of the Co-Borrowers and Holdings. The borrowings under the Credit Agreements are not guaranteed by us and are non-recourse to us.

CMQR Credit Agreement—On May 8, 2019, our subsidiary entered into an amendment to the CMQR Credit Agreement which extended the maturity date to May 8, 2022.

Senior Notes due 2025—On May 21, 2019, we issued an additional \$150 million of Senior Notes (“2025 Notes”) at an offering price of 99.125% of the principal amount plus accrued interest from April 1, 2019.

FTAI Pride Credit Agreement—On September 30, 2019, our subsidiary entered into an amendment to the FTAI Pride Credit Agreement which extended the maturity date to September 16, 2020.

We were in compliance with all debt covenants as of September 30, 2019.

9. FAIR VALUE MEASUREMENTS

Fair value measurements and disclosures require the use of valuation techniques to measure fair value that maximize the use of observable inputs and minimize use of unobservable inputs. These inputs are prioritized as follows:

- Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities or market corroborated inputs.
- Level 3: Unobservable inputs for which there is little or no market data and which require us to develop our own assumptions about how market participants price the asset or liability.

The valuation techniques that may be used to measure fair value are as follows:

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)
(Dollars in tables in thousands, unless otherwise noted)

- Market approach—Uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- Income approach—Uses valuation techniques to convert future amounts to a single present amount based on current market expectations about those future amounts.
- Cost approach—Based on the amount that currently would be required to replace the service capacity of an asset (replacement cost).

The following tables set forth our financial assets measured at fair value on a recurring basis as of September 30, 2019 and December 31, 2018, by level within the fair value hierarchy. Assets measured at fair value are classified in their entirety based on the lowest level of input that is significant to their fair value measurement.

	Fair Value as of	Fair Value Measurements Using Fair Value Hierarchy as of				Valuation Technique
	September 30, 2019	September 30, 2019				
	Total	Level 1	Level 2	Level 3		
Assets						
Cash and cash equivalents	\$ 99,343	\$ 99,343	\$ —	\$ —		Market
Restricted cash	51,241	51,241	—	—		Market
Derivative assets	31,939	—	—	31,939		Income
Total assets	\$ 182,523	\$ 150,584	\$ —	\$ 31,939		

Liabilities						
Derivative liabilities	\$ (147)	\$ —	\$ —	\$ (147)		Income
Total liabilities	\$ (147)	\$ —	\$ —	\$ (147)		

	Fair Value as of	Fair Value Measurements Using Fair Value Hierarchy as of				Valuation Technique
	December 31, 2018	December 31, 2018				
	Total	Level 1	Level 2	Level 3		
Assets						
Cash and cash equivalents	\$ 99,601	\$ 99,601	\$ —	\$ —		Market
Restricted cash	21,236	21,236	—	—		Market
Derivative assets	7,470	—	—	7,470		Income
Total	\$ 128,307	\$ 120,837	\$ —	\$ 7,470		

Liabilities						
Derivative liabilities	\$ (925)	\$ —	\$ —	\$ (925)		Income
Total liabilities	\$ (925)	\$ —	\$ —	\$ (925)		

The fair value of our electricity derivative liabilities and commodity derivative assets and liabilities classified as Level 3 measurements are estimated by applying the income approach, which is based on discounted projected future cash flows. The valuation of our electricity derivatives is based on management's best estimate of certain key assumptions, which include extrapolated power forward curves for periods with unobservable market pricing, credit valuation adjustments utilizing estimated cash flows, estimated price volatility and probability of default, and the discount rate. The valuation of our commodity derivatives is based on management's best estimate of certain key assumptions, which include an estimated differential factor for varying quality of commodity and the discount rate.

Our cash and cash equivalents and restricted cash consist largely of demand deposit accounts with maturities of 90 days or less when purchased that are considered to be highly liquid. These instruments are valued using inputs observable in active markets for identical instruments and are therefore classified as Level 1 within the fair value hierarchy.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Except as discussed below, our financial instruments other than cash and cash equivalents and restricted cash consist principally of accounts receivable, accounts payable and accrued liabilities, loans payable, bonds payable, security deposits, maintenance deposits and management fees payable, whose fair value approximates their carrying value based on an evaluation of pricing data, vendor quotes, and historical trading activity or due to their short maturity profiles.

The fair value of our bonds and notes payable reported as debt, net in the Consolidated Balance Sheets are presented in the table below:

	September 30, 2019	December 31, 2018
Series 2012 Bonds ⁽¹⁾	\$ 41,545	\$ 42,633
Series 2016 Bonds ⁽¹⁾	147,261	149,582
Senior Notes due 2022	732,774	551,144
Senior Notes due 2025	463,455	283,965

⁽¹⁾ Fair value is based upon market prices for similar municipal securities.

The fair value of all other items reported as debt, net in the Consolidated Balance Sheet approximate their carrying values due to their bearing market rates of interest, and are classified as Level 2 within the fair value hierarchy.

We measure the fair value of certain assets and liabilities on a non-recurring basis when GAAP requires the application of fair value, including events or changes in circumstances that indicate that the carrying amounts of assets may not be recoverable. Assets subject to these measurements include goodwill, intangible assets, property, plant and equipment and leasing equipment. We record such assets at fair value when it is determined the carrying value may not be recoverable. Fair value measurements for assets subject to impairment tests are based on an income approach which uses Level 3 inputs, which include our assumptions as to future cash flows from operation of the underlying businesses and the leasing and eventual sale of assets.

10. DERIVATIVE FINANCIAL INSTRUMENTS

Electricity Derivatives

We are subject to electricity price volatility stemming from the anticipated sales of electricity from our Long Ridge power generation plant under construction. From time to time, we enter into electricity swap agreements to manage our exposure to electricity price fluctuations. Certain derivatives are designated as hedging instruments within cash flow hedging relationships and certain other derivatives are not designated as hedging instruments.

Commodity Derivatives

Depending on market conditions, we source crude oil from producers in Canada, arranging logistics to Jefferson Terminal and marketing crude oil to third parties. These crude oil forward purchase and sales contracts are not designated in hedging relationships.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

As of September 30, 2019, we do not expect any gains or losses on our electricity swaps to be reclassified into revenue in the next 12 months. As of September 30, 2019, the maximum length of time over which we are hedging forecasted electricity sales is 13 years.

11. REVENUES

We disaggregate our revenue from contracts with customers by products and services provided for each of our segments, as we believe it best depicts the nature, amount, timing and uncertainty of our revenue. Revenues attributed to our Equipment Leasing business unit are within the scope of ASC 840 prior to January 1, 2019 and ASC 842 after January 1, 2019, while revenues attributed to our Infrastructure business unit are within the scope of ASC 606, unless otherwise noted. Under the provisions of ASC 842, we have elected to exclude sales and other similar taxes from lease payments in arrangements where we are a lessor.

12. LEASES

We have commitments as lessees under lease arrangements primarily for real estate, equipment and vehicles. Our leases have remaining lease terms ranging from 2 months to 46 years.

The following table presents lease related costs:

	Three Months Ended September 30, 2019	Nine Months Ended September 30, 2019
Finance Leases		
Amortization of right-of-use assets	\$ 50	\$ 149
Interest on lease liabilities	26	85
Finance lease expense	76	234
Operating lease expense	2,556	7,605
Short-term lease expense	612	2,344
Variable lease expense	578	1,475
Sublease income	(279)	(833)
Total lease expense	\$ 3,543	\$ 10,825

The following table presents information related to our operating leases as of and for the nine months ended September 30, 2019:

Right-of-use assets, net	\$ 42,590
Lease liabilities	43,036
Weighted average remaining lease term	36.4 years
Weighted average incremental borrowing rate	7.1%

Cash paid for amounts included in the measurement of operating lease liabilities

Operating cash flows	\$ 7,570
----------------------	----------

The following table presents future minimum lease payments under non-cancellable operating leases as of September 30, 2019:

Remainder of 2019	\$ 2,446
2020	6,190
2021	4,820
2022	4,067
2023	3,150
Thereafter	108,029
Total undiscounted lease payments	128,702
Less: Imputed interest	85,666
Total lease liabilities	\$ 43,036

During the nine months ended September 30, 2019, we entered into lease agreements for real estate and office equipment that had a ROU asset value of \$1.4 million and lease terms ranging from 5 years to 46 years at commencement.

As of September 30, 2019, we have an agreement for an office lease that has not yet commenced which we estimate will have a ROU asset value of \$0.8 million. The lease is expected to commence in the fourth quarter of 2019 and has a lease term of seven years.

13. EQUITY-BASED COMPENSATION

In 2015, we established a Nonqualified Stock Option and Incentive Award Plan (“Incentive Plan”) which provides for the ability to award equity compensation awards in the form of stock options, stock appreciation rights, restricted stock, and performance awards to eligible employees, consultants, directors, and other individuals who provide services to us, each as determined by the Compensation Committee of the Board of Directors.

As of September 30, 2019, the Incentive Plan provides for the issuance of up to 30 million shares. We account for equity-based compensation expense in accordance with ASC 718 *Compensation-Stock Compensation* and is reported within operating expenses and general and administrative in the Consolidated Statements of Operations.

The Consolidated Statements of Operations includes the following expense related to our stock-based compensation arrangements:

	Three Months Ended September 30,		Nine Months Ended September 30,		Remaining Expense To Be Recognized, If All Vesting Conditions Are Met	Weighted Average Remaining Contractual Term, (in years)
	2019	2018	2019	2018		
Stock Options	\$ —	\$ —	\$ —	\$ 9	\$ —	9.0
Restricted Shares	273	89	819	269	1,322	1.1
Common Units	403	143	785	391	3,369	1.3
Total	\$ 676	\$ 232	\$ 1,604	\$ 669	\$ 4,691	

During the nine months ended September 30, 2019, the Manager transferred 165,268 of its options to certain of the Manager’s employees.

Options

In connection with our September 2019 offering of preferred shares (see Note 17), we granted options to the Manager related to 575,384 common shares at an exercise price of \$14.99, which had a grant date fair value of \$0.7 million. The assumptions used in valuing the options were: a 1.45% risk-free rate, a 8.02% dividend yield, a 21.45% volatility and a ten-year term.

Common Units

During the nine months ended September 30, 2019, we issued 1,110,000 common units of our subsidiaries that had a grant date fair value of \$3.4 million and vest over three years. These awards are subject to continued employment, and the compensation expense is recognized ratably over the vesting periods. The fair value of these awards was based on the fair value of the operating subsidiary on each grant date, which was estimated using a discounted cash flow analysis that requires the application of discount factors and terminal multiples to projected cash flows. Discount factors and terminal multiples were based on market-based inputs and transactions, as available at the measurement date.

Restricted Shares

During the nine months ended September 30, 2019, we issued 113,121 restricted shares of our subsidiary that had a grant date fair value of \$1.5 million, of which 25,138 shares vested during the period of issuance. The remaining shares vest over three years, subject to continued employment, and the compensation expense is recognized ratably over the vesting periods. The fair value of these awards was based on the fair value of the operating subsidiary on each grant date, which was estimated using a discounted cash flow analysis that requires the application of discount factors and terminal multiples to projected cash flows. Discount factors and terminal multiples were based on market-based inputs and transactions, as available at the measurement date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

14. INCOME TAXES

The current and deferred components of the income tax (benefit) provision included in the Consolidated Statements of Operations are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Current:				
Federal	\$ 16	\$ 22	\$ 86	\$ 193
State and local	87	12	195	43
Foreign	(17)	(3)	143	47
Total current provision	86	31	424	283
Deferred:				
Federal	—	419	(1,760)	1,096
State and local	—	62	(639)	162
Foreign	918	39	1,133	39
Total deferred (benefit) provision	918	520	(1,266)	1,297
Total (benefit) provision for income taxes	\$ 1,004	\$ 551	\$ (842)	\$ 1,580

We are taxed as a flow-through entity for U.S. income tax purposes and our taxable income or loss generated is the responsibility of our owners. Taxable income or loss generated by our corporate subsidiaries is subject to U.S. federal, state and foreign corporate income tax in locations where they conduct business.

Our effective tax rate differs from the U.S. federal tax rate of 21% primarily due to a significant portion of our income not being subject to U.S. corporate tax rates, or being deemed to be foreign sourced and thus either not taxable or taxable at effectively lower tax rates.

As of and for the nine months ended September 30, 2019, we had not established a liability for uncertain tax positions as no such positions existed. In general, our tax returns and the tax returns of our corporate subsidiaries are subject to U.S. federal, state, local and foreign income tax examinations by tax authorities. Generally, we are not subject to examination by taxing authorities for tax years prior to 2015. We do not believe that it is reasonably possible that the total amount of unrecognized tax benefits will significantly change within 12 months of the reporting date of September 30, 2019. The change in our effective tax rate and resulting tax benefit for the period ended September 30, 2019 is primarily driven by the reduction in taxes for one of our corporate subsidiaries as a result of an internal restructuring.

15. MANAGEMENT AGREEMENT AND AFFILIATE TRANSACTIONS

The Manager is paid annual fees in exchange for advising us on various aspects of our business, formulating our investment strategies, arranging for the acquisition and disposition of assets, arranging for financing, monitoring performance, and managing our day-to-day operations, inclusive of all costs incidental thereto. In addition, the Manager may be reimbursed for various expenses incurred by the Manager on our behalf, including the costs of legal, accounting and other administrative activities. Additionally, we have entered into certain incentive allocation arrangements with Master GP, which owns approximately 0.05% of the Partnership and is the general partner of the Partnership.

The Manager is entitled to a management fee, incentive allocations (comprised of income incentive allocation and capital gains incentive allocation, defined below) and reimbursement of certain expenses. The management fee is determined by taking the average value of total equity (excluding non-controlling interests) determined on a consolidated basis in accordance with GAAP at the end of the two most recently completed months multiplied by an annual rate of 1.50%, and is payable monthly in arrears in cash.

The income incentive allocation is calculated and distributable quarterly in arrears based on the pre-incentive allocation net income for the immediately preceding calendar quarter (the "Income Incentive Allocation"). For this purpose, pre-incentive allocation net income means, with respect to a calendar quarter, net income attributable to shareholders during such quarter calculated in accordance with GAAP excluding our pro rata share of (1) realized or unrealized gains and losses, and (2) certain non-cash or one-time items, and (3) any other adjustments as may be approved by our independent directors. Pre-incentive allocation net income does not include any Income Incentive Allocation or Capital Gains Incentive Allocation (described below) paid to the Master GP during the relevant quarter.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

A subsidiary of ours allocates and distributes to the Master GP an Income Incentive Allocation with respect to its pre-incentive allocation net income in each calendar quarter as follows: (1) no Income Incentive Allocation in any calendar quarter in which pre-incentive allocation net income, expressed as a rate of return on the average value of our net equity capital (excluding non-controlling interests) at the end of the two most recently completed calendar quarters, does not exceed 2% for such quarter (8% annualized); (2) 100% of pre-incentive allocation net income with respect to that portion of such pre-incentive allocation net income, if any, that is equal to or exceeds 2% but does not exceed 2.2223% for such quarter; and (3) 10% of the amount of pre-incentive allocation net income, if any, that exceeds 2.2223% for such quarter. These calculations will be prorated for any period of less than three months.

Capital Gains Incentive Allocation is calculated and distributable in arrears as of the end of each calendar year and is equal to 10% of our pro rata share of cumulative realized gains from the date of the IPO through the end of the applicable calendar year, net of our pro rata share of cumulative realized or unrealized losses, the cumulative non-cash portion of equity-based compensation expenses and all realized gains upon which prior performance-based Capital Gains Incentive Allocation payments were made to the Master GP.

The following table summarizes the management fees, income incentive allocation and capital gains incentive allocation:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Management fees	\$ 3,642	\$ 3,866	\$ 10,817	\$ 11,527
Income incentive allocation	—	—	—	—
Capital gains incentive allocation	3,736	(20)	6,109	553
Total	\$ 7,378	\$ 3,846	\$ 16,926	\$ 12,080

We pay all of our operating expenses, except those specifically required to be borne by the Manager under the Management Agreement. The expenses required to be paid by us include, but are not limited to, issuance and transaction costs incident to the acquisition, disposition and financing of our assets, legal and auditing fees and expenses, the compensation and expenses of our independent directors, the costs associated with the establishment and maintenance of any credit facilities and other indebtedness of ours (including commitment fees, legal fees, closing costs, etc.), expenses associated with other securities offerings of ours, costs and expenses incurred in contracting with third parties (including affiliates of the Manager), the costs of printing and mailing proxies and reports to our shareholders, costs incurred by the Manager or its affiliates for travel on our behalf, costs associated with any computer software or hardware that is used for us, costs to obtain liability insurance to indemnify our directors and officers and the compensation and expenses of our transfer agent.

We pay or reimburse the Manager and its affiliates for performing certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, provided that such costs and reimbursements are no greater than those which would be paid to outside professionals or consultants. The Manager is responsible for all of its other costs incident to the performance of its duties under the Management Agreement, including compensation of the Manager's employees, rent for facilities and other "overhead" expenses; we do not reimburse the Manager for these expenses.

The following table summarizes our reimbursements to the Manager:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Classification in the Consolidated Statements of Operations:				
General and administrative expenses	\$ 4,397	\$ 2,327	\$ 9,959	\$ 6,935
Acquisition and transaction expenses	4,040	1,375	7,810	4,426
Total	\$ 8,437	\$ 3,702	\$ 17,769	\$ 11,361

If we terminate the Management Agreement, we will generally be required to pay the Manager a termination fee. The termination fee is equal to the amount of the management fee during the 12 months immediately preceding the date of the termination. In addition, an Incentive Allocation Fair Value Amount will be distributable to the Master GP if the Master GP is removed due to the termination of the Management Agreement in certain specified circumstances. The Incentive Allocation Fair Value Amount is an amount equal to the Income Incentive Allocation and the Capital Gains Incentive Allocation that would be paid to the Master GP if our assets were sold for cash at their then current fair market value (as determined by an appraisal, taking into account, among other things, the expected future value of the underlying investments).

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Upon the successful completion of an offering of our common shares or other equity securities (including securities issued as consideration in an acquisition), we grant the Manager options to purchase common shares in an amount equal to 10% of the number of common shares being sold in the offering (or if the issuance relates to equity securities other than our common shares, options to purchase a number of common shares equal to 10% of the gross capital raised in the equity issuance divided by the fair market value of a common share as of the date of issuance), with an exercise price equal to the offering price per share paid by the public or other ultimate purchaser or attributed to such securities in connection with an acquisition (or the fair market value of a common share as of the date of the equity issuance if it relates to equity securities other than our common shares). Any ultimate purchaser of common shares for which such options are granted may be an affiliate of Fortress. See Note 17 for information related to options granted to the Manager in connection with our September 2019 offering of preferred shares.

The following table summarizes amounts due to the Manager, which are included within accounts payable and accrued liabilities in the Consolidated Balance Sheets:

	September 30, 2019		December 31, 2018	
Accrued management fees	\$	1,206	\$	1,263
Other payables		13,390		3,965

As of September 30, 2019 and December 31, 2018, there were no receivables from the Manager.

Other Affiliate Transactions

As of September 30, 2019 and December 31, 2018 an affiliate of our Manager owns an approximately 20% interest in Jefferson Terminal which has been accounted for as a component of non-controlling interest in consolidated subsidiaries in the consolidated financial statements. The carrying amount of this non-controlling interest at September 30, 2019 and December 31, 2018 was \$38.1 million and \$51.1 million, respectively.

The following table presents the amount of this non-controlling interest share of net loss:

	Three Months Ended September 30,		Nine Months Ended September 30,					
	2019	2018	2019	2018				
Non-controlling interest share of net loss	\$	5,030	\$	3,758	\$	12,885	\$	11,771

In connection with the Capital Call Agreement related to the Series 2016 Bonds, we, and an affiliate of our Manager, entered into a Fee and Support Agreement. The Fee and Support Agreement provides that the affiliate of the Manager is compensated for its guarantee of a portion of the obligations under the Standby Bond Purchase Agreement. This affiliate of the Manager received fees of \$1.7 million, which are amortized as interest expense to the earlier of the redemption date or February 13, 2020.

In connection with the amendment to the Jefferson Revolver (see Note 8), on December 20, 2018, our subsidiary and an affiliate of our Manager entered into an amended and restated Fee and Support Agreement, and our subsidiary issued a \$0.3 million promissory note to the affiliate of our Manager, as consideration for the fee payable pursuant to the amended and restated Fee and Support Agreement.

On June 21, 2018, we, through a wholly owned subsidiary, completed a private offering with several third parties (the "Holders") to tender their approximately 20% stake in Jefferson Terminal. We increased our majority interest in Jefferson Terminal in exchange for Class B Units of another wholly owned subsidiary, which provide the right to convert such Class B Units to a fixed amount of our shares, equivalent to approximately 1.9 million shares, at a Holder's request. We have the option to satisfy any exchange request by delivering either common shares or cash. The Holders are entitled to receive distributions equivalent to the distributions paid to our shareholders. This transaction resulted in a purchase of non-controlling interest shares. See Note 17 for details related to conversions during the period.

16. SEGMENT INFORMATION

Our reportable segments represent strategic business units comprised of investments in different types of transportation and infrastructure assets. We have four reportable segments which operate in the Equipment Leasing and Infrastructure businesses across several market sectors. Our reportable segments are (i) Aviation Leasing, (ii) Jefferson Terminal, (iii) Railroad, and (iv) Ports and Terminals. The Aviation Leasing segment consists of aircraft and aircraft engines held for lease and are typically held long-term. The Jefferson Terminal segment consists of a multi-modal crude oil and refined products terminal and other related assets. The Railroad segment consists of our CMQR railroad operations. The Ports and Terminals segment consists of Repauno, which is a 1,630 acre deep-water port located along the Delaware River with an underground storage cavern and multiple industrial development opportunities, and Long Ridge, which is a 1,660 acre multi-modal port located along the Ohio River with rail, dock, and multiple industrial development opportunities, including a power plant under construction.

FORTRESS TRANSPORTATION AND INFRASTRUCTURE INVESTORS LLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(Dollars in tables in thousands, unless otherwise noted)

Corporate and Other primarily consists of debt, unallocated company level general and administrative expenses, and management fees. Additionally, Corporate and Other includes (i) offshore energy related assets, which consists of vessels and equipment that support offshore oil and gas drilling and production which are typically subject to long-term operating leases and (ii) an investment in an unconsolidated entity engaged in the acquisition and leasing of shipping containers (on both an operating lease and finance lease basis).

During the first quarter of 2019, we updated our segment performance measure from Adjusted Net Income to Adjusted EBITDA (see definition below) as this is the primary performance measure that our Chief Operating Decision Maker ("CODM") utilizes to assess operational performance, as well as make resource and allocation decisions. In connection with the change in our performance measure, in accordance with ASC 280, we also assessed our reportable segments. We determined that our Offshore Energy and Shipping Containers segments no longer met the requirement as reportable segments and, accordingly, we have presented these operating segments, along with Corporate results, within Corporate and Other effective in the first quarter of 2019. All prior periods have been restated for historical comparison across segments.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies; however, financial information presented by segment includes the impact of intercompany eliminations. We evaluate investment performance for each reportable segment primarily based on net income attributable to shareholders and Adjusted EBITDA.

Adjusted EBITDA is defined as net income (loss) attributable to shareholders, adjusted (a) to exclude the impact of provision for (benefit from) income taxes, equity-based compensation expense, acquisition and transaction expenses, losses on the modification or extinguishment of debt and capital lease obligations, changes in fair value of non-hedge derivative instruments, asset impairment charges, incentive allocations, depreciation and amortization expense, and interest expense, (b) to include the impact of our pro-rata share of Adjusted EBITDA from unconsolidated entities, and (c) to exclude the impact of equity in earnings (losses) of unconsolidated entities and the non-controlling share of Adjusted EBITDA.

We believe that net income (loss) attributable to shareholders, as defined by GAAP, is the most appropriate earnings measurement with which to reconcile Adjusted EBITDA. Adjusted EBITDA should not be considered as an alternative to net income (loss) attributable to shareholders as determined in accordance with GAAP.

17. EARNINGS PER SHARE AND EQUITY

Basic earnings per common share ("EPS") is calculated by dividing net income attributable to shareholders by the weighted average number of common shares outstanding, plus any participating securities. Diluted EPS is calculated by dividing net income attributable to shareholders by the weighted average number of common shares outstanding, plus any participating securities and potentially dilutive securities. Potentially dilutive securities are calculated using the treasury stock method.

The calculation of basic and diluted EPS is presented below:

<i>(in thousands, except share and per share data)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2019	2018	2019	2018
Net income (loss)	\$ 20,676	\$ 723	\$ 26,673	\$ (15,059)
Less: Net loss attributable to non-controlling interests in consolidated subsidiaries	(4,995)	(3,855)	(12,950)	(19,904)
Net income attributable to shareholders	\$ 25,671	\$ 4,578	\$ 39,623	\$ 4,845
Weighted Average Common Shares Outstanding - Basic ⁽¹⁾	85,996,067	84,708,071	85,990,131	83,178,546
Weighted Average Common Shares Outstanding - Diluted ⁽¹⁾	86,005,604	84,709,656	86,013,539	83,179,181
Basic EPS	\$ 0.30	\$ 0.05	\$ 0.46	\$ 0.06
Diluted EPS	\$ 0.30	\$ 0.05	\$ 0.46	\$ 0.06

⁽¹⁾ The three and nine months ended September 30, 2019 includes 1.1 million equivalent participating securities which can be converted into a fixed amount of our shares.

For the three months ended September 30, 2019 and 2018, 165,232 and 6,793 shares, respectively, and for the nine months ended September 30, 2019 and 2018, 140,313 and 43,472 shares, respectively, have been excluded from the calculation of Diluted EPS because the impact would be anti-dilutive.

During the nine months ended September 30, 2019, we issued 26,125 common shares to certain directors as compensation.

During the nine months ended September 30, 2019, certain holders of Class B Units (see Note 15) converted 1,115,483 Class B Units in exchange for 826,124 common shares.

Preferred Shares

In September 2019, in a public offering, we issued 3,450,000 shares of 8.25% Fixed-to-Floating Rate Series A Cumulative Perpetual Redeemable Preferred Shares ("Series A Preferred Shares"), par value \$0.01 per share, with a liquidation preference of \$25.00 per share for net proceeds of approximately \$82.9 million. See Note 13 for information related to options issued to the Manager in connection with this offering.

(Dollars in tables in thousands, unless otherwise noted)

18. COMMITMENTS AND CONTINGENCIES

In the normal course of business we, and our subsidiaries, may be involved in various claims, legal proceedings, or may enter into contracts that contain a variety of representations and warranties and which provide general indemnifications. Within our offshore energy business, a lessee did not fulfill their obligation under their charter arrangement, therefore we are pursuing rights afforded to us under the charter and the range of potential losses against the obligation is \$0.0 million to \$3.3 million. Our maximum exposure under other arrangements is unknown as no additional claims have been made. We believe the risk of loss in connection with such arrangements is remote.

We have also entered into an arrangement with our non-controlling interest holder of Repauno, whereby the non-controlling interest holder may receive additional payments contingent upon the achievement of certain conditions, not to exceed \$15.0 million. We will account for such amounts when and if such conditions are achieved.

We have entered into an arrangement with the seller of Long Ridge, whereby the seller may receive additional payments contingent upon the achievement of certain conditions, not to exceed \$5.0 million. We will account for such amounts when and if such conditions are achieved.

19. SUBSEQUENT EVENTS

On October 31, 2019, our Board of Directors declared a cash dividend on our common shares and eligible participating securities of \$0.33 per share for the quarter ended September 30, 2019, payable on November 26, 2019 to the holders of record on November 15, 2019.

On October 31, 2019, our Board of Directors also declared a cash dividend on the Series A Preferred Shares of \$0.53 per share, payable on December 16, 2019 to the holders of record on December 2, 2019.

On October 31, 2019, our subsidiary entered into an agreement to purchase the remaining 50% interest in JGP from the JV partner for a purchase price of approximately \$29 million. We expect the transaction to close during the fourth quarter of 2019.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help you understand Fortress Transportation and Infrastructure Investors LLC (the "Company," "we," "our" or "us"). Our MD&A should be read in conjunction with our unaudited consolidated financial statements and the accompanying notes, and with Part II, Item 1A, "Risk Factors" included elsewhere in this Quarterly Report on Form 10-Q.

Overview

We own and acquire high quality infrastructure and related equipment that is essential for the transportation of goods and people globally. We target assets that, on a combined basis, generate strong cash flows with potential for earnings growth and asset appreciation. We believe that there are a large number of acquisition opportunities in our markets, and that our Manager's expertise and business and financing relationships, together with our access to capital, will allow us to take advantage of these opportunities. We are externally managed by FIG LLC (the "Manager"), an affiliate of Fortress Investment Group LLC ("Fortress"), which has a dedicated team of experienced professionals focused on the acquisition of transportation and infrastructure assets since 2002. As of September 30, 2019, we had total consolidated assets of \$3.1 billion and total equity of \$1.1 billion.

Operating Segments

Our operations consist of two primary strategic business units – Infrastructure and Equipment Leasing. Our Infrastructure Business acquires long-lived assets that provide mission-critical services or functions to transportation networks and typically have high barriers to entry. We target or develop operating businesses with strong margins, stable cash flows and upside from earnings growth and asset appreciation driven by increased use and inflation. Our Equipment Leasing Business acquires assets that are designed to carry cargo or people. Transportation equipment assets are typically long-lived, moveable and leased by us on either operating leases or finance leases to companies that provide transportation services. Our leases generally provide for long-term contractual cash flow with high cash-on-cash yields and include structural protections to mitigate credit risk.

Our reportable segments are comprised of interests in different types of infrastructure and equipment leasing assets. We currently conduct our business through the following four reportable segments: (i) Aviation Leasing, which is within the Equipment Leasing Business, and (ii) Jefferson Terminal, (iii) Railroad and (iv) Ports and Terminals, which together comprise our Infrastructure Business. The Aviation Leasing segment consists of aircraft and aircraft engines held for lease and are typically held long-term. The Jefferson Terminal segment consists of a multi-modal crude and refined products terminal and other related assets which were acquired in 2014. The Railroad segment consists of our Central Maine and Quebec Railway ("CMQR") short line railroad operations also acquired in 2014. The Ports and Terminals segment consists of Repauno, acquired in 2016, a 1,630 acre deep-water port located along the Delaware River with an underground storage cavern and multiple industrial development opportunities, and Long Ridge, acquired in June 2017, a 1,660 acre multi-modal port located along the Ohio River with rail, dock, and multiple industrial development opportunities, including a power plant under construction.

Corporate and Other primarily consists of debt, unallocated corporate general and administrative expenses, and management fees. Additionally, Corporate and Other also includes the former Offshore Energy and Shipping Containers segments composed of (i) offshore energy related assets which consists of vessels and equipment that support offshore oil and gas activities and are typically subject to long-term operating leases and (ii) an investment in an unconsolidated entity engaged in the leasing of shipping containers on both an operating lease and finance lease basis.

During the first quarter of 2019, we updated our segment performance measure from Adjusted Net Income to Adjusted EBITDA (see definition below) as this is the primary performance measure that our Chief Operating Decision Maker ("CODM") utilizes to assess operational performance, as well as make resource and allocation decisions. In connection with the change in our performance measure, in accordance with ASC 280, we also assessed our reportable segments. We determined that our Offshore Energy and Shipping Containers segments no longer met the requirement as reportable segments and, accordingly, we have presented these operating segments, along with Corporate results, within Corporate and Other effective in the first quarter of 2019. All prior periods have been restated for historical comparison across segments.

Our reportable segments are comprised of investments in different types of transportation infrastructure and equipment. Each segment requires different investment strategies. The accounting policies of the segments are the same as those described in the summary of significant accounting policies; however, financial information presented by segment includes the impact of intercompany eliminations.

Our Manager

On December 27, 2017, SoftBank Group Corp. ("SoftBank") announced that it completed its previously announced acquisition of Fortress (the "SoftBank Merger"). In connection with the Softbank Merger, Fortress operates within SoftBank as an independent business headquartered in New York.

Results of Operations

Adjusted EBITDA (Non-GAAP)

The CODM utilizes Adjusted EBITDA as the key performance measure. This performance measure provides the CODM with the information necessary to assess operational performance, as well as make resource and allocation decisions.

Adjusted EBITDA is defined as net income (loss) attributable to shareholders, adjusted (a) to exclude the impact of provision for (benefit from) income taxes, equity-based compensation expense, acquisition and transaction expenses, losses on the modification or extinguishment of debt and capital lease obligations, changes in fair value of non-hedge derivative instruments, asset impairment charges, incentive allocations, depreciation and amortization expense, and interest expense, (b) to include the impact of our pro-rata share of Adjusted EBITDA from unconsolidated entities, and (c) to exclude the impact of equity in earnings (losses) of unconsolidated entities and the non-controlling share of Adjusted EBITDA.

Comparison of the three and nine months ended September 30, 2019 and 2018

The following table presents our consolidated results of operations:

<i>(in thousands)</i>	Three Months Ended September 30,			Nine Months Ended September 30,

⁽¹⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) depreciation and amortization expense of \$43,744 and \$34,422, (ii) lease intangible amortization of \$1,072 and \$1,911 and (iii) amortization for lease incentives of \$5,648 and \$2,829, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) depreciation and amortization expense of \$125,877 and \$96,853, (ii) lease intangible amortization of \$5,736 and \$5,913 and (iii) amortization for lease incentives of \$18,272 and \$11,716, respectively.

⁽²⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) net loss of \$(1,096) and \$(483), (ii) interest expense of \$30 and \$97 and (iii) depreciation and amortization expense of \$265 and \$788, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) net loss of \$(1,793) and \$(734), (ii) interest expense of \$101 and \$303 and (iii) depreciation and amortization expense of \$797 and \$816, respectively.

⁽³⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) equity based compensation of \$85 and \$19, (ii) provision for income taxes of \$27 and \$2, (iii) interest expense of \$846 and \$1,512, (iv) depreciation and amortization expense of \$1,325 and \$1,809, and (v) changes in fair value of non-hedge derivative instruments of \$785 and \$221, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) equity based compensation of \$220 and \$96, (ii) provision for income taxes of \$73 and \$10, (iii) interest expense of \$2,854 and \$3,823, (iv) depreciation and amortization expense of \$3,834 and \$5,097 and (v) changes in fair value of non-hedge derivative instruments of \$1,261 and \$149, respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenues increased \$61.1 million, primarily due to higher revenues in the Jefferson Terminal and Aviation Leasing segments.

In Equipment Leasing, lease income increased \$9.2 million, primarily driven by an increase in acquired assets on lease in the Aviation Leasing segment. Maintenance revenue increased \$7.9 million due to an increase in the number of aircraft and engines on lease.

In Infrastructure, crude marketing revenue increased \$35.2 million. During the third quarter of 2018, Jefferson Terminal initiated a strategy in Canada sourcing crude from producers, arranging logistics to Jefferson Terminal and marketing crude to third parties. Terminal services revenue increased \$9.3 million which primarily reflects increases of approximately (i) \$7.0 million due to increased activity and storage capacity at Jefferson Terminal and (ii) \$2.3 million due to increased activity at Long Ridge.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenues increased \$203.9 million, primarily due to higher revenues in the Jefferson Terminal, Aviation Leasing and Ports and Terminals segments.

In Equipment Leasing, lease income increased \$37.6 million, primarily driven by an increase in acquired assets on lease in the Aviation Leasing segment. Maintenance revenue increased \$15.6 million due to an increase in the number of aircraft and engines on lease.

In Infrastructure, crude marketing revenue increased \$125.2 million. During the third quarter of 2018, Jefferson Terminal initiated a strategy in Canada sourcing crude from producers, arranging logistics to Jefferson Terminal and marketing crude to third parties. Terminal services revenue increased \$20.8 million which primarily reflects increases of approximately (i) \$15.6 million due to increased activity and storage capacity at Jefferson Terminal and (ii) \$5.2 million due to increased activity at Long Ridge.

Expenses

Comparison of the three months ended September 30, 2019 and 2018

Total expenses increased \$77.3 million, primarily due to higher (i) operating expenses, (ii) interest expense and (iii) depreciation and amortization.

Operating expenses increased \$47.7 million, primarily due to increases in:

- cost of sales of \$42.7 million primarily due to costs associated with crude marketing at Jefferson Terminal;
- facility operations of \$1.8 million primarily due to increased activity at Jefferson Terminal; and
- compensation and benefits of \$1.5 million primarily due to increased headcount and stock compensation in the Jefferson Terminal, Ports and Terminals and Railroad segments.

Interest expense increased \$10.3 million due to an increase in our average outstanding debt of approximately \$620.9 million, which primarily consists of the (i) 2025 Notes of \$450.0 million, (ii) LREG Credit Agreement of \$87.1 million, (iii) 2022 Notes of \$44.4 million, (iv) DRP Revolver of \$25.0 million and (v) Revolving Credit Facility of \$20.0 million.

Depreciation and amortization increased \$9.3 million, primarily due to additional assets acquired in the Aviation Leasing segment and assets placed into service at Long Ridge and Jefferson Terminal.

Comparison of the nine months ended September 30, 2019 and 2018

Total expenses increased \$221.3 million, primarily due to higher (i) operating expenses, (ii) interest expense and (iii) depreciation and amortization.

Operating expenses increased \$147.2 million, primarily due to increases in:

- cost of sales of \$133.1 million primarily due to costs associated with crude marketing at Jefferson Terminal;
- compensation and benefits of \$5.3 million primarily due to increased headcount and stock compensation in the Jefferson Terminal, Ports and Terminals and Railroad segments; and
- facility operations of \$3.8 million primarily due to increased activity at Jefferson Terminal and Long Ridge and an increase in costs associated with the car cleaning business, which commenced in 2019, in the Railroad segment.

Interest expense increased \$32.4 million due to an increase in our average outstanding debt of approximately \$702.1 million, which primarily consists of the (i) 2025 Notes of \$383.3 million, (ii) 2022 Notes of \$138.5 million, (iii) LREG Credit Agreement of \$68.0 million, (iv) Revolving Credit Facility of \$67.2 million, (v) Jefferson Revolver of \$33.4 million and (vi) DRP Revolver of \$16.9 million.

Depreciation and amortization increased \$29.0 million, primarily due to additional assets acquired in the Aviation Leasing segment and assets placed into service at Long Ridge and Jefferson Terminal.

Other Income (Expense)

Total other income increased \$36.7 million and \$56.7 million during the three and nine months ended September 30, 2019, primarily due to a net increase in gain on sale of \$36.8 million and \$56.2 million, respectively, in the Aviation Leasing segment.

Net Income Attributable to Shareholders

Net income attributable to shareholders increased \$21.1 million and \$34.8 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes discussed above and a benefit from income taxes recognized during the nine months ended September 30, 2019.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA increased \$55.4 million and \$115.5 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above, depreciation and amortization and interest expense.

Aviation Leasing Segment

As of September 30, 2019, in our Aviation Leasing segment, we own and manage 221 aviation assets, consisting of 69 commercial aircraft and 152 engines.

As of September 30, 2019, 69 of our commercial aircraft and 112 of our engines were leased to operators or other third parties. Aviation assets currently off lease are either undergoing repair and/or maintenance, being prepared to go on lease or held in short term storage awaiting a future lease. Our aviation equipment was approximately 92% utilized as of September 30, 2019, based on the equity value of our on-hire leasing equipment as a percentage of the total equity value of our aviation leasing equipment. Our aircraft currently have a weighted average remaining lease term of 34 months, and our engines currently on-lease have an average remaining lease term of 10 months. The table below provides additional information on the assets in our Aviation Leasing segment:

Aviation Assets	Widebody	Narrowbody	Total
Aircraft			
Assets at January 1, 2019	14	56	70
Purchases	4	10	14
Sales	(1)	(4)	(5)
Transfers	(4)	(6)	(10)
Assets at September 30, 2019	13	56	69
Engines			
Assets at January 1, 2019	78	64	142
Purchases	18	6	24
Sales	(12)	(25)	(37)
Transfers	11	12	23
Assets at September 30, 2019	95	57	152

⁽¹⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) depreciation expense of \$33,911 and \$26,343, (ii) lease intangible amortization of \$1,072 and \$1,911 and (iii) amortization for lease incentives of \$5,648 and \$2,829, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) depreciation expense of \$97,183 and \$73,031, (ii) lease intangible amortization of \$5,736 and \$5,913 and (iii) amortization for lease incentives of \$18,272 and \$11,716, respectively.

⁽²⁾ Includes Aviation Leasing's proportionate share of the unconsolidated entities' net income adjusted for the excluded and included items detailed in the table above, for which there were no adjustments.

⁽³⁾ Includes depreciation expense of \$0 and \$172 for the nine months ended September 30, 2019 and 2018, respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenue increased \$16.5 million driven by higher lease income and maintenance revenue.

- Lease income increased \$9.1 million mainly due to an increase in (i) aircraft lease income of \$7.6 million primarily driven by the addition of 22 aircraft on lease and (ii) engine lease income of \$1.5 million primarily driven by an additional 15 revenue generating engines.
- Maintenance revenue increased \$7.9 million due to an increase in the number of aircraft and engines on lease.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenue increased \$53.1 million driven by higher lease income and maintenance revenue.

- Lease income increased \$36.5 million mainly due to an increase in (i) aircraft lease income of \$27.0 million primarily driven by the addition of 23 aircraft on lease and (ii) engine lease income of \$9.5 million primarily driven by an additional 24 revenue generating engines.
- Maintenance revenue increased \$15.6 million due to an increase in the number of aircraft and engines on lease.
- Finance lease income increased \$1.2 million due to income earned from aircraft classified as a finance lease.

Expenses

Comparison of the three months ended September 30, 2019 and 2018

Total expenses increased \$7.9 million primarily due to an increase in depreciation and amortization expense and operating expenses.

- Depreciation and amortization expense increased \$7.6 million driven by additional aircraft and engines owned and on lease.
- Operating expenses increased \$0.4 million primarily as a result of an increase in professional fees of \$0.2 million and other operating expenses of \$0.2 million.

Comparison of the nine months ended September 30, 2019 and 2018

Total expenses increased \$27.8 million primarily due to an increase in depreciation and amortization expense and operating expenses.

- Depreciation and amortization expense increased \$24.2 million driven by additional aircraft and engines owned and on lease.
- Operating expenses increased \$3.9 million primarily as a result of an increase in (i) bad debt expense of \$1.5 million relating to an engine loss receivable deemed uncollectible due to bankruptcy, (ii) shipping and storage fees of \$1.3 million due to the positioning of our assets for lease, (iii) repairs and maintenance expenses of \$0.7 million and (iii) other operating expenses of \$0.4 million.

Other Income

Total other income increased \$36.2 million during the three months ended September 30, 2019 primarily due to an increase of \$36.8 million in gain on the sale of leasing equipment in 2019 partially offset due to a decrease of \$0.7 million in Aviation Leasing's proportionate share of the unconsolidated entities' net income.

Total other income increased \$55.4 million during the nine months ended September 30, 2019 primarily due to an increase of \$56.2 million in gain on the sale of leasing equipment in 2019 partially offset due to a decrease of \$0.8 million in Aviation Leasing's proportionate share of the unconsolidated entities' net income.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA increased \$54.3 million and \$111.1 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above and higher depreciation and amortization for the additional aircraft and engines owned and on lease.

Jefferson Terminal Segment

Less: Non-controlling share of Adjusted EBITDA ⁽²⁾	(2,878)	(3,510)	632	(7,511)	(8,846)	1,335
Adjusted EBITDA (non-GAAP)	\$ (2,112)	\$ (4,064)	\$ 1,952	\$ (5,965)	\$ (10,803)	\$ 4,838

⁽¹⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) net loss of \$(162) and \$(349) and (ii) depreciation and amortization expense of \$265 and \$788, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) net loss of \$(363) and \$(436) and (ii) depreciation and amortization expense of \$797 and \$788, respectively.

⁽²⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) equity-based compensation of \$57 and \$17, (ii) provision for income taxes of \$12 and \$2, (iii) interest expense of \$825 and \$1,498, (iv) changes in fair value of non-hedge derivative instruments of \$785 and \$221 and (v) depreciation and amortization expense of \$1,199 and \$1,772, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) equity-based compensation of \$172 and \$88, (ii) provision for income taxes of \$38 and \$10, (iii) interest expense of \$2,599 and \$3,780, (iv) changes in fair value of non-hedge derivative instruments of \$1,261 and \$149 and (v) depreciation and amortization expense of \$3,441 and \$4,819, respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenues increased \$42.7 million primarily due to crude marketing revenue of \$35.2 million. During the third quarter of 2018, Jefferson Terminal initiated a strategy in Canada sourcing crude from producers, arranging logistics to Jefferson Terminal and marketing crude to third parties. Additionally, terminal services revenue increased \$7.0 million primarily due to increased activity and storage capacity.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenues increased \$142.4 million primarily due to crude marketing revenue of \$125.2 million. During the third quarter of 2018, Jefferson Terminal initiated a strategy in Canada sourcing crude from producers, arranging logistics to Jefferson Terminal and marketing crude to third parties. Additionally, terminal services revenue increased \$15.6 million primarily due to increased activity and storage capacity.

Expenses

Comparison of the three months ended September 30, 2019 and 2018

Total expenses increased \$46.2 million primarily due to higher operating expenses of \$45.8 million, which primarily reflected higher costs associated with crude marketing.

Comparison of the nine months ended September 30, 2019 and 2018

Total expenses increased \$138.2 million primarily due to higher operating expenses of \$136.2 million, which primarily reflected higher costs associated with crude marketing.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA increased \$2.0 million and \$4.8 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above, changes in the fair value of non-hedge derivative instruments and depreciation and amortization.

Railroad Segment

The following table presents our results of operations:

<i>(in thousands)</i>	Three Months Ended September 30,			Nine Months Ended September 30,

Less: Non-controlling share of Adjusted EBITDA ⁽¹⁾	(140)	(53)	(87)	(376)	(157)	(219)
Adjusted EBITDA (non-GAAP)	\$ 1,901	\$ 699	\$ 1,202	\$ 4,063	\$ 5,022	\$ (959)

⁽¹⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) equity-based compensation of \$28 and \$2, (ii) interest expense of \$33 and \$14, (iii) provision for income taxes of \$15 and \$0 and (iv) depreciation and amortization expense of \$64 and \$37, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) equity-based compensation of \$44 and \$8, (ii) interest expense of \$96 and \$43, (iii) provision for income taxes of \$35 and \$0 and (iv) depreciation and amortization expense of \$201 and \$106, respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenues increased \$1.3 million which primarily reflects an increase in freight transportation revenue of \$0.8 million, due to an overall increase in carloads and increased contract repair revenue.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenues increased \$2.0 million primarily due to an increase in switching and other rail service revenue of \$1.9 million relating to increased contract repair revenue.

Expenses

Total expenses increased \$0.4 million and \$3.9 million during the three and nine months ended September 30, 2019, respectively, primarily due to higher operating expenses. These increases primarily reflect additional operating costs resulting from the car cleaning business, which commenced in 2019, and a credit for certain tax benefits taken in 2018 which were not repeated in 2019.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA increased \$1.2 million and decreased \$1.0 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above.

Ports and Terminals

The following table presents our results of operations:

<i>(in thousands)</i>	Three Months Ended September 30,			Nine Months Ended September 30,

Less: Equity in earnings of unconsolidated entities	—	—	—	—	—	—
Less: Non-controlling share of Adjusted EBITDA ⁽¹⁾	44	—	44	(87)	—	(87)
Adjusted EBITDA (non-GAAP)	\$ (927)	\$ 55	\$ (982)	\$ (2,242)	\$ (2,790)	\$ 548

⁽¹⁾ Includes the following items for the three and nine months ended September 30, 2019: (i) equity-based compensation of \$0 and \$(4), (ii) interest expense of \$41 and \$(71) and (iii) depreciation and amortization expense of \$3 and \$(12), respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenue increased \$0.7 million primarily due to an increase in natural gas sales at Long Ridge.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenue increased \$6.6 million primarily due to terminal services revenue of \$5.2 million and other revenue of \$1.6 million.

The increase in terminal services revenue primarily reflects higher transloading revenue of \$5.5 million at Long Ridge.

The increase in other revenue is primarily due to higher oil and gas related activity of \$1.1 million at Long Ridge.

Expenses

Comparison of the three months ended September 30, 2019 and 2018

Total expenses increased \$3.1 million primarily due to higher operating expenses of \$1.8 million and depreciation and amortization of \$0.8 million.

The increase in operating expenses primarily reflects increases in (i) operating costs of \$0.5 million for proved gas properties at Long Ridge that were previously being capitalized, (ii) compensation and benefits of \$0.5 million due to additional headcount and (iii) \$0.2 million of repairs and maintenance expenses due to increased activity.

The increase in depreciation and amortization is primarily due to new oil and gas related assets placed into service at Long Ridge.

Comparison of the nine months ended September 30, 2019 and 2018

Total expenses increased \$9.7 million primarily due to higher operating expenses of \$6.3 million and depreciation and amortization of \$2.8 million.

The increase in operating expenses primarily reflects higher (i) facility operations and repairs and maintenance of \$2.0 million due to increased activity at Long Ridge, (ii) cost of sales of \$1.2 million related to the sale of butane at Repauno, (iii) compensation and benefits of \$1.3 million due to additional headcount for Ports and Terminals, (iv) operating costs of \$1.1 million for proved gas properties at Long Ridge that were previously being capitalized and (v) \$0.7 million increase in professional fees and insurance for Ports and Terminals.

The increase in depreciation and amortization is primarily due to assets placed into service at Long Ridge.

Other Income

Total other income decreased \$0.6 million during the three months ended September 30, 2019 primarily due to an unrealized loss of \$0.6 million on our electricity derivatives.

Total other income increased \$2.1 million during the nine months ended September 30, 2019 primarily due to an unrealized gain of \$1.9 million on our electricity derivatives.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA decreased \$1.0 million and increased \$0.5 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above.

Corporate and Other

Adjusted EBITDA (non-GAAP)	\$ (11,478)	\$ (10,371)	\$ (1,107)	\$ (25,872)	\$ (25,809)	\$ (63)

⁽¹⁾ Includes the following items for the three months ended September 30, 2019 and 2018: (i) net (loss) income of \$(49) and \$58 and (ii) interest expense of \$30 and \$97, respectively. Includes the following items for the nine months ended September 30, 2019 and 2018: (i) net (loss) income of \$(102) and \$244, (ii) interest expense of \$101 and \$303 and (iii) depreciation and amortization expense of \$0 and \$28, respectively.

⁽²⁾ Includes the following items for the three and nine months ended September 30, 2019: (i) interest expense of \$29 and \$88 and (ii) depreciation and amortization expense of \$65 and \$180, respectively.

Revenues

Comparison of the three months ended September 30, 2019 and 2018

Total revenues decreased \$0.1 million which primarily reflects a decrease in finance lease income as one of our vessels was put on nonaccrual status due to a casualty event.

Comparison of the nine months ended September 30, 2019 and 2018

Total revenues decreased \$0.1 million which primarily reflects a decrease in finance lease income as one of our vessels was put on nonaccrual status due to a casualty event, partially offset by higher lease income due to a vessel being on hire for the entire period in 2019 as compared to 2018.

Expenses

Comparison of the three months ended September 30, 2019 and 2018

Total expenses increased \$19.7 million primarily due to higher (i) interest expense of \$10.1 million, (ii) acquisition and transaction expenses of \$3.9 million and (iii) management fees and incentive allocation to affiliate of \$3.5 million.

The increase in interest expense reflects an increase in our average outstanding debt of approximately \$508.2 million, which primarily consists of the (i) 2025 Notes of \$450.0 million, (ii) 2022 Notes of \$44.4 million and (iii) Revolving Credit Facility of \$20.0 million.

The increase in acquisition and transaction expenses primarily reflects a higher reimbursement to the Manager due to an increase in transaction volume compared to 2018.

The increase in management fees and incentive allocation to affiliate reflects incentive fees paid to the Manager related to gains on sale of equipment recognized during the period.

Comparison of the nine months ended September 30, 2019 and 2018

Total expenses increased \$41.7 million primarily due to higher (i) interest expense of \$31.3 million, (ii) management fees and incentive allocation to affiliate of \$4.8 million and (iii) acquisition and transaction expenses of \$4.6 million.

The increase in interest expense reflects an increase in our average outstanding debt of approximately \$582.8 million, which consists of the (i) 2025 Notes of \$383.3 million, (ii) 2022 Notes of \$138.5 million and (iii) Revolving Credit Facility of \$67.2 million.

The increase in management fees and incentive allocation to affiliate reflects incentive fees paid to the Manager related to gains on sale of equipment recognized during the period.

The increase in acquisition and transaction expenses primarily reflects a higher reimbursement to the Manager due to an increase in transaction volume compared to 2018.

Other Income

Other income increased \$1.0 million and \$0.7 million during the three and nine months ended September 30, 2019, respectively, primarily due to a gain of approximately \$1.0 million from casualty insurance proceeds received on one of our vessels.

Adjusted EBITDA (Non-GAAP)

Adjusted EBITDA decreased \$1.1 million and \$0.1 million during the three and nine months ended September 30, 2019, respectively, primarily due to the changes noted above.

Liquidity and Capital Resources

Our principal uses of liquidity have been and continue to be (i) acquisitions of transportation infrastructure and equipment, (ii) dividends to our shareholders and holders of eligible participating securities, (iii) expenses associated with our operating activities, and (iv) debt service obligations associated with our investments.

- Cash used for the purpose of making investments was \$590.7 million and \$533.5 million during the nine months ended September 30, 2019 and 2018, respectively.
- Dividends to shareholders and holders of eligible participating securities were \$85.2 million and \$82.6 million during the nine months ended September 30, 2019 and 2018, respectively.
- Uses of liquidity associated with our operating expenses are captured on a net basis in our cash flows from operating activities. Uses of liquidity associated with our debt obligations are captured in our cash flows from financing activities.

Our principal sources of liquidity to fund these uses have been and continue to be (i) revenues from our transportation infrastructure and equipment assets (including finance lease collections and maintenance reserve collections) net of operating expenses, (ii) proceeds from borrowings or the issuance of securities and (iii) proceeds from asset sales.

- Cash flows from operating activities, plus the principal collections on finance leases and maintenance reserve collections were \$155.2 million and \$128.9 million during the nine months ended September 30, 2019 and 2018, respectively.
- During the nine months ended September 30, 2019, additional borrowings were obtained in connection with the 2025 Notes of \$148.7 million, 2022 Notes of \$147.8 million, Revolving Credit Facility of \$105.0 million, LREG Credit Agreement of \$104.4 million, DRP Revolver of \$25.0 million, Jefferson Revolver of \$23.2 million and CMQR Credit Agreement of \$15.6 million. We made total principal repayments of \$218.9 million, primarily relating to the Revolving Credit Facility of \$175.0 million, Jefferson Revolver of \$23.0 million and CMQR Credit Agreement of \$14.4 million. During the nine months ended September 30, 2018, additional borrowings were obtained in connection with the 2025 Notes of \$291.0 million, Revolving Credit Facility of \$150.0 million, 2022 Notes of \$100.0 million, Jefferson Revolver of \$49.5 million, net of financing costs, and the CMQR Credit Agreement of \$24.8 million. We made total principal repayments of \$181.9 million, primarily relating to the Revolving Credit Facility, CMQR Credit Agreement and FTAI Pride Credit Agreement.
- Proceeds from the sale of assets were \$166.3 million and \$30.5 million during the nine months ended September 30, 2019 and 2018, respectively.
- Proceeds from the issuance of common shares was \$128.5 million, net of issuance costs of \$2.1 million, during the nine months ended September 30, 2018. There were no issuances of common shares in 2019.
- Proceeds from the issuance of preferred shares was \$82.9 million, net of issuance costs, during the nine months ended September 30, 2019.

We are currently evaluating several potential Infrastructure and Equipment Leasing transactions, which could occur within the next 12 months. However, as of the date of this filing, none of these pipeline transactions or negotiations are definitive or included within our planned liquidity needs. We cannot assure if or when any such transaction will be consummated or the terms of any such transaction.

We have a dividend reinvestment plan in place which allows shareholders to automatically reinvest dividends in our common shares. The plan became effective on February 24, 2017.

Historical Cash Flow

Comparison of the nine months ended September 30, 2019 and 2018

The following table compares the historical cash flow for the nine months ended September 30, 2019 and 2018:

(in thousands)	Nine Months Ended September 30,	
	2019	2018
Cash Flow Data:		
Net cash provided by operating activities	\$ 92,713	\$ 86,415
Net cash used in investing activities	(409,853)	(501,606)
Net cash provided by financing activities	346,887	507,885

Net cash provided by operating activities increased \$6.3 million primarily due to an increase in net income of \$41.7 million and adjustments to reconcile net income which include increases in (i) depreciation and amortization of \$29.0 million and (ii) amortization of lease intangibles and incentives of \$6.4 million. The overall increase was partially offset by decreases in (iii) gain on sale of equipment of \$56.2 million and (iv) changes in accounts receivable, other assets and other liabilities due to the continued expansion of operations across all business segments.

Net cash used in investing activities decreased \$91.8 million primarily due to (i) proceeds from sale of leasing equipment of \$135.9 million, (ii) a decrease in acquisition of leasing equipment of \$43.0 million and (iii) principal collections on finance leases of \$12.4 million. The overall decrease was partially offset by (iv) the acquisition of property, plant and equipment of \$65.2 million, (v) purchase deposits for acquisitions of \$28.5 million and (vi) an additional investment in unconsolidated subsidiaries of \$12.4 million.

Net cash provided by financing activities decreased \$161.0 million primarily due to decreases in (i) proceeds from the issuance of common shares net of issuance costs of \$127.7 million, (ii) a decrease in proceeds from debt of \$46.5 million, (iii) repayment of debt of \$37.1 million and (iv) payment of deferred financing costs of \$28.9 million. The overall decrease was partially offset by proceeds from the issuance of preferred shares net of issuance costs of \$82.9 million.

Funds Available for Distribution (Non-GAAP)

We use Funds Available for Distribution ("FAD") in evaluating our ability to meet our stated dividend policy. FAD is not a financial measure in accordance with GAAP. The GAAP measure most directly comparable to FAD is net cash provided by operating activities. We believe FAD is a useful metric for investors and analysts for similar purposes.

We define FAD as: net cash provided by operating activities plus principal collections on finance leases, proceeds from sale of assets, and return of capital distributions from unconsolidated entities, less required payments on debt obligations and capital distributions to non-controlling interest, and excludes changes in working capital. The following table sets forth a reconciliation of Net Cash Provided by Operating Activities to FAD:

(in thousands)	Nine Months Ended September 30,	
	2019	2018
Net Cash Provided by Operating Activities	\$ 92,713	\$ 86,415
Add: Principal Collections on Finance Leases	13,094	658
Add: Proceeds from Sale of Assets	166,297	30,487
Add: Return of Capital Distributions from Unconsolidated Entities	1,424	872
Less: Required Payments on Debt Obligations ⁽¹⁾	(29,513)	(6,231)
Less: Capital Distributions to Non-Controlling Interest	—	—
Exclude: Changes in Working Capital	33,803	11,735
Funds Available for Distribution (FAD)	\$ 277,818	\$ 123,936

⁽¹⁾ Required payments on debt obligations for the nine months ended September 30, 2019 exclude repayments of \$175,000 for the Revolving Credit Facility and \$14,421 for the CMQR Credit Agreement, and for the nine months ended September 30, 2018 exclude repayments of \$150,000 for the Revolving Credit Facility and \$25,625 for the CMQR Credit Agreement, all of which were voluntary refinancings as repayments of these amounts were not required at such time.

Limitations

FAD is subject to a number of limitations and assumptions and there can be no assurance that we will generate FAD sufficient to meet our intended dividends. FAD has material limitations as a liquidity measure because such measure excludes items that are required elements of our net cash provided by operating activities as described below. FAD should not be considered in isolation nor as a substitute for analysis of our results of operations under GAAP, and it is not the only metric that should be considered in evaluating our ability to meet our stated dividend policy. Specifically:

- FAD does not include equity capital called from our existing limited partners, proceeds from any debt issuance or future equity offering, historical cash and cash equivalents and expected investments in our operations.
- FAD does not give pro forma effect to prior acquisitions, certain of which cannot be quantified.
- While FAD reflects the cash inflows from sale of certain assets, FAD does not reflect the cash outflows to acquire assets as we rely on alternative sources of liquidity to fund such purchases.
- FAD does not reflect expenditures related to capital expenditures, acquisitions and other investments as we have multiple sources of liquidity and intends to fund these expenditures with future incurrences of indebtedness, additional capital contributions and/or future issuances of equity.
- FAD does not reflect any maintenance capital expenditures necessary to maintain the same level of cash generation from our capital investments.
- FAD does not reflect changes in working capital balances as management believes that changes in working capital are primarily driven by short term timing differences, which are not meaningful to our distribution decisions.
- Management has significant discretion to make distributions, and we are not bound by any contractual provision that requires us to use cash for distributions.

If such factors were included in FAD, there can be no assurance that the results would be consistent with our presentation of FAD.

Debt Obligations

Refer to Note 8 of the Consolidated Financial Statements for additional information.

Contractual Obligations

The following table summarizes our future obligations, by period due, as of September 30, 2019, under our various contractual obligations and commitments. We had no off-balance sheet arrangements as of September 30, 2019.

<i>(in thousands)</i>	Remainder of 2019	2020	2021	2022	2023	Thereafter	Total
FTAI Pride Credit Agreement	\$ 1,563	\$ 41,493	\$ —	\$ —	\$ —	\$ —	\$ 43,056
CMQR Credit Agreement	—	—	—	23,275	—	—	23,275
Revolving Credit Facility	—	—	—	30,000	—	—	30,000
Jefferson Revolver	—	—	50,000	—	—	—	50,000
DRP Revolver	—	—	25,000	—	—	—	25,000
LREG Credit Agreement	—	—	—	—	—	104,438	104,438
Series 2012 Bonds	—	1,810	1,960	2,120	2,295	31,365	39,550
Series 2016 Bonds	—	144,200	—	—	—	—	144,200
Senior Notes due 2022	—	—	—	700,000	—	—	700,000
Senior Notes due 2025	—	—	—	—	—	450,000	450,000
Total principal payments on loans and bonds payable	<u>1,563</u>	<u>187,503</u>	<u>76,960</u>	<u>755,395</u>	<u>2,295</u>	<u>585,803</u>	<u>1,609,519</u>
Total estimated interest payments ⁽¹⁾	27,337	96,020	90,635	50,360	39,765	98,542	402,659
Obligation to third-party	—	9,283	—	—	—	—	9,283
Operating lease obligations	2,446	6,190	4,820	4,067	3,150	108,029	128,702
Capital lease obligations	105	406	272	147	31	—	961
	<u>29,888</u>	<u>111,899</u>	<u>95,727</u>	<u>54,574</u>	<u>42,946</u>	<u>206,571</u>	<u>541,605</u>
Total contractual obligations	<u>\$ 31,451</u>	<u>\$ 299,402</u>	<u>\$ 172,687</u>	<u>\$ 809,969</u>	<u>\$ 45,241</u>	<u>\$ 792,374</u>	<u>\$ 2,151,124</u>

⁽¹⁾ Estimated interest rates as of September 30, 2019.

We expect to meet our future short-term liquidity requirements through cash on hand, unused borrowing capacity or future financings and net cash provided by our current operations. We expect that our operating subsidiaries will generate sufficient cash flow to cover operating expenses and the payment of principal and interest on our indebtedness as they become due. We may elect to meet certain long-term liquidity requirements or to continue to pursue strategic opportunities through utilizing cash on hand, cash generated from our current operations and the issuance of securities in the future. Management believes adequate capital and borrowings are available from various sources to fund our commitments to the extent required.

Application of Critical Accounting Policies

Goodwill—Goodwill includes the excess of the purchase price over the fair value of the net tangible and intangible assets associated with the acquisitions of CMQR and Jefferson Terminal. The carrying amount of goodwill is approximately \$116.6 million as of both September 30, 2019 and December 31, 2018.

We review the carrying values of goodwill at least annually to assess impairment since these assets are not amortized. An annual impairment review is conducted as of October 1st of each year. Additionally, we review the carrying value of goodwill whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. The determination of fair value involves significant management judgment.

For an annual goodwill impairment assessment, an optional qualitative analysis may be performed. If the option is not elected or if it is more likely than not that the fair value of a reporting unit is less than its carrying amount, then a two-step goodwill impairment test is performed to identify potential goodwill impairment and measure an impairment loss. A qualitative analysis was not elected for the year ended December 31, 2018.

The first step of an impairment assessment compares the fair value of a respective reporting unit with its carrying amount, including goodwill. The estimate of fair value of the respective reporting unit is based on the best information available as of the date of assessment, which primarily incorporates certain factors including our assumptions about operating results, business plans, income projections, anticipated future cash flows and market data. If the estimated fair value of the reporting unit is less than the carrying amount, a second step must be completed in order to determine the amount of goodwill impairment that should be recorded, if any.

In performing the annual analysis, our two reporting units subject to the test are the Jefferson Terminal and Railroad reporting units. We estimate the fair value of the reporting units using an income approach, specifically a discounted cash flow analysis. This analysis requires us to make significant assumptions and estimates about the extent and timing of future cash flows, discount rates and growth rates. The estimates and assumptions used consider historical performance if indicative of future performance, and are consistent with the assumptions used in determining future profit plans for the reporting units. We also utilize market valuation models and other financial ratios, which require us to make certain assumptions and estimates regarding the applicability of those models to our assets and businesses.

Although we believe the estimates of fair value are reasonable, the determination of certain valuation inputs is subject to management's judgment. Changes in these inputs, including as a result of events beyond our control, could materially affect the results of the impairment review. If the forecasted cash flows of the Jefferson Terminal and Railroad reporting units or other key inputs are negatively revised in the future, the estimated fair value of the Jefferson Terminal and Railroad reporting units could be adversely impacted, potentially leading to an impairment in the future that could materially affect our operating results. Specifically, as it relates to the Jefferson Terminal segment, forecasted revenue is dependent on the ramp up of volumes under current contracts and the acquisition of additional storage contracts for the heavy and light crude and refined products during 2019 and 2020 and is subject to obtaining rail capacity for crude, permits for pipeline, movements in future oil spreads and construction of additional infrastructure for increased volumes. We have generally experienced consistent strengthening in volumes at Jefferson Terminal across all product lines throughout 2019. Jefferson Terminal was designed to reach a storage capacity of 21.7 million barrels, and 2.9 million of storage, or approximately 13% of capacity, is currently operational, and we are expanding to add an additional 1.4 million barrels during the fourth quarter of 2019. If the Company strategy changes from planned capacity downward due to an inability to source contracts or expand volumes, the fair value of the reporting units would be negatively affected, which could lead to an impairment. The expansion of refineries in the Beaumont/Port Arthur area, as well as growing crude oil production in the U.S. and Canada, are expected to result in increased demand for storage on the U.S. Gulf Coast. Other assumptions utilized in our annual impairment analysis that are significant in determination of the fair value of the reporting unit include the discount rate utilized in our discounted cash flow analysis of 14% and our terminal growth rate of 3%.

Furthermore, development of both inbound and outbound pipelines to and from the Jefferson Terminal over the next two to three years will affect our forecasted growth and therefore our estimated fair value. Three separate pipeline projects will commence construction during the fourth quarter of 2019 and are expected to be complete near the end of 2020. We expect the Jefferson Terminal segment to generate positive Adjusted EBITDA during 2020. Although certain of our anticipated contracts or expected volumes from existing contracts for Jefferson Terminal have been delayed, we continue to believe our projected revenues are achievable. Projections are revised as information is made available based on negotiations with customers, status of construction projects and macro conditions influencing the markets we serve. Further delays in executing these contracts or achieving our projections could adversely affect the fair value of the reporting unit. However, due to strengthening macroeconomic conditions such as increased oil prices, and our expectation that the spread between Western Canadian Crude and Western Texas Intermediate will increase over the long term, we remain positive for the outlook of Jefferson Terminal's earnings potential.

For the year ended December 31, 2018, there was no impairment of goodwill.

Recent Accounting Pronouncements

See Note 2 to our Consolidated Financial Statements for recent accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the risk of changes in value of a financial instrument, caused by fluctuations in interest rates and foreign exchange rates. Changes in these factors could cause fluctuations in our results of operations and cash flows. We are exposed to the market risks described below.

Interest Rate Risk

Interest rate risk is the exposure to loss resulting from changes in the level of interest rates and the spread between different interest rates. Interest rate risk is highly sensitive to many factors, including the U.S. government's monetary and tax policies, global economic factors and other factors beyond our control. We are exposed to changes in the level of interest rates and to changes in the relationship or spread between interest rates. Our primary interest rate exposure relates to our term loan arrangements.

LIBOR and other indices which are deemed "benchmarks" are the subject of recent national, international, and other regulatory guidance and proposals for reform, and it appears likely that LIBOR will be phased out or the methodology for determining LIBOR will be modified by 2021. We currently have agreements that are indexed to LIBOR and are monitoring related reform proposals and evaluating the related risks; however, it is not possible to predict the effects of any of these developments, and any future initiatives to regulate, reform or change the manner of administration of LIBOR could result in adverse consequences to the rate of interest payable and receivable on, market value of and market liquidity for LIBOR-based financial instruments.

Our borrowing agreements generally require payments based on a variable interest rate index, such as LIBOR. Therefore, to the extent our borrowing costs are not fixed, increases in interest rates may reduce our net income by increasing the cost of our debt without any corresponding increase in rents or cash flow from our finance leases. We manage our exposure to interest rate movements through the use of interest rate derivatives (interest rate swaps and caps). As a result, when market rates of interest change, there is generally not a material impact on our interest expense, future earnings or cash flows.

The following discussion about the potential effects of changes in interest rates is based on a sensitivity analysis, which models the effects of hypothetical interest rate shifts on our financial condition and results of operations. Although we believe a sensitivity analysis provides the most meaningful analysis permitted by the rules and regulations of the SEC, it is constrained by several factors, including the necessity to conduct the analysis based on a single point in time and by the inability to include the extraordinarily complex market reactions that normally would arise from the market shifts modeled. Although the following results of a sensitivity analysis for changes in interest rates may have some limited use as a benchmark, they should not be viewed as a forecast. This forward-looking disclosure also is selective in nature and addresses only the potential interest expense impacts on our financial instruments and, in particular, does not address the mark-to-market impact on our interest rate derivatives. It also does not include a variety of other potential factors that could affect our business as a result of changes in interest rates. In addition, the following discussion does not take into account our Series A preferred shares, on which distributions currently accrue interest at a fixed rate but will accrue interest at a floating rate based on three-month LIBOR plus a spread from and after September 15, 2024.

As of September 30, 2019, assuming we do not hedge our exposure to interest rate fluctuations related to our outstanding floating rate debt, a hypothetical 100-basis point increase/decrease in our variable interest rate on our borrowings would result in an increase/decrease in interest expense of approximately \$1.7 million over the next 12 months before the impact of interest rate derivatives.

Foreign Currency Exchange Risk

Our functional currency is U.S. dollars. All of our leasing arrangements are denominated in U.S. dollars. Currently, the majority of freight rail revenue is also denominated in U.S. dollars, but a portion is denominated in Canadian dollars. Although foreign exchange risk could arise from our operations in multiple jurisdictions, we do not have significant exposure to foreign currency risk as our leasing arrangements are denominated in U.S. dollars. All of our purchase agreements are negotiated in U.S. dollars, and we currently receive the majority of revenue in U.S. dollars. We pay substantially all of our expenses in U.S. dollars; however we pay some expenses in Canadian dollars. Because we currently receive the majority of our revenues in U.S. dollars and pay substantially all of our expenses in U.S. dollars, we do not expect a change in foreign exchange rates would have a significant impact on our results of operations or cash flows.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of and for the period covered by this report.

Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

We are and may become involved in legal proceedings, including but not limited to regulatory investigations and inquiries, in the ordinary course of our business. Although we are unable to predict with certainty the eventual outcome of any litigation, regulatory investigation or inquiry, in the opinion of management, we do not expect our current and any threatened legal proceedings to have a material adverse effect on our business, financial position or results of operations. Given the inherent unpredictability of these types of proceedings, however, it is possible that future adverse outcomes could have a material adverse effect on our financial results.

Item 1A. Risk Factors

You should carefully consider the following risks and other information in this Form 10-Q in evaluating us and our common shares. Any of the following risks, as well as additional risks and uncertainties not currently known to us or that we currently deem immaterial, could materially and adversely affect our results of operations or financial condition. The risk factors generally have been separated into the following categories: risks related to our business, risks related to our Manager, risks related to taxation and risks related to our shares. However, these categories do overlap and should not be considered exclusive.

Risks Related to Our Business

Uncertainty relating to macroeconomic conditions may reduce the demand for our assets, result in non-performance of contracts by our lessees or charterers, limit our ability to obtain additional capital to finance new investments, or have other unforeseen negative effects.

Uncertainty and negative trends in general economic conditions in the United States and abroad, including significant tightening of credit markets and commodity price volatility, historically have created difficult operating environments for owners and operators in the transportation industry. Many factors, including factors that are beyond our control, may impact our operating results or financial condition and/or affect the lessees and charterers that form our customer base. For some years, the world has experienced weakened economic conditions and volatility following adverse changes in global capital markets. Excess supply in oil and gas markets can put significant downward pressure on prices for these commodities, and may affect demand for assets used in production, refining and transportation of oil and gas. In the past, a significant decline in oil prices has led to lower offshore exploration and production budgets worldwide. These conditions have resulted in significant contraction, deleveraging and reduced liquidity in the credit markets. A number of governments have implemented, or are considering implementing, a broad variety of governmental actions or new regulations for the financial markets. In addition, limitations on the availability of capital, higher costs of capital for financing expenditures or the desire to preserve liquidity, may cause our current or prospective customers to make reductions in future capital budgets and spending.

Further, demand for our assets is related to passenger and cargo traffic growth, which in turn is dependent on general business and economic conditions. Global economic downturns could have an adverse impact on passenger and cargo traffic levels and consequently our lessees' and charterers' business, which may in turn result in a significant reduction in revenues, earnings and cash flows, difficulties accessing capital and a deterioration in the value of our assets. We may also become exposed to increased credit risk from our customers and third parties who have obligations to us, which could result in increased non-performance of contracts by our lessees or charterers and adversely impact our business, prospects, financial condition, results of operations and cash flows.

The industries in which we operate have experienced periods of oversupply during which lease rates and asset values have declined, particularly during the most recent economic downturn, and any future oversupply could materially adversely affect our results of operations and cash flows.

The oversupply of a specific asset is likely to depress the lease or charter rates for and the value of that type of asset and result in decreased utilization of our assets, and the industries in which we operate have experienced periods of oversupply during which rates and asset values have declined, particularly during the most recent economic downturn. Factors that could lead to such oversupply include, without limitation:

- general demand for the type of assets that we purchase;
- general macroeconomic conditions, including market prices for commodities that our assets may serve;
- geopolitical events, including war, prolonged armed conflict and acts of terrorism;
- outbreaks of communicable diseases and natural disasters;
- governmental regulation;
- interest rates;
- the availability of credit;
- restructurings and bankruptcies of companies in the industries in which we operate, including our customers;
- manufacturer production levels and technological innovation;
- manufacturers merging or exiting the industry or ceasing to produce certain asset types;
- retirement and obsolescence of the assets that we own;

- our railroad infrastructure may be damaged, including by flooding and railroad derailments;
- increases in supply levels of assets in the market due to the sale or merging of operating lessors; and
- reintroduction of previously unused or dormant assets into the industries in which we operate.

These and other related factors are generally outside of our control and could lead to persistence of, or increase in, the oversupply of the types of assets that we acquire or decreased utilization of our assets, either of which could materially adversely affect our results of operations and cash flow. In addition, lessees may redeliver our assets to locations where there is oversupply, which may lead to additional repositioning costs for us if we move them to areas with higher demand. Positioning expenses vary depending on geographic location, distance, freight rates and other factors, and may not be fully covered by drop-off charges collected from the last lessees of the equipment or pick-up charges paid by the new lessees. Positioning expenses can be significant if a large portion of our assets are returned to locations with weak demand, which could materially adversely affect our business, prospects, financial condition, results of operations and cash flow.

There can be no assurance that any target returns will be achieved.

Our target returns for assets are targets only and are not forecasts of future profits. We develop target returns based on our Manager's assessment of appropriate expectations for returns on assets and the ability of our Manager to enhance the return generated by those assets through active management. There can be no assurance that these assessments and expectations will be achieved and failure to achieve any or all of them may materially adversely impact our ability to achieve any target return with respect to any or all of our assets.

In addition, our target returns are based on estimates and assumptions regarding a number of other factors, including, without limitation, holding periods, the absence of material adverse events affecting specific investments (which could include, without limitation, natural disasters, terrorism, social unrest or civil disturbances), general and local economic and market conditions, changes in law, taxation, regulation or governmental policies and changes in the political approach to transportation investment, either generally or in specific countries in which we may invest or seek to invest. Many of these factors, as well as the other risks described elsewhere in this report, are beyond our control and all could adversely affect our ability to achieve a target return with respect to an asset. Further, target returns are targets for the return generated by specific assets and not by us. Numerous factors could prevent us from achieving similar returns, notwithstanding the performance of individual assets, including, without limitation, taxation and fees payable by us or our operating subsidiaries, including fees and incentive allocation payable to our Manager.

There can be no assurance that the returns generated by any of our assets will meet our target returns, or any other level of return, or that we will achieve or successfully implement our asset acquisition objectives, and failure to achieve the target return in respect of any of our assets could, among other things, have a material adverse effect on our business, prospects, financial condition, results of operations and cash flow. Further, even if the returns generated by individual assets meet target returns, there can be no assurance that the returns generated by other existing or future assets would do so, and the historical performance of the assets in our existing portfolio should not be considered as indicative of future results with respect to any assets.

Contractual defaults may adversely affect our business, prospects, financial condition, results of operations and cash flows by decreasing revenues and increasing storage, positioning, collection, recovery and lost equipment expenses.

The success of our business depends in large part on the success of the operators in the sectors in which we participate. Cash flows from our assets are substantially impacted by our ability to collect compensation and other amounts to be paid in respect of such assets from the customers with whom we enter into leases, charters or other contractual arrangements. Inherent in the nature of the leases, charters and other arrangements for the use of such assets is the risk that we may not receive, or may experience delay in realizing, such amounts to be paid. While we target the entry into contracts with credit-worthy counterparties, no assurance can be given that such counterparties will perform their obligations during the term of the leases, charters or other contractual arrangements. In addition, when counterparties default, we may fail to recover all of our assets, and the assets we do recover may be returned in damaged condition or to locations where we will not be able to efficiently lease, charter or sell them. In most cases, we maintain, or require our lessees to maintain, certain insurances to cover the risk of damages or loss of our assets. However, these insurance policies may not be sufficient to protect us against a loss.

Depending on the specific sector, the risk of contractual defaults may be elevated due to excess capacity as a result of oversupply during the most recent economic downturn. We lease assets to our customers pursuant to fixed-price contracts, and our customers then seek to utilize those assets to transport goods and provide services. If the price at which our customers receive for their transportation services decreases as a result of an oversupply in the marketplace, then our customers may be forced to reduce their prices in order to attract business (which may have an adverse effect on their ability to meet their contractual lease obligations to us), or may seek to renegotiate or terminate their contractual lease arrangements with us to pursue a lower-priced opportunity with another lessor, which may have a direct, adverse effect on us. See “-The industries in which we operate have experienced periods of oversupply during which lease rates and asset values have declined, particularly during the most recent economic downturn, and any future oversupply could materially adversely affect our results of operations and cash flows.” Any default by a material customer would have a significant impact on our profitability at the time the customer defaulted, which could materially adversely affect our operating results and growth prospects. In addition, some of our counterparties may reside in jurisdictions with legal and regulatory regimes that make it difficult and costly to enforce such counterparties’ obligations.

We may not be able to renew or obtain new or favorable charters or leases, which could adversely affect our business, prospects, financial condition, results of operations and cash flows.

Our operating leases are subject to greater residual risk than direct finance leases because we will own the assets at the expiration of an operating lease term and we may be unable to renew existing charters or leases at favorable rates, or at all, or sell the leased or chartered assets, and the residual value of the asset may be lower than anticipated. In addition, our ability to renew existing charters or leases or obtain new charters or leases will also depend on prevailing market conditions, and upon expiration of the contracts governing the leasing or charter of the applicable assets, we may be exposed to increased volatility in terms of rates and contract provisions. For example, we do not currently have long-term charters for our construction support vessel and our ROV support vessel. Likewise, our customers may reduce their activity levels or seek to terminate or renegotiate their charters or leases with us. If we are not able to renew or obtain new charters or leases in direct continuation, or if new charters or leases are entered into at rates substantially below the existing rates or on terms otherwise less favorable compared to existing contractual terms, or if we are unable to sell assets for which we are unable to obtain new contracts or leases, our business, prospects, financial condition, results of operations and cash flows could be materially adversely affected.

If we acquire a high concentration of a particular type of asset, or concentrate our investments in a particular sector, our business, prospects, financial condition, results of operations and cash flows could be adversely affected by changes in market demand or problems specific to that asset or sector.

If we acquire a high concentration of a particular asset, or concentrate our investments in a particular sector, our business and financial results could be adversely affected by sector-specific or asset-specific factors. For example, if a particular sector experiences difficulties such as increased competition or oversupply, the operators we rely on as a lessor may be adversely affected and consequently our business and financial results may be similarly affected. If we acquire a high concentration of a particular asset and the market demand for a particular asset declines, it is redesigned or replaced by its manufacturer or it experiences design or technical problems, the value and rates relating to such asset may decline, and we may be unable to lease or charter such asset on favorable terms, if at all. Any decrease in the value and rates of our assets may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

We operate in highly competitive markets.

The business of acquiring transportation and transportation-related infrastructure assets is highly competitive. Market competition for opportunities includes traditional transportation and infrastructure companies, commercial and investment banks, as well as a growing number of non-traditional participants, such as hedge funds, private equity funds and other private investors, including Fortress-related entities. Some of these competitors may have access to greater amounts of capital and/or to capital that may be committed for longer periods of time or may have different return thresholds than us, and thus these competitors may have certain advantages not shared by us. In addition, competitors may have incurred, or may in the future incur, leverage to finance their debt investments at levels or on terms more favorable than those available to us. Strong competition for investment opportunities could result in fewer such opportunities for us, as certain of these competitors have established and are establishing investment vehicles that target the same types of assets that we intend to purchase.

In addition, some of our competitors may have longer operating histories, greater financial resources and lower costs of capital than us, and consequently, may be able to compete more effectively in one or more of our target markets. We likely will not always be able to compete successfully with our competitors and competitive pressures or other factors may also result in significant price competition, particularly during industry downturns, which could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Litigation to enforce our contracts and recover our assets has inherent uncertainties that are increased by the location of our assets in jurisdictions that have less developed legal systems.

While some of our contractual arrangements are governed by New York law and provide for the non-exclusive jurisdiction of the courts located in the state of New York, our ability to enforce our counterparties' obligations under such contractual arrangements is subject to applicable laws in the jurisdiction in which enforcement is sought. While some of our existing assets are used in specific jurisdictions, transportation and transportation-related infrastructure assets by their nature generally move throughout multiple jurisdictions in the ordinary course of business. As a result, it is not possible to predict, with any degree of certainty, the jurisdictions in which enforcement proceedings may be commenced. Litigation and enforcement proceedings have inherent uncertainties in any jurisdiction and are expensive. These uncertainties are enhanced in countries that have less developed legal systems where the interpretation of laws and regulations is not consistent, may be influenced by factors other than legal merits and may be cumbersome, time-consuming and even more expensive. For example, repossession from defaulting lessees may be difficult and more expensive in jurisdictions whose laws do not confer the same security interests and rights to creditors and lessors as those in the United States and where the legal system is not as well developed. As a result, the remedies available and the relative success and expedience of collection and enforcement proceedings with respect to the owned assets in various jurisdictions cannot be predicted. To the extent more of our business shifts to areas outside of the United States and Europe, such as Asia and the Middle East, it may become more difficult and expensive to enforce our rights and recover our assets.

Certain liens may arise on our assets.

Certain of our assets are currently subject to liens under separate financing arrangements entered into by certain subsidiaries in connection with acquisitions of assets. In the event of a default under such arrangements by the applicable subsidiary, the lenders thereunder would be permitted to take possession of or sell such assets. See "Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources." In addition, our currently owned assets and assets that we purchase in the future may be subject to other liens based on the industry practices relating to such assets. Until they are discharged, these liens could impair our ability to repossess, re-lease or sell our assets, and to the extent our lessees or charterers do not comply with their obligations to discharge any liens on the applicable assets, we may find it necessary to pay the claims secured by such liens in order to repossess such assets. Such payments could materially adversely affect our operating results and growth prospects.

The values of our assets may fluctuate due to various factors.

The fair market values of our assets may decrease or increase depending on a number of factors, including the prevailing level of charter or lease rates from time to time, general economic and market conditions affecting our target markets, type and age of assets, supply and demand for assets, competition, new governmental or other regulations and technological advances, all of which could impact our profitability and our ability to lease, charter, develop, operate, or sell such assets. In addition, our assets depreciate as they age and may generate lower revenues and cash flows. We must be able to replace such older, depreciated assets with newer assets, or our ability to maintain or increase our revenues and cash flows will decline. In addition, if we dispose of an asset for a price that is less than the depreciated book value of the asset on our balance sheet or if we determine that an asset's value has been impaired, we will recognize a related charge in our consolidated statement of operations and such charge could be material.

We may not generate a sufficient amount of cash or generate sufficient free cash flow to fund our operations or repay our indebtedness.

Our ability to make payments on our indebtedness as required depends on our ability to generate cash flow in the future. This ability, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. If we do not generate sufficient free cash flow to satisfy our debt obligations, including interest payments and the payment of principal at maturity, we may have to undertake alternative financing plans, such as refinancing or restructuring our debt, selling assets, reducing or delaying capital investments or seeking to raise additional capital. We cannot provide assurance that any refinancing would be possible, that any assets could be sold, or, if sold, of the timeliness and amount of proceeds realized from those sales, that additional financing could be obtained on acceptable terms, if at all, or that additional financing would be permitted under the terms of our various debt instruments then in effect. Furthermore, our ability to refinance would depend upon the condition of the finance and credit markets. Our inability to generate sufficient free cash flow to satisfy our debt obligations, or to refinance our obligations on commercially reasonable terms or on a timely basis, would materially affect our business, financial condition and results of operations.

We may acquire operating businesses, including businesses whose operations are not fully matured and stabilized. These businesses may be subject to significant operating and development risks, including increased competition, cost overruns and delays, and difficulties in obtaining approvals or financing. These factors could materially affect our business, financial condition, liquidity and results of operations.

We have acquired, and may in the future acquire, operating businesses, including businesses whose operations are not fully matured and stabilized (including, but not limited to, our businesses within the Jefferson Terminal and Ports and Terminals segments). While we have deep experience in the construction and operation of these companies, we are nevertheless subject to significant risks and contingencies of an operating business, and these risks are greater where the operations of such businesses are not fully matured and stabilized. Key factors that may affect our operating businesses include, but are not limited to:

- competition from market participants;
- general economic and/or industry trends, including pricing for the products or services offered by our operating businesses;

- the issuance and/or continued availability of necessary permits, licenses, approvals and agreements from governmental agencies and third parties as are required to construct and operate such businesses;
- changes or deficiencies in the design or construction of development projects;
- unforeseen engineering, environmental or geological problems;
- potential increases in construction and operating costs due to changes in the cost and availability of fuel, power, materials and supplies;
- the availability and cost of skilled labor and equipment;
- our ability to enter into additional satisfactory agreements with contractors and to maintain good relationships with these contractors in order to construct development projects within our expected cost parameters and time frame, and the ability of those contractors to perform their obligations under the contracts and to maintain their creditworthiness;
- potential liability for injury or casualty losses which are not covered by insurance;
- potential opposition from non-governmental organizations, environmental groups, local or other groups which may delay or prevent development activities;
- local and economic conditions;
- changes in legal requirements; and
- force majeure events, including catastrophes and adverse weather conditions.

Any of these factors could materially affect our business, financial condition, liquidity and results of operations.

Our use of joint ventures or partnerships, and our Manager's outsourcing of certain functions, may present unforeseen obstacles or costs.

We have acquired and may in the future acquire interests in certain assets in cooperation with third-party partners or co-investors through jointly-owned acquisition vehicles, joint ventures or other structures. In these co-investment situations, our ability to control the management of such assets depends upon the nature and terms of the joint arrangements with such partners and our relative ownership stake in the asset, each of which will be determined by negotiation at the time of the investment and the determination of which is subject to the discretion of our Manager. Depending on our Manager's perception of the relative risks and rewards of a particular asset, our Manager may elect to acquire interests in structures that afford relatively little or no operational and/or management control to us. Such arrangements present risks not present with wholly-owned assets, such as the possibility that a co-investor becomes bankrupt, develops business interests or goals that conflict with our interests and goals in respect of the assets, all of which could materially adversely affect our business, prospects, financial condition, results of operations and cash flows.

In addition, our Manager expects to utilize third party contractors to perform services and functions related to the operation and leasing of our assets. These functions may include billing, collections, recovery and asset monitoring. Because we and our Manager do not directly control these third parties, there can be no assurance that the services they provide will be delivered at a level commensurate with our expectations, or at all. The failure of any such third party contractors to perform in accordance with our expectations could materially adversely affect our business, prospects, financial condition, results of operations and cash flows.

We are subject to the risks and costs of obsolescence of our assets.

Technological and other improvements expose us to the risk that certain of our assets may become technologically or commercially obsolete. For example, in our Aviation Leasing segment, as manufacturers introduce technological innovations and new types of aircraft, some of our assets could become less desirable to potential lessees. Such technological innovations may increase the rate of obsolescence of existing aircraft faster than currently anticipated by us. In addition, the imposition of increased regulation regarding stringent noise or emissions restrictions may make some of our aircraft less desirable and less valuable in the marketplace. In our offshore energy business, development and construction of new, sophisticated, high-specification assets could cause our assets to become less desirable to potential charterers, and insurance rates may also increase with the age of a vessel, making older vessels less desirable to potential charterers. Any of these risks may adversely affect our ability to lease, charter or sell our assets on favorable terms, if at all, which could materially adversely affect our operating results and growth prospects.

The North American rail sector is a highly regulated industry and increased costs of compliance with, or liability for violation of, existing or future laws, regulations and other requirements could significantly increase our costs of doing business, thereby adversely affecting our profitability.

The rail sector is subject to extensive laws, regulations and other requirements including, but not limited to, those relating to the environment, safety, rates and charges, service obligations, employment, labor, immigration, minimum wages and overtime pay, health care and benefits, working conditions, public accessibility and other requirements. These laws and regulations are enforced by U.S. and Canadian federal agencies including the U.S. and Canadian Environmental Protection Agencies, the U.S. and Canadian Departments of Transportation (DOT or Transport Canada), the Occupational Safety and Health Act (OSHA or Canadian provincial equivalents), the U.S. Federal Railroad Administration (FRA), and the U.S. Surface Transportation Board (STB), as well as numerous other state, provincial, local and federal agencies. Ongoing compliance with, or a violation of, these laws, regulations and other requirements could have a material adverse effect on our business, financial condition and results of operations.

We believe that our rail operations are in substantial compliance with applicable laws and regulations. However, these laws and regulations, and the interpretation or enforcement thereof, are subject to frequent change and varying interpretation by regulatory authorities, and we are unable to predict the ongoing cost to us of complying with these laws and regulations or the future impact of these laws and regulations on our operations. In addition, from time to time we are subject to inspections and investigations by various regulators. Violation of environmental or other laws, regulations and permits can result in the imposition of significant administrative, civil and criminal penalties, injunctions and construction bans or delays.

Legislation passed by the U.S. Congress or Canadian Parliament or new regulations issued by federal agencies can significantly affect the revenues, costs and profitability of our business. For instance, more recently proposed bills such as the "Rail Shipper Fairness Act of 2017," or competitive access proposals under consideration by the STB, if adopted, could increase government involvement in railroad pricing, service and operations and significantly change the federal regulatory framework of the railroad industry. Several of the changes under consideration could have a significant negative impact on FTAL's ability to determine prices for rail services, meet service standards and could force a reduction in capital spending. Statutes imposing price constraints or affecting rail-to-rail competition could adversely affect FTAL's profitability.

Under various U.S. and Canadian federal, state, provincial and local environmental requirements, as the owner or operator of terminals or other facilities, we may be liable for the costs of removal or remediation of contamination at or from our existing locations, whether we knew of, or were responsible for, the presence of such contamination. The failure to timely report and properly remediate contamination may subject us to liability to third parties and may adversely affect our ability to sell or rent our property or to borrow money using our property as collateral. Additionally, we may be liable for the costs of remediating third-party sites where hazardous substances from our operations have been transported for treatment or disposal, regardless of whether we own or operate that site. In the future, we may incur substantial expenditures for investigation or remediation of contamination that has not yet been discovered at our current or former locations or locations that we may acquire.

A discharge of hydrocarbons or hazardous substances into the environment associated with operating our rail assets could subject us to substantial expense, including the cost to recover the materials spilled, restore the affected natural resources, pay fines and penalties, and natural resource damages and claims made by employees, neighboring landowners, government authorities and other third parties, including for personal injury and property damage. We may experience future catastrophic sudden or gradual releases into the environment from our facilities or discover historical releases that were previously unidentified or not assessed. Although our inspection and testing programs are designed to prevent, detect and address any such releases promptly, the liabilities incurred due to any future releases into the environment from our assets, have the potential to substantially affect our business. Such events could also subject us to media and public scrutiny that could have a negative effect on our operations and also on the value of our common shares.

Our business could be adversely affected if service on the railroads is interrupted or if more stringent regulations are adopted regarding railcar design or the transportation of crude oil by rail.

As a result of hydraulic fracturing and other improvements in extraction technologies, there has been a substantial increase in the volume of crude oil and liquid hydrocarbons produced and transported in North America, and a geographic shift in that production versus historical production. The increase in volume and shift in geography has resulted in a growing percentage of crude oil being transported by rail. High-profile accidents involving crude-oil-carrying trains in Quebec, North Dakota and Virginia, and more recently in West Virginia and Illinois, have raised concerns about the environmental and safety risks associated with crude oil transport by rail and the associated risks arising from railcar design.

In May 2015, the DOT issued new production standards and operational controls for rail tank cars used in "High-Hazard Flammable Trains" (i.e., trains carrying commodities such as ethanol, crude oil and other flammable liquids). Similar standards have been adopted in Canada. The new standard applies for all cars manufactured after October 1, 2015, and existing tank cars must be retrofitted within the next three to eight years. The applicable operational controls include reduced speed restrictions, and maximum lengths on trains carrying these materials. Retrofitting our tank cars will be required under these new standards to the extent we elect to move certain flammable liquids in the future. While we may be able to pass some of these costs on to our customers, there may be costs that we cannot pass on to them. We continue to monitor the railcar regulatory landscape and remain in close contact with railcar suppliers and other industry stakeholders to stay informed of railcar regulation rulemaking developments. It is unclear how these regulations will impact the crude-by-rail industry, and any such impact would depend on a number of factors that are outside of our control. If, for example, overall volume of crude-by-rail decreases, or if we do not have access to a sufficient number of compliant cars to transport required volumes under our existing contracts, our operations may be negatively affected. This may lead to a decrease in revenues and other consequences.

The adoption of additional federal, state, provincial or local laws or regulations, including any voluntary measures by the rail industry regarding railcar design or crude oil and liquid hydrocarbon rail transport activities, or efforts by local communities to restrict or limit rail traffic involving crude oil, could affect our business by increasing compliance costs and decreasing demand for our services, which could adversely affect our financial position and cash flows. Moreover, any disruptions in the operations of railroads, including those due to shortages of railcars, weather-related problems, flooding, drought, accidents, mechanical difficulties, strikes, lockouts or bottlenecks, could adversely impact our customers' ability to move their product and, as a result, could affect our business.

Our assets are exposed to unplanned interruptions caused by catastrophic events outside of our control which may disrupt our business and cause damage or losses that may not be adequately covered by insurance.

The operations of transportation and infrastructure projects are exposed to unplanned interruptions caused by significant catastrophic events, such as hurricanes, cyclones, earthquakes, landslides, floods, explosions, fires, major plant breakdowns, pipeline or electricity line ruptures or other disasters. Operational disruption, as well as supply disruption, could adversely impact the cash flows available from these assets. In addition, the cost of repairing or replacing damaged assets could be considerable. Repeated or prolonged interruption may result in temporary or permanent loss of customers, substantial litigation or penalties for regulatory or contractual non-compliance, and any loss from such events may not be recoverable under relevant insurance policies. Although we believe that we are adequately insured against these types of events, either indirectly through our lessees or charterers or through our own insurance policies, no assurance can be given that the occurrence of any such event will not materially adversely affect us. In addition, if a lessee or charterer is not obligated to maintain sufficient insurance, we may incur the costs of additional insurance coverage during the related lease or charter. We can give no assurance that such insurance will be available at commercially reasonable rates, if at all.

Our assets generally require routine maintenance, and we may be exposed to unforeseen maintenance costs.

We may be exposed to unforeseen maintenance costs for our assets associated with a lessee's or charterer's failure to properly maintain the asset. We enter into leases and charters with respect to some of our assets pursuant to which the lessees are primarily responsible for many obligations, which generally include complying with all governmental requirements applicable to the lessee or charterer, including operational, maintenance, government agency oversight, registration requirements and other applicable directives. Failure of a lessee or charterer to perform required maintenance during the term of a lease or charter could result in a decrease in value of an asset, an inability to re-lease or charter an asset at favorable rates, if at all, or a potential inability to utilize an asset. Maintenance failures would also likely require us to incur maintenance and modification costs upon the termination of the applicable lease or charter; such costs to restore the asset to an acceptable condition prior to re-leasing, charter or sale could be substantial. Any failure by our lessees or charterers to meet their obligations to perform required scheduled maintenance or our inability to maintain our assets could materially adversely affect our business, prospects, financial condition, results of operations and cash flows.

Some of our customers operate in highly regulated industries and changes in laws or regulations, including laws with respect to international trade, may adversely affect our ability to lease, charter or sell our assets.

Some of our customers operate in highly regulated industries such as aviation and offshore energy. A number of our contractual arrangements-for example, our leasing aircraft engines or offshore energy equipment to third-party operators-require the operator (our customer) to obtain specific governmental or regulatory licenses, consents or approvals. These include consents for certain payments under such arrangements and for the export, import or re-export of the related assets. Failure by our customers or, in certain circumstances, by us, to obtain certain licenses and approvals could negatively affect our ability to conduct our business. In addition, the shipment of goods, services and technology across international borders subjects the operation of our assets to international trade laws and regulations. Moreover, many countries, including the United States, control the export and re-export of certain goods, services and technology and impose related export recordkeeping and reporting obligations. Governments also may impose economic sanctions against certain countries, persons and other entities that may restrict or prohibit transactions involving such countries, persons and entities. If any such regulations or sanctions affect the asset operators that are our customers, our business, prospects, financial condition, results of operations and cash flows may be materially adversely affected.

Certain of our assets are subject to purchase options held by the charterer or lessee of the asset which, if exercised, could reduce the size of our asset base and our future revenues.

We have granted purchase options to the charterers and lessees of certain of our assets. The market values of these assets may change from time to time depending on a number of factors, such as general economic and market conditions affecting the industries in which we operate, competition, cost of construction, governmental or other regulations, technological changes and prevailing levels of charter or lease rates from time to time. The purchase price under a purchase option may be less than the asset's market value at the time the option may be exercised. In addition, we may not be able to obtain a replacement asset for the price at which the asset is sold. In such cases, our business, prospects, financial condition, results of operations and cash flows may be materially adversely affected.

The profitability of our offshore energy assets may be impacted by the profitability of the offshore oil and gas industry generally, which is significantly affected by, among other things, volatile oil and gas prices.

Demand for assets in the offshore energy business and our ability to secure charter contracts for our assets at favorable charter rates following expiry or termination of existing charters will depend, among other things, on the level of activity in the offshore oil and gas industry. The offshore oil and gas industry is cyclical and volatile, and demand for oil-service assets depends on, among other things, the level of development and activity in oil and gas exploration, as well as the identification and development of oil and gas reserves and production in offshore areas worldwide. The availability of high quality oil and gas prospects, exploration success, relative production costs, the stage of reservoir development, political concerns and regulatory requirements all affect the level of activity for charterers of oil-service vessels. Accordingly, oil and gas prices and market expectations of potential changes in these prices significantly affect the level of activity and demand for oil-service assets. Oil and gas prices can be extremely volatile and are affected by numerous factors beyond our control, such as: worldwide demand for oil and gas; costs of exploring, developing, producing and delivering oil and gas; expectations regarding future energy prices; the ability of the Organization of Petroleum Exporting Countries ("OPEC") to set and maintain production levels and impact pricing; the level of production in non-OPEC countries; governmental regulations and policies regarding development of oil and gas reserves; local and international political, economic and weather conditions; domestic and foreign tax or trade policies; political and military conflicts in oil-producing and other countries; and the development and exploration of alternative fuels. Any reduction in the demand for our assets due to these or other factors could materially adversely affect our operating results and growth prospects.

Our international operations involve additional risks, which could adversely affect our business, prospects, financial condition, results of operations and cash flows.

We and our customers operate in various regions throughout the world. As a result, we may, directly or indirectly, be exposed to political and other uncertainties, including risks of:

- terrorist acts, armed hostilities, war and civil disturbances;
- acts of piracy;
- potential cybersecurity attacks;
- significant governmental influence over many aspects of local economies;
- seizure, nationalization or expropriation of property or equipment;
- repudiation, nullification, modification or renegotiation of contracts;
- limitations on insurance coverage, such as war risk coverage, in certain areas;
- political unrest;
- foreign and U.S. monetary policy and foreign currency fluctuations and devaluations;
- the inability to repatriate income or capital;
- complications associated with repairing and replacing equipment in remote locations;
- import-export quotas, wage and price controls, imposition of trade barriers;
- U.S. and foreign sanctions or trade embargoes;
- restrictions on the transfer of funds into or out of countries in which we operate;
- compliance with U.S. Treasury sanctions regulations restricting doing business with certain nations or specially designated nationals;
- regulatory or financial requirements to comply with foreign bureaucratic actions;
- compliance with applicable anti-corruption laws and regulations;
- changing taxation policies, including confiscatory taxation;
- other forms of government regulation and economic conditions that are beyond our control; and
- governmental corruption.

Any of these or other risks could adversely impact our customers' international operations which could materially adversely impact our operating results and growth opportunities.

We may make acquisitions in emerging markets throughout the world, and investments in emerging markets are subject to greater risks than developed markets and could adversely affect our business, prospects, financial condition, results of operations and cash flows.

To the extent that we acquire assets in emerging markets-which we may do throughout the world-additional risks may be encountered that could adversely affect our business. Emerging market countries have less developed economies and infrastructure and are often more vulnerable to economic and geopolitical challenges and may experience significant fluctuations in gross domestic product, interest rates and currency exchange rates, as well as civil disturbances, government instability, nationalization and expropriation of private assets and the imposition of taxes or other charges by government authorities. In addition, the currencies in which investments are denominated may be unstable, may be subject to significant depreciation and may not be freely convertible or may be subject to the imposition of other monetary or fiscal controls and restrictions.

Emerging markets are still in relatively early stages of their development and accordingly may not be highly or efficiently regulated. Moreover, emerging markets tend to be shallower and less liquid than more established markets which may adversely affect our ability to realize profits from our assets in emerging markets when we desire to do so or receive what we perceive to be their fair value in the event of a realization. In some cases, a market for realizing profits from an investment may not exist locally. In addition, issuers based in emerging markets are not generally subject to uniform accounting and financial reporting standards, practices and requirements comparable to those applicable to issuers based in more developed countries, thereby potentially increasing the risk of fraud and other deceptive practices. Settlement of transactions may be subject to greater delay and administrative uncertainties than in developed markets and less complete and reliable financial and other information may be available to investors in emerging markets than in developed markets. In addition, economic instability in emerging markets could adversely affect the value of our assets subject to leases or charters in such countries, or the ability of our lessees or charters, which operate in these markets, to meet their contractual obligations. As a result, lessees or charterers that operate in emerging market countries may be more likely to default under their contractual obligations than those that operate in developed countries. Liquidity and volatility limitations in these markets may also adversely affect our ability to dispose of our assets at the best price available or in a timely manner.

As we have and may continue to acquire assets located in emerging markets throughout the world, we may be exposed to any one or a combination of these risks, which could adversely affect our operating results.

We are actively evaluating potential acquisitions of assets and operating companies in other transportation and infrastructure sectors which could result in additional risks and uncertainties for our business and unexpected regulatory compliance costs.

While our existing portfolio consists of assets in the aviation, energy, intermodal transport and rail sectors, we are actively evaluating potential acquisitions of assets and operating companies in other sectors of the transportation and transportation-related infrastructure and equipment markets and we plan to be flexible as other attractive opportunities arise over time. To the extent we make acquisitions in other sectors, we will face numerous risks and uncertainties, including risks associated with the required investment of capital and other resources and with combining or integrating operational and management systems and controls. Entry into certain lines of business may subject us to new laws and regulations and may lead to increased litigation and regulatory risk. Many types of transportation assets, including certain rail, airport and seaport assets, are subject to registration requirements by U.S. governmental agencies, as well as foreign governments if such assets are to be used outside of the United States. Failing to register the assets, or losing such registration, could result in substantial penalties, forced liquidation of the assets and/or the inability to operate and, if applicable, lease the assets. We may need to incur significant costs to comply with the laws and regulations applicable to any such new acquisition. The failure to comply with these laws and regulations could cause us to incur significant costs, fines or penalties or require the assets to be removed from service for a period of time resulting in reduced income from these assets. In addition, if our acquisitions in other sectors produce insufficient revenues, or produce investment losses, or if we are unable to efficiently manage our expanded operations, our results of operations will be adversely affected, and our reputation and business may be harmed.

The agreements governing our indebtedness place restrictions on us and our subsidiaries, reducing operational flexibility and creating default risks.

The agreements governing our indebtedness, including, but not limited to, the indenture governing our Senior Notes and the revolving credit facility entered into on June 16, 2017 ("Revolving Credit Facility"), contain covenants that place restrictions on us and our subsidiaries. The indentures governing our Senior Notes and the Revolving Credit Facility restrict among other things, our and certain of our subsidiaries' ability to:

- merge, consolidate or transfer all, or substantially all, of our assets;
- incur additional debt or issue preferred shares;
- make certain investments or acquisitions;
- create liens on our or our subsidiaries' assets;
- sell assets;
- make distributions on or repurchase our shares;
- enter into transactions with affiliates; and
- create dividend restrictions and other payment restrictions that affect our subsidiaries.

These covenants could impair our ability to grow our business, take advantage of attractive business opportunities or successfully compete. A breach of any of these covenants could result in an event of default. Cross-default provisions in our debt agreements could cause an event of default under one debt agreement to trigger an event of default under our other debt agreements. Upon the occurrence of an event of default under any of our debt agreements, the lenders or holders thereof could elect to declare all outstanding debt under such agreements to be immediately due and payable.

Terrorist attacks could negatively impact our operations and our profitability and may expose us to liability and reputational damage.

Terrorist attacks may negatively affect our operations. Such attacks have contributed to economic instability in the United States and elsewhere, and further acts of terrorism, violence or war could similarly affect world trade and the industries in which we and our customers operate. In addition, terrorist attacks or hostilities may directly impact airports or aircraft, ports where our containers and vessels travel, or our physical facilities or those of our customers. In addition, it is also possible that our assets could be involved in a terrorist attack. The consequences of any terrorist attacks or hostilities are unpredictable, and we may not be able to foresee events that could have a material adverse effect on our operations. Although our lease and charter agreements generally require the counterparties to indemnify us against all damages arising out of the use of our assets, and we carry insurance to potentially offset any costs in the event that our customer indemnifications prove to be insufficient, our insurance does not cover certain types of terrorist attacks, and we may not be fully protected from liability or the reputational damage that could arise from a terrorist attack which utilizes our assets.

Because we have a limited operating history, our historical financial and operating data may not be representative of our future results.

We are a limited liability company with a limited operating history. Our results of operations, financial condition and cash flows reflected in our consolidated financial statements may not be indicative of the results we would have achieved if we were a public company or results that may be achieved in future periods. Consequently, there can be no assurance that we will be able to generate sufficient income to pay our operating expenses and make satisfactory distributions to our shareholders, or any distributions at all. Further, we only make acquisitions identified by our Manager. As a result of this concentration of assets, our financial performance depends on the performance of our Manager in identifying target assets, the availability of opportunities falling within our asset acquisition strategy and the performance of those underlying assets.

Our leases and charters require payments in U.S. dollars, but many of our customers operate in other currencies; if foreign currencies devalue against the U.S. dollar, our lessees or charterers may be unable to meet their payment obligations to us in a timely manner.

Our current leases and charters require that payments be made in U.S. dollars. If the currency that our lessees or charterers typically use in operating their businesses devalues against the U.S. dollar, our lessees or charterers could encounter difficulties in making payments to us in U.S. dollars. Furthermore, many foreign countries have currency and exchange laws regulating international payments that may impede or prevent payments from being paid to us in U.S. dollars. Future leases or charters may provide for payments to be made in euros or other foreign currencies. Any change in the currency exchange rate that reduces the amount of U.S. dollars obtained by us upon conversion of future lease payments denominated in euros or other foreign currencies, may, if not appropriately hedged by us, have a material adverse effect on us and increase the volatility of our earnings.

Our inability to obtain sufficient capital would constrain our ability to grow our portfolio and to increase our revenues.

Our business is capital intensive, and we have used and may continue to employ leverage to finance our operations. Accordingly, our ability to successfully execute our business strategy and maintain our operations depends on the availability and cost of debt and equity capital. Additionally, our ability to borrow against our assets is dependent, in part, on the appraised value of such assets. If the appraised value of such assets declines, we may be required to reduce the principal outstanding under our debt facilities or otherwise be unable to incur new borrowings.

We can give no assurance that the capital we need will be available to us on favorable terms, or at all. Our inability to obtain sufficient capital, or to renew or expand our credit facilities, could result in increased funding costs and would limit our ability to:

- meet the terms and maturities of our existing and future debt facilities;
- purchase new assets or refinance existing assets;
- fund our working capital needs and maintain adequate liquidity; and
- finance other growth initiatives.

In addition, we conduct our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the Investment Company Act of 1940 (the "Investment Company Act"). As such, certain forms of financing such as finance leases may not be available to us. Please see "- If we are deemed an investment company under the Investment Company Act, it could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows."

The effects of various environmental regulations may negatively affect the industries in which we operate which could have a material adverse effect on our financial condition, results of operations and cash flows.

We are subject to federal, state, local and foreign laws and regulations relating to the protection of the environment, including those governing the discharge of pollutants to air and water, the management and disposal of hazardous substances and wastes, the cleanup of contaminated sites and noise and emission levels. Under some environmental laws in the United States and certain other countries, strict liability may be imposed on the owners or operators of assets, which could render us liable for environmental and natural resource damages without regard to negligence or fault on our part. We could incur substantial costs, including cleanup costs, fines and third-party claims for property or natural resource damage and personal injury, as a result of violations of or liabilities under environmental laws and regulations in connection with our or our lessee's or charterer's current or historical operations, any of which could have a material adverse effect on our results of operations and financial condition. While we typically maintain liability insurance coverage and typically require our lessees to provide us with indemnity against certain losses, the insurance coverage is subject to large deductibles, limits on maximum coverage and significant exclusions and may not be sufficient or available to protect against any or all liabilities and such indemnities may not cover or be sufficient to protect us against losses arising from environmental damage. In addition, changes to environmental standards or regulations in the industries in which we operate could limit the economic life of the assets we acquire or reduce their value, and also require us to make significant additional investments in order to maintain compliance, which would negatively impact our cash flows and results of operations.

Our Repauno site and Long Ridge property are subject to environmental laws and regulations that may expose us to significant costs and liabilities.

Our Repauno site is subject to ongoing environmental investigation and remediation by the former owner of the property related to historic industrial operations. The former owner is responsible for completion of this work, and we benefit from a related indemnity and insurance policy. If the former owner fails to fulfill its investigation and remediation, or indemnity obligations and the related insurance, which are subject to limits and conditions, fail to cover our costs, we could incur losses. Redevelopment of the property in those areas undergoing investigation and remediation must await state environmental agency confirmation that no further investigation or remediation is required before redevelopment activities can occur in such areas of the property. Therefore, any delay in the former owner's completion of the environmental work or receipt of related approvals in an area of the property could delay our redevelopment activities. In addition, once received, permits and approvals may be subject to litigation, and projects may be delayed or approvals reversed or modified in litigation. If there is a delay in obtaining any required regulatory approval, it could delay projects and cause us to incur costs.

In connection with our acquisition of Long Ridge, the former owner of the property is obligated to perform certain post-closing demolition activities, remove specified containers, equipment and structures and conduct investigation, removal, cleanup and decontamination related thereto. In addition, the former owner is responsible for ongoing environmental remediation related to historic industrial operations on and off Long Ridge. Pursuant to an order issued by the Ohio Environmental Protection Agency ("Ohio EPA"), the former owner is responsible for completing the removal and off-site disposal of electrolytic pots associated with the former use of Long Ridge as an aluminum reduction plant. In addition, Long Ridge is located adjacent to the former Ormet Corporation Superfund site (the "Ormet site"), which is owned and operated by the former owner of Long Ridge. Pursuant to an order with the United States Environmental Protection Agency ("U.S. EPA"), the former owner is obligated to pump groundwater that has been impacted by the adjacent Ormet site beneath our site and discharge it to the Ohio River and monitor the groundwater annually. Long Ridge is also subject to an environmental covenant related to the adjacent Ormet site that, inter alia, restricts the use of groundwater beneath our site and requires U.S. EPA consent for activities on Long Ridge that could disrupt the groundwater monitoring or pumping. The former owner is contractually obligated to complete its regulatory obligations on Long Ridge and we benefit from a related indemnity and insurance policy. If the former owner fails to fulfill its demolition, removal, investigation, remediation, monitoring, or indemnity obligations, and if the related insurance, which is subject to limits and conditions, fails to cover our costs, we could incur losses. Redevelopment of the property in those areas undergoing investigation and remediation pursuant to the Ohio EPA order must await state environmental agency confirmation that no further investigation or remediation is required before redevelopment activities can occur in such area of the property. Therefore, any delay in the former owner's completion of the environmental work or receipt of related approvals or consents from Ohio EPA or U.S. EPA could delay our redevelopment activities.

In addition, a portion of Long Ridge is proposed for redevelopment as a combined cycle gas-fired electric generating facility. Although environmental investigations in that portion of the property have not identified material impacts to soils or groundwater that reasonably would be expected to prevent or delay redevelopment, impacted materials could be encountered during construction that require special handling and/or result in delays to the project. In addition, the construction of an electric generating plant will require environmental permits and approvals from federal, state and local environmental agencies. Once received, permits and approvals may be subject to litigation, and projects may be delayed or approvals reversed or modified in litigation. If there is a delay in obtaining any required regulatory approval, it could delay projects and cause us to incur costs.

Moreover, new, stricter environmental laws, regulations or enforcement policies, including those imposed in response to climate change, could be implemented that significantly increase our compliance costs, or require us to adopt more costly methods of operation. If we are not able to transform Repauno or Long Ridge into hubs for industrial and energy development in a timely manner, their future prospects could be materially and adversely affected, which may have a material adverse effect on our business, operating results and financial condition.

It is impossible to predict whether third parties will allege liability related to our purchase of the Montreal, Maine and Atlantic Railway (“MM&A”) assets out of bankruptcy, including possible claims related to the July 6, 2013 train derailment near Lac-Mégantic, Quebec.

On July 6, 2013, prior to our ownership, a train carrying crude oil on the MM&A line derailed near Lac-Mégantic, Quebec which resulted in fires that claimed the lives of 47 individuals (the “Incident”). Approximately two million gallons of crude oil were either burned or released into the environment, including into the nearby Chaudière River. Prior to our acquisition of the MM&A assets in May and June 2014, we received written assurance from the Quebec Ministry of Sustainable Development, Environment, Wildlife and Parks that it would take full responsibility for the environmental clean-up and that it would not hold CMQR liable for any environmental damages or costs relating to clean-up or restoration of the affected area as a result of the Incident. While we do not anticipate any liability relating to the Incident, including liability for claims alleging personal injury, property damage or natural resource damages, there can be no assurance that such claims relating to the Incident will not arise in the future. No claims have been made or threatened against us as of September 30, 2019 and we do not anticipate any expenditures relating to environmental clean-up (including impacts to the Chaudière River) as a result of the Incident.

If we are deemed an “investment company” under the Investment Company Act, it could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

We conduct our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the Investment Company Act. Section 3(a)(1)(A) of the Investment Company Act defines an investment company as any issuer that is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities. Section 3(a)(1)(C) of the Investment Company Act defines an investment company as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40% of the value of the issuer’s total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis. Excluded from the term “investment securities,” among other things, are U.S. government securities and securities issued by majority-owned subsidiaries that are not themselves investment companies and are not relying on the exception from the definition of investment company for certain privately-offered investment vehicles set forth in Section 3(c)(1) or Section 3(c)(7) of the Investment Company Act.

We are a holding company that is not an investment company because we are engaged in the business of holding securities of our wholly-owned and majority-owned subsidiaries, which are engaged in transportation and related businesses which lease assets pursuant to operating leases and finance leases. The Investment Company Act may limit our and our subsidiaries’ ability to enter into financing leases and engage in other types of financial activity because less than 40% of the value of our and our subsidiaries’ total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis can consist of “investment securities.”

If we or any of our subsidiaries were required to register as an investment company under the Investment Company Act, the registered entity would become subject to substantial regulation that would significantly change our operations, and we would not be able to conduct our business as described in this report. We have not obtained a formal determination from the SEC as to our status under the Investment Company Act and, consequently, any violation of the Investment Company Act would subject us to material adverse consequences.

Risks Related to Our Manager

We are dependent on our Manager and other key personnel at Fortress and may not find suitable replacements if our Manager terminates the Management Agreement or if other key personnel depart.

Our officers and other individuals who perform services for us (other than Jefferson, CMQR, Repauno and Long Ridge employees) are employees of our Manager or other Fortress entities. We are completely reliant on our Manager, which has significant discretion as to the implementation of our operating policies and strategies, to conduct our business. We are subject to the risk that our Manager will terminate the Management Agreement and that we will not be able to find a suitable replacement for our Manager in a timely manner, at a reasonable cost, or at all. Furthermore, we are dependent on the services of certain key employees of our Manager and certain key employees of Fortress entities whose compensation is partially or entirely dependent upon the amount of management fees earned by our Manager or the incentive allocations distributed to the General Partner and whose continued service is not guaranteed, and the loss of such personnel or services could materially adversely affect our operations. We do not have key man insurance for any of the personnel of the Manager or other Fortress entities that are key to us. An inability to find a suitable replacement for any departing employee of our Manager or Fortress entities on a timely basis could materially adversely affect our ability to operate and grow our business.

In addition, our Manager may assign our Management Agreement to an entity whose business and operations are managed or supervised by Mr. Wesley R. Edens, who is a principal, Co-Chief Executive Officer and a member of the board of directors of Fortress, an affiliate of our Manager, and a member of the management committee of Fortress since co-founding Fortress in May 1998. In the event of any such assignment to a non-affiliate of Fortress, the functions currently performed by our Manager's current personnel may be performed by others. We can give you no assurance that such personnel would manage our operations in the same manner as our Manager currently does, and the failure by the personnel of any such entity to acquire assets generating attractive risk-adjusted returns could have a material adverse effect on our business, financial condition, results of operations and cash flows.

On December 27, 2017, SoftBank announced that it completed the SoftBank Merger. In connection with the SoftBank Merger, Fortress operates within SoftBank as an independent business headquartered in New York. There can be no assurance that the SoftBank Merger will not have an impact on us or our relationship with the Manager.

There are conflicts of interest in our relationship with our Manager.

Our Management Agreement, the Partnership Agreement and our operating agreement were negotiated prior to our IPO and among affiliated parties, and their terms, including fees payable, may not be as favorable to us as if they had been negotiated after our IPO with an unaffiliated third-party.

There are conflicts of interest inherent in our relationship with our Manager insofar as our Manager and its affiliates - including investment funds, private investment funds, or businesses managed by our Manager, including Seacastle Ships Holdings Inc., Trac Intermodal and Florida East Coast Industries - invest in transportation and transportation-related infrastructure assets and whose investment objectives overlap with our asset acquisition objectives. Certain opportunities appropriate for us may also be appropriate for one or more of these other investment vehicles. Certain members of our board of directors and employees of our Manager who are our officers also serve as officers and/or directors of these other entities. For example, we have some of the same directors and officers as Seacastle Ships Holdings Inc. and Trac Intermodal. Although we have the same Manager, we may compete with entities affiliated with our Manager or Fortress, including Seacastle Ships Holdings Inc. and Trac Intermodal, for certain target assets. From time to time, affiliates of Fortress focus on investments in assets with a similar profile as our target assets that we may seek to acquire. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited to, available equity capital and debt financing, market conditions and cash on hand. Fortress has multiple existing and planned funds focused on investing in one or more of our target sectors, each with significant current or expected capital commitments. We may co-invest with these funds in transportation and transportation-related infrastructure assets. Fortress funds generally have a fee structure similar to ours, but the fees actually paid will vary depending on the size, terms and performance of each fund.

Our Management Agreement generally does not limit or restrict our Manager or its affiliates from engaging in any business or managing other pooled investment vehicles that invest in assets that meet our asset acquisition objectives. Our Manager intends to engage in additional transportation and infrastructure related management and other investment opportunities in the future, which may compete with us for investments or result in a change in our current investment strategy. In addition, our operating agreement provides that if Fortress or an affiliate or any of their officers, directors or employees acquire knowledge of a potential transaction that could be a corporate opportunity, they have no duty, to the fullest extent permitted by law, to offer such corporate opportunity to us, our shareholders or our affiliates. In the event that any of our directors and officers who is also a director, officer or employee of Fortress or its affiliates acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as a director or officer of FTAI and such person acts in good faith, then to the fullest extent permitted by law such person is deemed to have fully satisfied such person's fiduciary duties owed to us and is not liable to us if Fortress or its affiliates pursues or acquires the corporate opportunity or if such person did not present the corporate opportunity to us.

The ability of our Manager and its officers and employees to engage in other business activities, subject to the terms of our Management Agreement, may reduce the amount of time our Manager, its officers or other employees spend managing us. In addition, we may engage (subject to our strategy) in material transactions with our Manager or another entity managed by our Manager or one of its affiliates, including Seacastle Ships Holdings Inc., Trac Intermodal and Florida East Coast Industries, which may include, but are not limited to, certain acquisitions, financing arrangements, purchases of debt, co-investments, consumer loans, servicing advances and other assets that present an actual, potential or perceived conflict of interest. Our board of directors adopted a policy regarding the approval of any "related person transactions" pursuant to which certain of the material transactions described above may require disclosure to, and approval by, the independent members of our board of directors. Actual, potential or perceived conflicts have given, and may in the future give, rise to investor dissatisfaction, litigation or regulatory inquiries or enforcement actions. Appropriately dealing with conflicts of interest is complex and difficult, and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential, actual or perceived conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation, which could materially adversely affect our business in a number of ways, including causing an inability to raise additional funds, a reluctance of counterparties to do business with us, a decrease in the prices of our equity securities and a resulting increased risk of litigation and regulatory enforcement actions.

The structure of our Manager's and the General Partner's compensation arrangements may have unintended consequences for us. We have agreed to pay our Manager a management fee and the General Partner is entitled to receive incentive allocations from Holdco that are each based on different measures of performance. Consequently, there may be conflicts in the incentives of our Manager to generate attractive risk-adjusted returns for us. In addition, because the General Partner and our Manager are both affiliates of Fortress, the Income Incentive Allocation paid to the General Partner may cause our Manager to place undue emphasis on the maximization of earnings, including through the use of leverage, at the expense of other objectives, such as preservation of capital, to achieve higher incentive allocations. Investments with higher yield potential are generally riskier or more speculative than investments with lower yield potential. This could result in increased risk to the value of our portfolio of assets and our common shares.

Our directors have approved a broad asset acquisition strategy for our Manager and do not approve each acquisition we make at the direction of our Manager. In addition, we may change our strategy without a shareholder vote, which may result in our acquiring assets that are different, riskier or less profitable than our current assets.

Our Manager is authorized to follow a broad asset acquisition strategy. We may pursue other types of acquisitions as market conditions evolve. Our Manager makes decisions about our investments in accordance with broad investment guidelines adopted by our board of directors. Accordingly, we may, without a shareholder vote, change our target sectors and acquire a variety of assets that differ from, and are possibly riskier than, our current asset portfolio. Consequently, our Manager has great latitude in determining the types and categories of assets it may decide are proper investments for us, including the latitude to invest in types and categories of assets that may differ from those in our existing portfolio. Our directors will periodically review our strategy and our portfolio of assets. However, our board does not review or pre-approve each proposed acquisition or our related financing arrangements. In addition, in conducting periodic reviews, the directors rely primarily on information provided to them by our Manager. Furthermore, transactions entered into by our Manager may be difficult or impossible to reverse by the time they are reviewed by the directors even if the transactions contravene the terms of the Management Agreement. In addition, we may change our asset acquisition strategy, including our target asset classes, without a shareholder vote.

Our asset acquisition strategy may evolve in light of existing market conditions and investment opportunities, and this evolution may involve additional risks depending upon the nature of the assets we target and our ability to finance such assets on a short or long-term basis. Opportunities that present unattractive risk-return profiles relative to other available opportunities under particular market conditions may become relatively attractive under changed market conditions and changes in market conditions may therefore result in changes in the assets we target. Decisions to make acquisitions in new asset categories present risks that may be difficult for us to adequately assess and could therefore reduce or eliminate our ability to pay dividends on our common shares or have adverse effects on our liquidity or financial condition. A change in our asset acquisition strategy may also increase our exposure to interest rate, foreign currency or credit market fluctuations. In addition, a change in our asset acquisition strategy may increase our use of non-match-funded financing, increase the guarantee obligations we agree to incur or increase the number of transactions we enter into with affiliates. Our failure to accurately assess the risks inherent in new asset categories or the financing risks associated with such assets could adversely affect our results of operations and our financial condition.

Our Manager will not be liable to us for any acts or omissions performed in accordance with the Management Agreement, including with respect to the performance of our assets.

Pursuant to our Management Agreement, our Manager will not assume any responsibility other than to render the services called for thereunder in good faith and will not be responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager, its members, managers, officers, employees, sub-advisers and any other person controlling or Manager, will not be liable to us or any of our subsidiaries, to our board of directors, or our or any subsidiary's shareholders or partners for any acts or omissions by our Manager, its members, managers, officers, employees, sub-advisers and any other person controlling or Manager, except liability to us, our shareholders, directors, officers and employees and persons controlling us, by reason of acts constituting bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement. We will, to the full extent lawful, reimburse, indemnify and hold our Manager, its members, managers, officers and employees, sub-advisers and each other person, if any, controlling our Manager harmless of and from any and all expenses, losses, damages, liabilities, demands, charges and claims of any nature whatsoever (including attorneys' fees) in respect of or arising from any acts or omissions of an indemnified party made in good faith in the performance of our Manager's duties under our Management Agreement and not constituting such indemnified party's bad faith, willful misconduct, gross negligence or reckless disregard of our Manager's duties under our Management Agreement.

Our Manager's due diligence of potential asset acquisitions or other transactions may not identify all pertinent risks, which could materially affect our business, financial condition, liquidity and results of operations.

Our Manager intends to conduct due diligence with respect to each asset acquisition opportunity or other transaction it pursues. It is possible, however, that our Manager's due diligence processes will not uncover all relevant facts, particularly with respect to any assets we acquire from third parties. In these cases, our Manager may be given limited access to information about the asset and will rely on information provided by the seller of the asset. In addition, if asset acquisition opportunities are scarce, the process for selecting bidders is competitive, or the timeframe in which we are required to complete diligence is short, our ability to conduct a due diligence investigation may be limited, and we would be required to make decisions based upon a less thorough diligence process than would otherwise be the case. Accordingly, transactions that initially appear to be viable may prove not to be over time, due to the limitations of the due diligence process or other factors.

Risks Related to Taxation

Shareholders may be subject to U.S. federal income tax on their share of our taxable income, regardless of whether they receive any cash dividends from us.

So long as we would not be required to register as an investment company under the Investment Company Act of 1940 if we were a U.S. Corporation and 90% of our gross income for each taxable year constitutes "qualifying income" within the meaning of the Internal Revenue Code of 1986, as amended (the "Code"), on a continuing basis, FTAI will be treated, for U.S. federal income tax purposes, as a partnership and not as an association or publicly traded partnership taxable as a corporation. Holders of our common shares may be subject to U.S. federal, state, local and possibly, in some cases, non-U.S. income taxation on their allocable share of our items of income, gain, loss, deduction and credit (including our allocable share of those items of Holdco or any other entity in which we invest that is treated as a partnership or is otherwise subject to tax on a flow through basis) for each of our taxable years ending with or within their taxable year, regardless of whether they receive cash dividends from us. Such shareholders may not receive cash dividends equal to their allocable share of our net taxable income or even the tax liability that results from that income.

In addition, certain of our holdings, including holdings, if any, in a controlled foreign corporation (as defined in the Code) (a "CFC") may produce taxable income prior to our receipt of cash relating to such income, and shareholders subject to U.S. federal income tax will be required to take such income into account in determining their taxable income.

Certain tax consequences of the ownership of our preferred shares, including treatment of distributions as guaranteed payments for the use of capital, are uncertain.

The tax treatment of distributions on our preferred shares is uncertain. We intend to treat the holders of our preferred shares as partners for tax purposes and we intend to treat distributions on the shares as guaranteed payments for the use of capital that will generally be taxable to the holders of our preferred shares as ordinary income. Although a holder of our preferred shares will recognize taxable income from the accrual of such a guaranteed payment (even in the absence of a contemporaneous cash distribution), we anticipate accruing and making the guaranteed payment distributions quarterly. Except in the case of any loss recognized in connection with our liquidation, holders of our preferred shares are generally not anticipated to share in our items of income, gain, loss or deduction, nor are they anticipated to be allocated any share of our nonrecourse liabilities. If our preferred shares were treated as indebtedness for tax purposes, rather than as guaranteed payments for the use of capital, distributions likely would be treated as payments of interest by us to the holders of our preferred shares. Finally, if holders of our preferred shares were entitled to an allocation of income from FTAI, the risk factors applicable to holders of common shares would generally apply.

U.S. tax reform could adversely affect us and our shareholders.

On December 22, 2017, legislation referred to as the “Tax Cuts and Jobs Act” (the “TCJA”) was signed into law. The TCJA is generally effective for taxable years beginning after December 31, 2017. The TCJA includes significant amendments to the Code, including amendments that significantly change the taxation of individuals and business entities, including the taxation of offshore earnings and the deductibility of interest. Some of the amendments could adversely affect our business and financial condition and the value of our shares. In some cases, there is uncertainty around the scope and application of the new legislation that may be addressed in future guidance issued by the U.S. Department of Treasury and the IRS.

Prospective investors should consult their tax advisors about the TCJA and its potential impact before investing in our shares.

Under the TCJA, shareholders that are not U.S. persons could be subject to U.S. federal income tax, including a 10% withholding tax, on the disposition of our shares.

If the Internal Revenue Service (the “IRS”) were to determine that we, Holdco, or any other entity in which we invest that is subject to tax on a flow-through basis, is engaged in a U.S. trade or business for U.S. federal income tax purposes, any gain recognized by a foreign transferor on the sale, exchange or other disposition of our shares would generally be treated as “effectively connected” with such trade or business to the extent it does not exceed the effectively connected gain that would be allocable to the transferor if we sold all of our assets at their fair market value as of the date of the transferor’s disposition. Under the TCJA, any such gain that is treated as effectively connected will generally be subject to U.S. federal income tax. In addition, the transferee of the shares or the applicable withholding agent would be required to deduct and withhold a tax equal to 10% of the amount realized by the transferor on the disposition, which would include an allocable portion of our liabilities and would therefore generally exceed the amount of transferred cash received by transferor in the disposition, unless the transferor provides an IRS Form W-9 or an affidavit stating the transferor’s taxpayer identification number and that the transferor is not a foreign person. If the transferee fails to properly withhold such tax, we would be required to deduct and withhold from distributions to the transferee a tax in an amount equal to the amount the transferee failed to withhold, plus interest. Although we do not believe that we are currently engaged in a U.S. trade or business (directly or indirectly through pass-through subsidiaries), we are not required to manage our operations in a manner that is intended to avoid the conduct of a U.S. trade or business.

The withholding requirements with respect to the disposition of an interest in a publicly traded partnership are currently suspended and will remain suspended until Treasury regulations are promulgated or other relevant authoritative guidance is issued. Future guidance on the implementation of these requirements will be applicable on a prospective basis.

Tax gain or loss on a sale or other disposition of our common shares could be more or less than expected.

If a sale of our common shares by a shareholder is taxable in the United States, the shareholder will recognize gain or loss equal to the difference between the amount realized by such shareholder in the sale and such shareholder’s adjusted tax basis in those shares. A shareholder’s adjusted tax basis in the shares at the time of sale will generally be lower than the shareholder’s original tax basis in the shares to the extent that prior distributions to such shareholder exceed the total taxable income allocated to such shareholder. A shareholder may therefore recognize a gain in a sale of our common shares if the shares are sold at a price that is less than their original cost. A portion of the amount realized, whether or not representing gain, may be treated as ordinary income to such shareholder.

Our ability to make distributions depends on our receiving sufficient cash distributions from our subsidiaries, and we cannot assure our shareholders that we will be able to make cash distributions to them in amounts that are sufficient to fund their tax liabilities.

Our subsidiaries may be subject to local taxes in each of the relevant territories and jurisdictions in which they operate, including taxes on income, profits or gains and withholding taxes. As a result, our funds available for distribution are indirectly reduced by such taxes, and the post-tax return to our shareholders is similarly reduced by such taxes.

In general, a shareholder that is subject to U.S. federal income tax must include in income its allocable share of FTAI’s items of income, gain, loss, deduction, and credit (including, so long as FTAI is treated as a partnership for U.S. federal income tax purposes, FTAI’s allocable share of those items of Holdco and any pass-through subsidiaries of Holdco) for each of our taxable years ending with or within such shareholder’s taxable year. However, the cash distributed to a shareholder may not be sufficient to pay the full amount of such shareholder’s tax liability in respect of its investment in us, because each shareholder’s tax liability depends on such shareholder’s particular tax situation and the tax treatment of our underlying activities or assets.

If we are treated as a corporation for U.S. federal income tax purposes, the value of the shares could be adversely affected.

We have not requested, and do not plan to request, a ruling from the IRS on our treatment as a partnership for U.S. federal income tax purposes, or on any other matter affecting us. As of the date of the consummation of our initial public offering, under then current law and assuming full compliance with the terms of our operating agreement (and other relevant documents) and based upon factual statements and representations made by us, our outside counsel opined that we will be treated as a partnership, and not as an association or a publicly traded partnership taxable as a corporation for U.S. federal income tax purposes. However, opinions of counsel are not binding upon the IRS or any court, and the IRS may challenge this conclusion and a court may sustain such a challenge. The factual representations made by us upon which our outside counsel relied relate to our organization, operation, assets, activities, income, and present and future conduct of our operations. In general, if an entity that would otherwise be classified as a partnership for U.S. federal income tax purposes is a “publicly traded partnership” (as defined in the Code) it will be nonetheless treated as a corporation for U.S. federal income tax purposes, unless the exception described below, and upon which we intend to

rely, applies. A publicly traded partnership will, however, be treated as a partnership, and not as a corporation for U.S. federal income tax purposes, so long as 90% or more of its gross income for each taxable year constitutes “qualifying income” within the meaning of the Code and it is not required to register as an investment company under the Investment Company Act of 1940. We refer to this exception as the “Qualifying Income Exception.”

Qualifying income generally includes dividends, interest, capital gains from the sale or other disposition of stocks and securities and certain other forms of investment income. A substantial portion of our income consists of “Subpart F” income (which includes rent and other types of passive income) derived from CFCs. While we believe that such income constitutes qualifying income, no assurance can be given that the IRS will agree with such position. We also believe that our return from investments will include interest, dividends, capital gains and other types of qualifying income, but no assurance can be given as to the types of income that will be earned in any given year.

If we fail to satisfy the Qualifying Income Exception, we would be required to pay U.S. federal income tax at regular corporate rates on our income. Although the TCJA reduced regular corporate rates from 35% to 21%, our failure to qualify as a partnership for U.S. federal income tax purposes could nevertheless adversely affect our business, operating results and financial condition. In addition, we would likely be liable for state and local income and/or franchise taxes on our income. Finally, distributions of cash to shareholders would constitute qualified dividend income taxable to such shareholders to the extent of our earnings and profits and would not be deductible by us. Taxation of us as a publicly traded partnership taxable as a corporation could result in a material adverse effect on our cash flow and the after-tax returns for shareholders and thus could result in a substantial reduction in the value of our shares.

Shareholders that are not U.S. persons should also anticipate being required to file U.S. tax returns and may be required to pay U.S. tax solely on account of owning our shares.

In light of our intended investment activities, we may be, or may become, engaged in a U.S. trade or business for U.S. federal income tax purposes (directly or indirectly through pass-through subsidiaries), in which case some portion of our income would be treated as effectively connected income with respect to non-U.S. persons. Moreover, we anticipate that, in the future, we will sell interests in U.S. real holding property corporations (each a “USRPHC”) and therefore be deemed to be engaged in a U.S. trade or business at such time. If we were to realize gain from the sale or other disposition of a U.S. real property interest (including a USRPHC) or were otherwise engaged in a U.S. trade or business, non-U.S. persons holding our common shares generally would be required to file U.S. federal income tax returns and would be subject to U.S. federal withholding tax on their allocable share of the effectively connected income on gain at the highest marginal U.S. federal income tax rates applicable to ordinary income. Likewise, non-U.S. persons holding our preferred shares, by virtue of receiving guaranteed payments, may be required to file U.S. federal income tax returns and may be subject to U.S. federal withholding tax on their guaranteed payments, irrespective of our operations or investments. In both cases, non-U.S. persons that are corporations may also be subject to a branch profits tax on their allocable share of such income. Non-U.S. persons should anticipate being required to file U.S. tax returns and may be required to pay U.S. tax solely on account of owning our shares. Non-U.S. shareholders are urged to consult their tax advisors regarding the tax consequences of an investment in our shares.

Non-U.S. persons that hold (or are deemed to hold) more than 5% of any class of our shares (or held, or were deemed to hold, more than 5% of any class of our shares) may be subject to U.S. federal income tax upon the disposition of some or all their shares.

If a non-U.S. person held more than 5% of any class of our shares at any time during the 5-year period preceding such non-U.S. person’s disposition of such shares, and we were considered a USRPHC (determined as if we were a U.S. corporation) at any time during such 5-year period because of our current or previous ownership of U.S. real property interests above a certain threshold, such non-U.S. person may be subject to U.S. tax on such disposition of such shares (and may have a U.S. tax return filing obligation).

Tax-exempt shareholders may face certain adverse U.S. tax consequences from owning our shares.

We are not required to manage our operations in a manner that would minimize the likelihood of generating income that would constitute “unrelated business taxable income” (“UBTI”) to the extent allocated to a tax-exempt shareholder. Although we expect to invest through subsidiaries that are treated as corporations for U.S. federal income tax purposes and such corporate investments would generally not result in an allocation of UBTI to a shareholder on account of the activities of those subsidiaries, we may not invest through corporate subsidiaries in all cases. Moreover, UBTI also includes income attributable to debt-financed property and we are not prohibited from incurring debt to finance our investments, including investments in subsidiaries. Furthermore, we are not prohibited from being (or causing a subsidiary to be) a guarantor of loans made to a subsidiary. If we (or certain of our subsidiaries) were treated as the borrower for U.S. tax purposes on account of those guarantees, some or all of our investments could be considered debt-financed property. In addition, the treatment of guaranteed payments for the use of capital to tax-exempt investors is not certain, and so distributions on our preferred shares may be treated as UBTI for federal income tax purposes, irrespective of our operations or the structure of our investments. The potential for income to be characterized as UBTI could make our shares an unsuitable investment for a tax-exempt entity. Tax-exempt shareholders are urged to consult their tax advisors regarding the tax consequences of an investment in our shares.

We may hold or acquire certain investments through an entity classified as a CFC for U.S. federal income tax purposes.

Many of our investments are in non-U.S. corporations or are held through a non-U.S. subsidiary that is classified as a corporation for U.S. federal income tax purposes. Many of these entities are CFCs for U.S. federal income tax purposes. U.S. Holders indirectly owning an interest in a CFC may experience adverse U.S. tax consequences.

If substantially all of the U.S. source rental income derived from aircraft or ships used to transport passengers or cargo in international traffic ("U.S. source international transport rental income") of any of our non-U.S. corporate subsidiaries is attributable to activities of personnel based in the United States, such subsidiary could be subject to U.S. federal income tax on a net income basis at regular tax rates, rather than at a rate of 4% on gross income, which would adversely affect our business and result in decreased funds available for distribution to our shareholders.

We believe that the U.S. source international transport rental income of our non-U.S. subsidiaries generally will be subject to U.S. federal income tax, on a gross-income basis at a rate not in excess of 4%. If any of our non-U.S. subsidiaries that is treated as a corporation for U.S. federal income tax purposes did not comply with certain administrative guidelines of the IRS, such that 90% or more of such subsidiary's U.S. source international transport rental income were attributable to the activities of personnel based in the United States (in the case of bareboat leases) or from "regularly scheduled transportation" as defined in such administrative guidelines (in the case of time-charter leases), such subsidiary's U.S. source rental income would be treated as income effectively connected with a trade or business in the United States. In such case, such subsidiary's U.S. source international transport rental income would be subject to U.S. federal income tax at a maximum rate of 21% for taxable years beginning after December 31, 2017. In addition, such subsidiary would be subject to the U.S. federal branch profits tax on its effectively connected earnings and profits at a rate of 30%. The imposition of such taxes would adversely affect our business and would result in decreased funds available for distribution to our shareholders.

The ability of our corporate subsidiaries to utilize net operating losses ("NOLs") to offset their future taxable income may become limited.

Certain of our corporate subsidiaries have significant NOLs, and any limitation on their use could materially affect our profitability. Such a limitation could occur if our corporate subsidiaries were to experience an "ownership change" as defined under Section 382 of the Code. The rules for determining ownership changes are complex, and changes in the ownership of our shares could cause an ownership change in one or more of our corporate subsidiaries. Sales of our shares by our shareholders, as well as future issuances of our shares, could contribute to a potential ownership change in our corporate subsidiaries.

Our subsidiaries may become subject to unanticipated tax liabilities that may have a material adverse effect on our results of operations.

Some of our subsidiaries are subject to income, withholding or other taxes in certain non-U.S. jurisdictions by reason of their jurisdiction of incorporation, activities and operations, where their assets are used or where the lessees of their assets (or others in possession of their assets) are located, and it is also possible that taxing authorities in any such jurisdictions could assert that our subsidiaries are subject to greater taxation than we currently anticipate. Further, the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting ("BEPS") recently entered into force among the jurisdictions that ratified it. The implementation of BEPS prevention measures could result in a higher effective tax rate on our worldwide earnings by, for example, reducing the tax deductions or otherwise increasing the taxable income of our subsidiaries. In addition, a portion of certain of our non-U.S. corporate subsidiaries' income is treated as effectively connected with a U.S. trade or business and is accordingly subject to U.S. federal income tax. It is possible that the IRS could assert that a greater portion of any such non-U.S. subsidiaries' income is effectively connected income that should be subject to U.S. federal income tax.

Our structure involves complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. Our structure also is subject to potential legislative, judicial or administrative change and differing interpretations, possibly on a retroactive basis.

The U.S. federal income tax treatment of our shareholders depends in some instances on determinations of fact and interpretations of complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. The U.S. federal income tax treatment of our shareholders may also be modified by administrative, legislative or judicial interpretation at any time, possibly on a retroactive basis, and any such action may affect our investments and commitments that were previously made, and could adversely affect the value of our shares or cause us to change the way we conduct our business.

Our organizational documents and agreements permit the board of directors to modify our operating agreement from time to time, without the consent of shareholders, in order to address certain changes in Treasury regulations, legislation or interpretation. In some circumstances, such revisions could have a material adverse impact on some or all shareholders. Moreover, we will apply certain assumptions and conventions in an attempt to comply with applicable rules and to report income, gain, deduction, loss and credit to shareholders in a manner that reflects such shareholders' beneficial ownership of partnership items, taking into account variation in ownership interests during each taxable year because of trading activity. However, these assumptions and conventions may not be in compliance with all aspects of applicable tax requirements. It is possible that the IRS will assert successfully that the conventions and assumptions used by us do not satisfy the technical requirements of the Code and/or Treasury regulations and could require that items of income, gain, deduction, loss or credit, including interest deductions, be adjusted, reallocated, or disallowed, in a manner that adversely affects shareholders.

We could incur a significant tax liability if the IRS successfully asserts that the “anti-stapling” rules apply to our investments in our non-U.S. and U.S. subsidiaries, which would adversely affect our business and result in decreased funds available for distribution to our shareholders.

If we were subject to the “anti-stapling” rules of Section 269B of the Code, we would incur a significant tax liability as a result of owning more than 50% of the value of both U.S. and non-U.S. corporate subsidiaries, whose equity interests constitute “stapled interests” that may only be transferred together. If the “anti-stapling” rules applied, our non-U.S. corporate subsidiaries that are treated as corporations for U.S. federal income tax purposes would be treated as U.S. corporations, which would cause those entities to be subject to U.S. federal corporate income tax on their worldwide income. Because we intend to separately manage and operate our non-U.S. and U.S. corporate subsidiaries and structure their business activities in a manner that would allow us to dispose of such subsidiaries separately, we do not expect that the “anti-stapling” rules will apply. However, there can be no assurance that the IRS would not successfully assert a contrary position, which would adversely affect our business and result in decreased funds available for distribution to our shareholders.

Because we cannot match transferors and transferees of our shares, we have therefore adopted certain income tax accounting positions that may not conform with all aspects of applicable tax requirements. The IRS may challenge this treatment, which could adversely affect the value of our shares.

Because we cannot match transferors and transferees of our shares, we have adopted depreciation, amortization and other tax accounting positions that may not conform with all aspects of existing Treasury regulations. A successful IRS challenge to those positions could adversely affect the amount of tax benefits available to our shareholders. It also could affect the timing of these tax benefits or the amount of gain on the sale of our common shares and could have a negative impact on the value of our common shares or result in audits of and adjustments to our shareholders' tax returns.

We generally allocate items of income, gain, loss and deduction using a monthly or other convention, whereby any such items we recognize in a given month are allocated to our shareholders as of a specified date of such month. As a result, if a shareholder transfers its common shares, it might be allocated income, gain, loss and deduction realized by us after the date of the transfer. Similarly, if a shareholder acquires additional common shares, it might be allocated income, gain, loss, and deduction realized by us prior to its ownership of such common shares. Consequently, our shareholders may recognize income in excess of cash distributions received from us, and any income so included by a shareholder would increase the basis such shareholder has in its common shares and would offset any gain (or increase the amount of loss) realized by such shareholder on a subsequent disposition of its common shares.

Rules regarding U.S. federal income tax liability arising from IRS audits could adversely affect our shareholders.

For taxable years beginning on or after January 1, 2018, we will be liable for U.S. federal income tax liability arising from an IRS audit, unless certain alternative methods are available and we elect to use them. It is possible that certain shareholders or we may be liable for taxes attributable to adjustments to our taxable income with respect to tax years that closed before such shareholders owned our shares. Accordingly, these rules may adversely affect certain shareholders in certain cases. This differs from the rules that apply for taxable years beginning before January 1, 2018, which generally provide that tax adjustments only affect the persons who were shareholders in the tax year in which the item was reported on our tax return. The manner in which these rules apply is uncertain and in many respects depends on the promulgation of future regulations or other guidance by the U.S. Treasury Department or the IRS.

Risks Related to Our Shares

The market price and trading volume of our common and preferred shares may be volatile, which could result in rapid and substantial losses for our shareholders.

The market price of our common and preferred shares may be highly volatile and could be subject to wide fluctuations. In addition, the trading volume in our common and preferred shares may fluctuate and cause significant price variations to occur. If the market price of our common or preferred shares declines significantly, you may be unable to resell your shares at or above your purchase price, if at all. The market price of our common and preferred shares may fluctuate or decline significantly in the future. Some of the factors that could negatively affect our share price or result in fluctuations in the price or trading volume of our shares include:

- a shift in our investor base;
- our quarterly or annual earnings, or those of other comparable companies;
- actual or anticipated fluctuations in our operating results;
- changes in accounting standards, policies, guidance, interpretations or principles;
- announcements by us or our competitors of significant investments, acquisitions or dispositions;
- the failure of securities analysts to cover our common shares;
- changes in earnings estimates by securities analysts or our ability to meet those estimates;
- the operating and share price performance of other comparable companies;
- prevailing interest rates or rates of return being paid by other comparable companies and the market for securities similar to our preferred shares;
- additional issuances of preferred shares;

- whether we we declare distributions on our preferred shares;
- overall market fluctuations;
- general economic conditions; and
- developments in the markets and market sectors in which we participate.

Stock markets in the United States have experienced extreme price and volume fluctuations. Market fluctuations, as well as general political and economic conditions, such as acts of terrorism, prolonged economic uncertainty, a recession or interest rate or currency rate fluctuations, could adversely affect the market price of our common and preferred shares.

We are required by Section 404 of the Sarbanes-Oxley Act to evaluate the effectiveness of our internal controls, and the outcome of that effort may adversely affect our results of operations, financial condition and liquidity. Because we are no longer an emerging growth company, we are subject to heightened disclosure obligations, which may impact our share price.

As a public company, we are required to comply with Section 404 ("Section 404") of the Sarbanes-Oxley Act. Section 404 requires that we evaluate the effectiveness of our internal control over financial reporting at the end of each fiscal year and to include a management report assessing the effectiveness of our internal controls over financial reporting in our Annual Report on Form 10-K for that fiscal year. Section 404 also requires an independent registered public accounting firm to attest to, and report on, management's assessment of our internal controls over financial reporting. Because we ceased to be an emerging growth company at the end of 2017, we were required to have our independent registered public accounting firm attest to the effectiveness of our internal controls in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018, and will be required to do so going forward. The outcome of our review and the report of our independent registered public accounting firm may adversely affect our results of operations, financial condition and liquidity. During the course of our review, we may identify control deficiencies of varying degrees of severity, and we may incur significant costs to remediate those deficiencies or otherwise improve our internal controls. As a public company, we are required to report control deficiencies that constitute a "material weakness" in our internal control over financial reporting. If we discover a material weakness in our internal control over financial reporting, our share price could decline and our ability to raise capital could be impaired.

Your percentage ownership in us may be diluted in the future.

Your percentage ownership in FTAI may be diluted in the future because of equity awards granted and may be granted to our Manager pursuant to the Management Agreement and the Incentive Plan. Since 2015, we granted our Manager an option to acquire 1,401,726 common shares in connection with equity offerings. In the future, upon the successful completion of additional offerings of our common shares or other equity securities (including securities issued as consideration in an acquisition), we will grant to our Manager options to purchase common shares in an amount equal to 10% of the number of common shares being sold in such offerings (or if the issuance relates to equity securities other than our common shares, options to purchase a number of common shares equal to 10% of the gross capital raised in the equity issuance divided by the fair market value of a common share as of the date of the issuance), with an exercise price equal to the offering price per share paid by the public or other ultimate purchaser or attributed to such securities in connection with an acquisition (or the fair market value of a common share as of the date of the equity issuance if it relates to equity securities other than our common shares), and any such offering or the exercise of the option in connection with such offering would cause dilution.

Our board of directors has adopted the Incentive Plan, which provides for the grant of equity-based awards, including restricted shares, stock options, stock appreciation rights, performance awards, restricted share units, tandem awards and other equity-based and non-equity based awards, in each case to our Manager, to the directors, officers, employees, service providers, consultants and advisors of our Manager who perform services for us, and to our directors, officers, employees, service providers, consultants and advisors. We have initially reserved 30,000,000 common shares for issuance under the Incentive Plan. As of September 30, 2019, rights relating to 1,426,726 of our common shares were outstanding under the Incentive Plan. In the future on the date of any equity issuance by us during the ten-year term of the Incentive Plan (including in respect of securities issued as consideration in an acquisition), the maximum number of shares available for issuance under the Plan will be increased to include an additional number of common shares equal to ten percent (10%) of either (i) the total number of common shares newly issued by us in such equity issuance or (ii) if such equity issuance relates to equity securities other than our common shares, a number of our common shares equal to 10% of (A) the gross capital raised in an equity issuance of equity securities other than common shares during the ten-year term of the Incentive Plan, divided by (B) the fair market value of a common share as of the date of such equity issuance.

Sales or issuances of our common shares could adversely affect the market price of our common shares.

Sales of substantial amounts of our common shares in the public market, or the perception that such sales might occur, could adversely affect the market price of our common shares. The issuance of our common shares in connection with property, portfolio or business acquisitions or the exercise of outstanding options or otherwise could also have an adverse effect on the market price of our common shares.

The incurrence or issuance of debt, which ranks senior to our common shares upon our liquidation, and future issuances of equity or equity-related securities, which would dilute the holdings of our existing common shareholders and may be senior to our common shares for the purposes of making distributions, periodically or upon liquidation, may negatively affect the market price of our common shares.

We have incurred and may in the future incur or issue debt or issue equity or equity-related securities to finance our operations, acquisitions or investments. Upon our liquidation, lenders and holders of our debt and holders of our preferred shares (if any) would receive a distribution of our available assets before common shareholders. Any future incurrence or issuance of debt would increase our interest cost and could adversely affect our results of operations and cash flows. We are not required to offer any additional equity securities to existing common shareholders on a preemptive basis. Therefore, additional issuances of common shares, directly or through convertible or exchangeable securities (including limited partnership interests in our operating partnership), warrants or options, will dilute the holdings of our existing common shareholders and such issuances, or the perception of such issuances, may reduce the market price of our common shares. Any preferred shares issued by us would likely have a preference on distribution payments, periodically or upon liquidation, which could eliminate or otherwise limit our ability to make distributions to common shareholders. Because our decision to incur or issue debt or issue equity or equity-related securities in the future will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing, nature or success of our future capital raising efforts. Thus, common shareholders bear the risk that our future incurrence or issuance of debt or issuance of equity or equity-related securities will adversely affect the market price of our common shares.

Our determination of how much leverage to use to finance our acquisitions may adversely affect our return on our assets and may reduce funds available for distribution.

We utilize leverage to finance many of our asset acquisitions, which entitles certain lenders to cash flows prior to retaining a return on our assets. While our Manager targets using only what we believe to be reasonable leverage, our strategy does not limit the amount of leverage we may incur with respect to any specific asset. The return we are able to earn on our assets and funds available for distribution to our shareholders may be significantly reduced due to changes in market conditions, which may cause the cost of our financing to increase relative to the income that can be derived from our assets.

While we currently intend to pay regular quarterly dividends to our shareholders, we may change our dividend policy at any time.

Although we currently intend to pay regular quarterly dividends to holders of our common shares, we may change our dividend policy at any time. Our net cash provided by operating activities has been less than the amount of distributions to our shareholders. The declaration and payment of dividends to holders of our common shares will be at the discretion of our board of directors in accordance with applicable law after taking into account various factors, including actual results of operations, liquidity and financial condition, net cash provided by operating activities, restrictions imposed by applicable law, our taxable income, our operating expenses and other factors our board of directors deem relevant. Our long term goal is to maintain a payout ratio of between 50-60% of funds available for distribution, with remaining amounts used primarily to fund our future acquisitions and opportunities. There can be no assurance that we will continue to pay dividends in amounts or on a basis consistent with prior distributions to our investors, if at all. Because we are a holding company and have no direct operations, we will only be able to pay dividends from our available cash on hand and any funds we receive from our subsidiaries and our ability to receive distributions from our subsidiaries may be limited by the financing agreements to which they are subject. In addition, pursuant to the Partnership Agreement, the General Partner will be entitled to receive incentive allocations before any amounts are distributed by us based both on our consolidated net income and capital gains income in each fiscal quarter and for each fiscal year, respectively. Furthermore, the terms of our Series A preferred shares generally prevent us from declaring or paying dividends on or repurchasing our common shares or other junior capital unless all accrued distributions on such preferred shares have been paid in full.

Anti-takeover provisions in our operating agreement and Delaware law could delay or prevent a change in control.

Provisions in our operating agreement may make it more difficult and expensive for a third party to acquire control of us even if a change of control would be beneficial to the interests of our shareholders. For example, our operating agreement provides for a staggered board, requires advance notice for proposals by shareholders and nominations, places limitations on convening shareholder meetings, and authorizes the issuance of preferred shares that could be issued by our board of directors to thwart a takeover attempt. In addition, certain provisions of Delaware law may delay or prevent a transaction that could cause a change in our control. The market price of our shares could be adversely affected to the extent that provisions of our operating agreement discourage potential takeover attempts that our shareholders may favor.

There are certain provisions in our operating agreement regarding exculpation and indemnification of our officers and directors that differ from the Delaware General Corporation Law (the "DGCL") in a manner that may be less protective of the interests of our shareholders.

Our operating agreement provides that to the fullest extent permitted by applicable law our directors or officers will not be liable to us. Under the DGCL, a director or officer would be liable to us for (i) breach of duty of loyalty to us or our shareholders, (ii) intentional misconduct or knowing violations of the law that are not done in good faith, (iii) improper redemption of shares or declaration of dividend, or (iv) a transaction from which the director derived an improper personal benefit. In addition, our operating agreement provides that we indemnify our directors and officers for acts or omissions to the fullest extent provided by law. Under the DGCL, a corporation can only indemnify directors and officers for acts or omissions if the director or officer acted in good faith, in a manner he reasonably believed to be in the best interests of the corporation, and, in criminal action, if the officer or director had no reasonable cause to believe his conduct was unlawful. Accordingly, our operating agreement may be less protective of the interests of our shareholders, when compared to the DGCL, insofar as it relates to the exculpation and indemnification of our officers and directors.

As a public company, we will incur additional costs and face increased demands on our management.

As a relatively new public company with shares listed on the NYSE, we need to comply with an extensive body of regulations that did not apply to us previously, including certain provisions of the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, regulations of the SEC and requirements of the NYSE. These rules and regulations increase our legal and financial compliance costs and make some activities more time-consuming and costly. For example, as a result of becoming a public company, we have independent directors and board committees. In addition, we may continue to incur additional costs associated with maintaining directors' and officers' liability insurance and with the termination of our status as an emerging growth company as of the end of 2017. Because we are no longer an emerging growth company, we are subject to the independent auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act and enhanced disclosure obligations regarding executive compensation in our periodic reports and proxy statements. We are currently evaluating and monitoring developments with respect to these rules, which may impose additional costs on us and have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

If securities or industry analysts do not publish research or reports about our business, or if they downgrade their recommendations regarding our common shares, our share price and trading volume could decline.

The trading market for our common shares are influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who cover us downgrades our common units or publishes inaccurate or unfavorable research about our business, our common share price may decline. If analysts cease coverage of us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our common share price or trading volume to decline and our common shares to be less liquid.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibit No.	Description
3.1	Certificate of Formation (incorporated by reference to Exhibit 3.1 of Amendment No. 4 to the Company's Registration Statement on Form S-1, filed on April 30, 2015).
3.2	Second Amended and Restated Limited Liability Company Agreement of Fortress Transportation and Infrastructure Investors LLC, dated as of September 12, 2019 (incorporated by reference to Exhibit 3.2 of the Company's Form 8-A, filed September 12, 2019).
3.3	Share Designation with respect to the 8.25% Fixed-to-Floating Series A Cumulative Perpetual Redeemable Preferred Shares, dated as of September 12, 2019 (included as part of Exhibit 3.2).
4.1	Indenture, dated March 15, 2017, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed on March 15, 2017).
4.2	Form of global note representing the Company's 6.75% senior unsecured notes due 2022 (included in Exhibit 4.1).
4.3	First Supplemental Indenture, dated June 8, 2017, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.3 of the Company's Annual Report on Form 10-K, filed on March 1, 2018).
4.4	Second Supplemental Indenture, dated August 23, 2017, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed on August 23, 2017).
4.5	Third Supplemental Indenture, dated December 20, 2017, between Fortress Transportation and Infrastructure LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K filed on December 20, 2017).
4.6	Fourth Supplemental Indenture, dated May 31, 2018, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed May 31, 2018).
4.7	Fifth Supplemental Indenture, dated February 8, 2019, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.75% senior unsecured notes due 2022 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed February 8, 2019).
4.8	Indenture, dated September 18, 2018, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.50% senior unsecured notes due 2025 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed on September 18, 2018).
4.9	Form of global note representing the Company's 6.50% senior unsecured notes due 2025 (included in Exhibit 4.8).
4.10	First Supplemental Indenture, dated May 21, 2019, between Fortress Transportation and Infrastructure Investors LLC and U.S. Bank National Association, as trustee, relating to the Company's 6.50% senior unsecured notes due 2025 (incorporated by reference to Exhibit 4.1 of the Company's Current Report on Form 8-K, filed on May 21, 2019).
4.11	Form of certificate representing the 8.25% Fixed-to-Floating Rate Series A Cumulative Perpetual Redeemable Preferred Shares of Fortress Transportation and Infrastructure Investors LLC (incorporated by reference to Exhibit 4.1 of the Company's Form 8-A, filed September 12, 2019).
10.1	Fourth Amended and Restated Partnership Agreement of Fortress Worldwide Transportation and Infrastructure General Partnership (incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on May 21, 2015).
† 10.2	Management and Advisory Agreement, dated as of May 20, 2015, between Fortress Transportation and Infrastructure Investors LLC and FIG LLC (incorporated by reference to Exhibit 10.2 of the Company's Current Report on Form 8-K, filed on May 21, 2015).
† 10.3	Registration Rights Agreement, dated as of May 20, 2015, among Fortress Transportation and Infrastructure Investors LLC, FIG LLC and Fortress Transportation and Infrastructure Master GP LLC (incorporated by reference to Exhibit 10.3 of the Company's Current Report on Form 8-K, filed on May 21, 2015).
† 10.4	Fortress Transportation and Infrastructure Investors LLC Nonqualified Stock Option and Incentive Award Plan (incorporated by reference to Exhibit 10.4 of the Company's Current Report on Form 8-K, filed on May 21, 2015).
10.5	Form of director and officer indemnification agreement of Fortress Transportation and Infrastructure Investors LLC (incorporated by reference to Exhibit 10.5 of Amendment No. 4 to the Company's Registration Statement on Form S-1, filed April 30, 2015).
10.6	Credit Agreement, dated as of August 27, 2014, among Morgan Stanley Senior Funding, Inc., as administrative agent, Jefferson Gulf Coast Energy Partners LLC and the other lenders party thereto (incorporated by reference to Exhibit 10.6 of Amendment No. 4 to the Company's Registration Statement on Form S-1, filed April 30, 2015).
10.7	Trust Indenture and Security Agreement between the District and The Bank of New York Mellon Trust Company, National Association, dated as of February 1, 2016 (incorporated by reference to Exhibit 10.7 of the Company's Annual Report on Form 10-K, filed on March 10, 2016).
10.8	Standby Bond Purchase Agreement among the Port of Beaumont Navigation District of Jefferson County, Texas, The Bank of New York Mellon Trust Company, National Association, Jefferson Railport Terminal II Holdings LLC and Jefferson Railport Terminal II LLC dated as of February 1, 2016 (incorporated by reference to Exhibit 10.8 of the Company's Annual Report on Form 10-K, filed on March 10, 2016).
10.9	Capital Call Agreement, by and among Fortress Transportation and Infrastructure Investors LLC, FTAI Energy Holdings LLC, FTAI Partner Holdings LLC, FTAI Midstream GP Holdings LLC, FTAI Midstream GP LLC, FTAI Midstream Holdings LLC, FTAI Energy Partners LLC and Jefferson Railport Terminal II Holdings LLC, dated as of February 1, 2016 (incorporated by reference to Exhibit 10.9 of the Company's Annual Report on Form 10-K, filed on March 10, 2016).
10.10	Fee and Support Agreement, among FTAI Energy Holdings LLC, FEP Terminal Holdings LLC, FTAI Energy Partners LLC and Jefferson Railport Terminal II LLC, dated as of March 7, 2016 (incorporated by reference to Exhibit 10.10 of the Company's Amended Annual Report on Form 10-K/A, filed on April 29, 2016).

Exhibit No.	Description
10.11	Lease and Development Agreement (Facilities Lease), dated as of February 1, 2016, by and between the Port of Beaumont Navigation District of Jefferson County, Texas and Jefferson Railport Terminal II LLC (incorporated by reference to Exhibit 10.11 of the Company's Annual Report on Form 10-K, filed on March 10, 2016).
10.12	Deed of Trust of Jefferson Railport Terminal II LLC, dated as of February 1, 2016 (incorporated by reference to Exhibit 10.12 of the Company's Annual Report on Form 10-K, filed on March 10, 2016).
10.13	Credit Agreement, dated January 23, 2017, among Fortress Transportation and Infrastructure Investors LLC, as holdings, Fortress Worldwide Transportation and Infrastructure General Partnership, as IntermediateCo, WWTAI Finance Ltd., as Borrower, the Subsidiary Guarantors from time to time party thereto, the lenders from time to time party thereto and Morgan Stanley Senior Funding, Inc., as Administrative Agent (incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on January 27, 2017).
10.14	Credit Agreement, dated June 16, 2017, among Fortress Transportation and Infrastructure Investors LLC, as Borrower, the lenders and issuing banks from time to time party thereto and JPMorgan Chase Bank, N.A., as Administrative Agent (incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on June 22, 2017).
10.15	Credit Agreement Amendment No. 1, dated as of August 2, 2018, among Fortress Transportation and Infrastructure Investors LLC, as borrower, Fortress Worldwide Transportation and Infrastructure General Partnership, the lenders and issuing banks from time to time party thereto and JPMorgan Chase Bank, N.A., as administrative agent (incorporated by reference to Exhibit 10.15 of the Company's Quarterly Report on Form 10-Q, filed on August 3, 2018).
10.16	Credit Agreement Amendment No. 2 dated as of February 8, 2019, among Fortress Transportation and Infrastructure Investors LLC, as borrower, Fortress Worldwide Transportation and Infrastructure General Partnership, as grantor, JPMorgan Chase Bank, N.A., Morgan Stanley Senior Funding, Inc. and Barclays Bank PLC, as lenders and issuing banks, and JPMorgan Chase Bank, N.A., as Administrative Agent (incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on February 11, 2019).

EXHIBIT 31.1

SECTION 302 CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, Joseph P. Adams, Jr., certify that:

1. I have reviewed this quarterly report on Form 10-Q of Fortress Transportation and Infrastructure Investors LLC (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

SECTION 302 CERTIFICATION OF CHIEF FINANCIAL OFFICER

I, Scott Christopher, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Fortress Transportation and Infrastructure Investors LLC (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXHIBIT 32.1

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report on Form 10-Q of Fortress Transportation and Infrastructure Investors LLC (the "Company") for the quarterly period ended September 30, 2019 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Joseph P. Adams, Jr., as Chief Executive Officer of the Company, hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

/s/ Joseph P. Adams, Jr.
